

Commie Proposal Causes UN Group To Call Recess

U.N. Advance Headquarters, Korea, July 25—AP—Communist delegates advanced an interesting new proposal on withdrawal of foreign troops from Korea at today's cease-fire talks, the U.N. command announced.

"The new proposal made by the Communist delegation," an official communique said, "was sufficiently interesting to cause the United Nations command delegation . . . to suggest an overnight recess in order to examine the matter in detail."

"Considerable progress" was made during the day's sessions, the U.N. said.

Nature Not Disclosed

The announcement did not disclose the precise nature of the Reds' new suggestion.

Up to today's meeting, Communist negotiators had insisted on listing withdrawal of foreign troops from Korea among subjects to be considered during armistice talks. U.N. delegates had been equally insistent that this was a political question to be considered at higher levels after a truce is actually accomplished.

Delegates met for nearly two hours in their ninth day at the cease-fire city of Kaesong, then scheduled another meeting for Thursday afternoon.

The U.N. announcement said: "The ninth meeting of the United Nations Command-Communist Armistice Negotiations today made considerable progress toward the formulation of an agenda."

First Progress Report

It was the first time a communique had reported "considerable progress."

Sessions were devoted entirely to the troop withdrawal question which had threatened to cause a breakdown in negotiations.

The new angle to the question was introduced by North Korean General Nam Il, head of the Commun-

ist delegation.

His suggestion was explored and amplified in discussions with Vice-Adm. C. Turner Joy, Chief of the U. N. delegation.

After this exploration the Allied team proposed the continuation until Thursday.

The full 53 minute morning session Wednesday, the U. N. announced, was devoted to satisfying Nam's interest troop withdrawal.

The Communist delegation was furnished "an extract in English of the statement in question," the announcement said. It did not say what the statement was.

Cotton Congress Opens Thursday

Cotton Exhibit Readied For Meeting in MSC

The program for the Twelfth Annual Cotton Research Congress will be divided into two parts when the three-day meeting begins on the campus tomorrow.

The first part of the program is in the form of an exhibit of usual items made from cotton and cottonseed products. This exhibit is divided into three categories, food, feed and fiber.

"Live" Exhibits

The second section of the program is classed as "live" exhibits where the actual work performed in cotton production will be shown to the delegates in a series of tours of the research fields and laboratories.

Under the direction of D. T. Killough, chairman of the exhibit committee and a member of the Texas Agricultural Experiment Station, the exhibits will be located in Rooms 2B, 2C, 2D and the Assembly Room of the MSC during the three-day meeting of the Congress.

An exhibit entitled "Cotton Insects" shows insects as a major threat to economical cotton production. Various types of cotton insects and methods of insect control are shown in the display.

Bollworm Control

The Texas Department of Agriculture has numerous exhibits on display for the delegates. One is an exhibit on "Pink Bollworm Control" which shows charts before and after insect control.

Exhibits on economics of mechanization of cotton production have been put on display by the department of Agricultural Economics and Sociology.

An enlarged picture showing how phosphated Hubam Clover doubled the cotton yield in Texas has been put on display for the delegates. The picture is of a field of cotton which shows cotton following phosphated Hubam Clover and a section of cotton following cotton.

Mesquite Control Display "Mesquite Control in the Texas Cotton Area" has been put on display by the Range and Forestry Department. The display in pictures shows the mechanical and chemical control of mesquite.

Showing cotton yarn, chemically modified by direct etherification so as to be soluble in water or alkaline solutions, an exhibit entitled "Water Soluble Cotton Yarn" has been presented by the Southern

Kiwanis Club Hears District Officer Speak

"True security cannot be found in paternal dependence upon someone else to provide for the future," said Edward Schreiber, Lt. Governor of Division Three, Texas-Oklahoma District of Kiwanis International at the weekly College Station Kiwanis luncheon in the MSC yesterday.

The speaker urged participation in government at all levels by Kiwanis members to achieve those aims the group as a "realistic organization of businessmen" believes to be in harmony with American tradition.

"Accept jury duties, discourage socialization, and advocate the removal of Communists from important positions in the United States," the speaker said.

Joe Motherall, past president of the Kiwanis Club, was presented a scroll from the national Kiwanis in recognition of his outstanding leadership during the past year. Schreiber made the presentation.

Regional Research Laboratory of New Orleans, La.

Other exhibits by the New Orleans laboratory are "Better Cotton Fabrics—New Loom Devices" and "Insect Proofing Cotton Bags."

