

# Battalion CLASSIFIED ADS

Page 6 THURSDAY, JANUARY 25, 1951

USE BATTALION CLASSIFIED ADS TO BUY, SELL, RENT OR TRADE. Rates . . . 3c a word per insertion with a 25c minimum. Space rate in classified section . . . five per column-inch. Send all classified to STUDENT ACTIVITIES office. All ads must be received in Student Activities office by 10 a.m. on the day before publication.

### FOR SALE

**"FOR SALE, CHEAP:** An attractive young widow and two small children. Her husband, who adequately provided for his wife, left his widow destitute. Maybe your wife wouldn't actually run this ad in event of your death, but—Why force her into the marriage market, for lack of economic independence, when her soul is still burdened with rich memories of you? Life insurance, by the stroke of a pen, can create an estate, which only years of hard work and saving can otherwise build. Put Eugene Kush on your calendar ahead of the undertaker.

### FOR RENT

BY OWNER, 2-bedroom brick, glassed sun-porch, the bath and kitchen, automatic heating, dishwasher and washing machine installed. 400 Francis Drive, College Hills. Phone 4-4748 or 4-5364.

(Continued from Page 1)

longer necessary to depend on an annual grant from the Board of Directors.

With these new time saving machines the press felt prepared to take on the responsibility of printing the weekly Battalion. A short time later the Press added the Battalion Magazine, now called the Commentator, to its list of publications.

The Press, like most unattached units of the college, could not call any place really its permanent home. Increased enrollment in Mechanical Engineering forced it to move.

In 1935 it was moved into the basement of the new Administration Building. As in the past, when they had moved, they did like the unhappy woman—they went on a buying spree.

New Linotypes, presses, type fonts, and a multitude of the newest printing devices were purchased.

Student interest was kindled by a combination of the availability of the printing facilities and the creative urge to produce more student publications.

Technical journals or magazines came to light during the Thirties, all written and edited by the students.

ity of the student concerned to provide the Dean with a report of his grades on a printed form which is available at the Registrar's Office. Grades as posted by the instructor should be presented on this form to the Dean at the time the student presents his registration card for final approval in the process of registration.

H. L. HEATON  
Registrar

### DEPARTMENT OF PHYSICS

Laboratory assistants are needed for the Spring semester in the physics department. Men who have completed sophomore physics courses with superior records are wanted to assist with instruction, grading and the handling of apparatus in the laboratories. The scale of compensation is .60 per hour for new assistants and .70 per hour for experienced assistants. The opportunity for experience, as well as earnings, should be considered.

Applicants for assistantships are urged to call at the office of the department, sign up, and make tentative programs for assisting as far in advance of their registration as possible. The schedule of classes for the coming semester may be committed to the department.

J. G. Potter,  
Head, Physics Department

Since student publications and the college's job work did not take up all of the time, the college print shop started publishing bulletins for the junior colleges under the A&M College System. The Agriculture and Engineering experiment stations started sending work over to be printed.

In 1948 the fourth and last move came for the "going printing shop," when the A&M Press moved into the basement of Goodwin Hall, a former dormitory made over for offices.

New machinery was again the order of the day, until the print shop physical plant was valued at \$250,000, even before purchase of the new Miehle press.

Students started turning to the Press for jobs to help pay their way through college. At night, when the regular crew of workers leave, students come in and clean the machines, melt the scrap metal and sweep.

Students also take advantage of the college-owned print shop by getting down in the "back-shop" and doing lay-outs for their publications.

For them the shop is not a formidable array of Rube Goldberg inventions, but a working, almost living being, that is there to print their ideas for all to see.

Don't think you are too good a driver to have an accident.

Drive carefully—sacrifice a second for safety.

### Panel ---

(Continued from Page 1)

ment. Naturally, the holders of some offices are almost a cinch for the honor, if they qualify. For instance, the president of the Student Senate is usually elected to the honor.

Some of the stormiest sessions of the year are held by the Student Life Committee during its selection of those who will be chosen for Who's Who. Qualifications are studied closely and several ballots taken before anyone is finally chosen. The Committee always collects a list of each finalists' qualifications, activities and grade point average and studies each list carefully.

Last year a long-standing tradition was broken when five juniors were chosen for Who's Who. The custom had been to limit the number of Juniors to one or two.
