tion and has played the role well.

Not a delegate left the two-day meeting Saturday without expressing sincere appreciation of the facilities of the MSC and the hard work A&M students had done to make the convention run smoothly and efficiently.

The Texas Intercollegiate Students Association represents all of the major schools in Texas and many of the minor ones. One group is just as important to TISA as the other. And both send delegates which are the "cream of the crop" from their student bodies.

A&M made a definitely favorable impression on these student leaders. Aided by tremendous physical advantages of the Student Center, our convention-planners worked

Half-Full Buckets No Good to Ike

ONE QUESTION of potential significance is whether or not Gen. Eisenhower can establish a unified force capable of making a stand in Western Europe if the Russians march. Past experience and present facts make the chance seem rather small. For better or worse, the Atlantic Pace nations can be counted upon to give General Eisenhower all troops and equipment above that which will be required for home security.

England particularly is preparing first for the next battle of Britain. This is shown by her frantic rush to build high speed interceptors. These high performance ships can hardly cross the Channel-they weren't designed for defending Western Europe. Any British strategic bombing will probably be The Battalion was accused of false idealism done with borrowed B-29's.

the chance to fight another war. Their recovery power is remarkable, but the memories of the present generation are too strong to give way to new enthusiasm.

In other words any force that stops Russia on the continent will be composed largely of Americans. Congress is putting an overall limit on the troops available to General Eisenhower to distribute the burden of European defense, but this appears to be unfair

A &M has played host to the TISA conven- long and hard to make the convention a successful one.

> The credit goes where it is due. To Allen Eubank, Joe Fuller, and Charlie Royalty-A&M's officers in TISA—who directed plans for the convention in a manner which would befit a national party convention.

To Bill Cornish, Autrey Frederick, Duane Vandenberg, Bill Brabham, Bob Sturdivant, and Fuller-who so ably handled their committees. They were in charge of registration. housing, publicity, banquet, dance, and program plans, respectively.

Just for example, if you don't think it's quite a job to arrange accommodations for 250 delegates, talk to Autrey. He had problems

We're sure he'd like for us to give an editorial pat-on-the-back to a group of sophomores which aided his committee. These second-year men were indispensable in helping delegates find their rooms in the dormitories registration procedures.

Texas Western will have a tremendous about the national problems? Does the A&M student body don't envy their students the work, but we appreciate that labor.

It was a well-planned convention, one that Revolution, in a recent address. A&M can be proud of.

In a World Government we are completely at the mercy of the other members. In view of such trends a careful watch has been kept by the DAR National Defense committee on legislation proposed in the National Capitol and State Capitols. A treaty entered into by the United States has to be approved by the U. S. Senate, and it therefore cannot be changed without approval of that body. Nevertheless, Mr. Truman has again asked for artification of a treaty which he presented to the Senate from the United Nations, the Genocide Treaty, erroneously named and propagandized as humanitarian move. This treaty contains provisions which could nullify the protection of our constitutional rights and have us brought before a World Court for punishment.

The word "genocide" literally means: "the systematic extermin-ation of a racial or national group," but this meaning has been greatly distorted in the articles which the treaty contains. If you will read the articles of this treaty is will be discovered that it is an international al FEPC. The American Bar As-sociation has come out adamantly against these international treat-ies which jeopardize this United States. The word "genocide" literally over individuals in the hands of

Luke Short have so many times spoken, Scott is what Hollywood would call a "natural" for the parts he's been called upon to play.

Out of it all, he's acquired a following that cannot be ignor-ed. He's the marshal, the sher-iff, the red-blooded American cowboy, a walking "Home on the Range" to these people, He's also making money for the studio.

So why, therefore, has he been given this latest assignment—a task that most certainly will disappoint that happy clientele.

To get away from mincing words, "Sugarfoot" is almost a new low in moviemaking, even for westerns. Usually the western picture is not meant to be taken seriously. But "Sugarfoot" tries in spots to be downright dramatic, and fails mis-erably. When Hollywood turns out such products, coats them over

If we can't sell the Atlantic Pact nations on an all out effort, we should make the U. S. impregnable first. Any leftovers could be used in this hemisphere. Congress is right in principle, but the method is comparable to sending a fireman to a fire with only a half bucket of water.