Other Exhibits

Aside from the exhibits of usual items made from cotton and cottonseed products, the delegates will observe the "live" exhibits on tours conducted by Dr. R. D. Lewis, director of the Texas Agricultural Experiment Station.

Tours will be made of the Beasley Laboratory, the Cotton Genetics Field Laboratory, the Cottonseed By-Products Research Laboratory, the U. S. Department of Agriculture's Cotton Fiber and Spinning Laboratory, the Brazos River Valley Laboratory, and several commercial agencies in Bryan.

The Last Last Word

Pat Morley Takes Over Women's Editor Duties

By VIVIAN CASTLEBERRY
Battalion Women's Editor

Today another byline appears on "The Last Word," a column originated for women in the College Station area.

That byline reads "Pat Morley" and beginning today it will head many of the women's columns for The Battalion. It will replace entirely the byline you see at the top of this column.

In a way, this will be the hardest "30" we've ever written to a piece of copy for it will mark the close of our association with a group of the finest people we have come to know in the brief span of our "journalism career."

Each day at our "Women's Editor" desk has been a new challenge and a new responsibility. In a way this job has been our baby. We did not originate it and we were not the first women's editor, but we were the first full-time woman employee on The Battalion.

As such we have tried to serve as a link of information from the reading public to the Battalion staff. We have tried to fulfill our job as writer and editor for women. At the same time we have tried to be a friend of the wonderful guys with whom it has been our pleasure to associate.

It's been a whale of a job, but for every ounce of energy expended there has been a double portion of rewards. It has been a good year.

But our primary purpose in this last column is not to dwell at length over the joys and sorrows of editorship. It is instead, to introduce whatever readership it has been our good fortune to acquire

Boyett Gets Council Post; Budget Approved

By FRANK DAVIS
Battalion City Editor

A. P. Boyett was sworn into office as councilman for Ward III by Mayor Ernest Langford last night at the City Hall after being declared winner in a special election also held yesterday.

The College Station council met in called session to canvass the election returns, and announced the official results as 16 votes for Boyett and 12 write-in votes for W. H. Freiberger, who had not filed for the post.

Boyett arrived at City Hall at 8 p. m. and was asked by the mayor to repeat the oath of office.

In substance the oath enjoined the new councilman to faithfully execute his duties to the best of his ability, and to serve and protect the constitution and laws of his state and nation.

Residing at 315 North Boyett, the new councilman is the owner of the Campus Theater. He has three children, George Boyett, 16, who is a junior at Stephen F. Austin High School in Bryan; Alton Boyett Jr., 24; and William Charles Boyett, 28.

Boyett Street in the North Gate area was named after the councilman's father, W. C. Boyett, who was formerly U. S. Postmaster in College Station and a member of the A&M Board of Directors.

Neighbors Insisted

Boyett's neighbors insisted that he file for the Ward III position. He said he planned to work toward a "bigger and better city."

The other councilman for Ward III is W. D. Fitch, 329 First Street.

Ward III includes all the North Gate area plus residents of College Station living on the A&M campus.

Boyett will serve the remainder of the term of E. E. Ames, who automatically vacated his position when he moved to Woodland Estates. The term expires in April of 1952.

Council members present at the special session were R. B. "Bob" Halpin, councilman for Ward II; Harry Boyer, Ward II; Fitch, and Howard Badgett, Councilman for Ward I. Joe Orr, councilman for Ward I and J. W. Barger, city attorney, were absent.

Raymond Rogers, city manager; Nester McGinnis, city secretary; and Rex Boswell, assistant city secretary were also present at the meeting.

Four persons were present when Boyett took the oath of office who had come for the public hearing of the city budget for 1951-52. They were F. L. Thomas, 663 Walnut Drive; F. B. Clark, 209 East Dexter; D. B. Cofer, 110 Pershing; and C. R. Rainwater, 304 Highland.

The College Station budget for 1951-52, after a public hearing last night, was passed without changes at a special meeting of the city council.

Mayor Ernest Langford summed up accomplishments of the city during the fiscal year which ended June 30, and briefly read through the budget summary for the coming year. The mayor was open to questions from citizens attending the meeting at all times during the proceedings.

"The best money the city has spent during its 10 years of existence was the purchase of the REA lines six months ago," Langford said.

In the electric fund, one of the three principal city funds, an increase of \$25,175 is expected in comparison with an increase in expenses of \$9,636.33.

The total purchase cost for the REA lines was estimated at \$33,000; however, auxiliary lines to be built in several areas will bring the entire cost for city ownership of electric lines to around \$50,000.

College Station will finance the measure by the sale of part of the \$200,000 bonds authorized by citizens in a recent election.

Electricity Rates Electric rates paid by the city at the present time are one cent per kilowatt hour for Bryan power which is used in College Hills and the North Gate area.

The city supplies the city electricity to Oakwood, Knoll, and College Park sections at the rate of 1.1 cents per kilowatt hour.

Total expenditures for the coming year are expected to be \$167,146 as against \$176,249 in revenues.

The city has three main funds—the general fund, electric fund, and water and sewer fund. In addition to this there is a cemetery fund which is separated from the other funds for bookkeeping purposes.

Revenues and expenditures for the general fund and water and sewer fund fail to cancel out, and consequently the electric fund must make up the deficit.

Total revenues for the general fund are expected to reach \$44,785; the expenditures, however, are approximated at \$66,289.34.

The mayor was asked to explain the items collectively totaling \$3,309 listed under miscellaneous.

The items include \$400 to city library, \$550 to cover expenses of the charter commission which is engaged in preparing a charter to make College Station a Home Rule municipality, \$300 for travel by city officials to municipal meetings, \$1,059 for insurance and bonds, and \$600 to parks and playgrounds.

The biggest single item in the general fund is \$13,300 expected to be spent by the Street Department. Eleven thousand, one hundred and thirteen dollars will go to the Health Department. Administrative cost are anticipated to reach \$8,823.34.

Electric Fund Expenses Expenditures for the electric fund are set at \$49,121.34 against \$80,263 in revenues. Last year revenues for the electric fund reached \$55,088 as compared with \$39,485.01 in expenditures.

The water and sewer fund will go slightly in the red with \$49,900 expected revenues against \$50,681 in expenditures. Last year the fund spent \$45,266.23 and took in \$47,029.24.

The cemetery fund is expected to spend \$1,051 and collect \$1,301. This is a decrease from last year amounts totaling \$1,658.23, expenditures and \$1,826.72, revenues.

For a comparative picture College Station will spend \$19,899.3 more than last year and will collect \$19,930.07 over last year's record.

Consolidated Lists Transfer Students

Approximately 50 pupils have transferred to the A&M Consolidated Independent School District from other districts, according to School Superintendent L. S. Richardson.

The deadline for transferring students from other school districts is July 31, said the superintendent.

There is no tuition for those who transfer before the legal deadline Tuesday, Richardson said. He urged all parents who intend to transfer children to the A&M Consolidated District to do so before that time.

City Clean-Up Drive Scheduled July 30

A community-wide clean-up campaign has been scheduled for College Station July 30.

The city of College Station and the College Station Development Association and Chamber of Commerce are jointly sponsoring the drive to stamp out unsanitary conditions and dirty spots within the city.

No house-to-house inspection is planned for the drive, but, according to J. B. Baty, chairman of the Chamber of Commerce's Public Health Committee, an effort will be made to reach each citizen of College Station to call upon him to voluntarily aid the drive.

Trucks Available

Trucks will be available for carrying off trash and debris from the residential areas and plans have been made to operate control measures for mosquitoes and other germ-carrying pests.

"The good health record of this community is fortunate," says Baty, "for there has not been a single case of polio in College Station this summer as compared to several listed here last year at this time."

"Both the City of College Station and A&M College have year-round disease prevention programs which in most cases are responsible for the good showing College Station has made by having few communicable diseases.

Should Reach Every Home

"This clean-up drive will be an effort to reach into every home so that residents may rid their premises of conditions that may be conducive to breeding germs or germ-carrying insects," the Health Committee chairman said.

All summer the city has kept its mowing machines busy cutting grass and weeds on vacant private lots as well as on city property in an effort to keep clean, neat city streets.

MSC Shows Films In Fountain Room

Each day at the noon lunch hour and again in the evening at supper, the MSC is showing short movies and cartoons to the patrons of the Fountain Room.

The film subjects vary from Aggie football games to manufacturing and industrial public relations films. Travelogues and cartoons are also included on the daily programs.

These films are free and are provided for entertainment of the patrons by the MSC.

They grow 'em big in Texas, as a worried supply sergeant discovers at Signal Corps ROTC Summer camp at Fort Monmouth, N. J. Wondering whether pants are ten sizes too small or only eight is six-foot-six Cadet Gary S. Neipast of Sweetwater, an A&M student. Pondering whether he'll have to slice up a tent in order to fit him is Sgt. Clarence D. Russell of Columbus, Ohio. Thirteen hundred undergraduates from 73 colleges are attending the Summer session at Fort Monmouth.
