

## Kaesong Talks Resumed; Little Progress Noted

U.N. Advance Headquarters, Korea, Aug. 10—(AP)—Truce delegates resumed negotiations today but failed to make any progress on where to establish a dividing line between opposing forces in Korea. The meeting in Kaesong was the first in six days and the longest uninterrupted session since talks began a month ago.

### Four Hour Talk

They talked across the green-topped conference table for four hours and 12 minutes, without a break.

Despite the length of the session, a U.N. spokesman said they "still made no progress."

They met again tomorrow at 11 a.m. (8 p.m. EST, Friday).

The ten envoys—five Communist generals and five high ranking United Nations officers—appeared almost jovial when they entered the conference room for the first time since last Saturday. Negotiations resumed right where they left off when the U.N. command canceled meetings in protest against a Red violation of the Kaesong neutrality zone.

The Communists apparently were adamant in their insistence for a buffer zone created along the 38th parallel, old political boundary line between North and South Korea. The U.N. command says it wants the zone based on present battle lines. The front lies mostly north of the parallel, extending 35 miles north on the East Coast.

The Allied delegation held a hushed 15-minute discussion in the U.N. tent before Friday's session began. Delegates marched out smiling and laughing.

They entered the conference room a few seconds before North Korean Gen. Nam Il led in the Communist negotiators. The poker-faced Nam seemed almost happy before the meeting.

The delegation entered, as usual, through separate doors.

The U.N. party flying to the 20th session in Kaesong in Communist Jeeps—four are Russian type and one captured American model. Lacking their own transportation, newsmen were unable to visit the spot three-quarters of a mile from the conference building where Chinese troops had a tent area last Saturday.

From a helicopter they spotted two unarmed guards in the area, one dozing in his undershirt. No remains of the camp were visible.

Only the usual unarmed "reception personnel" were seen around the conference building itself.

Friday's long session was the tenth devoted to the question of where to end the shooting in Korea and create a buffer zone between opposing armies.

## Motheral Aids Land Tenure Plan

Joe R. Motheral of the Agricultural Economics and Rural Sociology Department, A&M, was one of seven visiting experts who helped the University of Wisconsin plan the World Conference on Land Tenure Problems.

The conference will be held in Madison Oct. 7-Nov. 10. Its purpose is to encourage improvement in land tenure systems throughout the world by giving technicians and professional leaders from 50 nations a chance to meet and exchange ideas.

## Journalism Head To Attend Meet

Donald D. Burchard, head of the Journalism Department at A&M, will attend the annual joint convention of the Association for Education in Journalism and the American Society of Journalism of School Administrators at the University of Illinois Aug. 27, 28, and 29.

Burchard is vice-president of the Association for Education in Journalism and Journalism Education at A&M, which is a member of the American Society of Journalism of School Administrators.

During the three-day convention Burchard will be in charge of the Administrator's program on Monday afternoon, Aug. 27.

Two hundred men are expected to attend the convention's program which will be conducted by outstanding journalists of the United States.

Burchard will also attend the executive committee meeting on Aug. 26 before the convention gets underway the following day.

## Heat Breaks 100 Fourteenth Consecutive Day in CS Area

College Station had its fourteenth consecutive day of 100-plus temperatures as the CAA weather station recorded a high of 102 for Thursday. Minimum recorded about daylight yesterday was 76.

Winds that sprang up late Tuesday, but abated somewhat last night were averaging about 12-15 miles per hour with gusts up to 22 mph, the station reported.

The outlook for the next few days is the same—continued hot with little change in temperatures although the forecaster said it was likely the extended heat wave would begin breaking over the weekend.

A cool front that is affecting Northern Texas will not be felt here the forecaster said, because of the strong winds from the South and Southeast.

### By Associated Press

A wind, sand, and rainstorm struck Midland in West Texas about 5:20 p. m. Thursday. There was damage to trees and signs, and some damage to property.

The rain, and cooling temperatures continued at Midland into the night.

Clouds, a cool breeze, sand and a few drops of rain struck Electrica (near Wichita Falls) about the same time, bringing relief from nine days of blazing heat.

Wichita Falls also felt a cool north wind. Welcome word came from the U. S. Weather Bureau: relief from 100-breaking temperatures is in sight for most of North Texas.

### Cool Front

The cause: a weak, diffused cool front moving in from the North. In North Texas week-end temperatures were expected to be in the low and middle nineties.

But a warning: at best, the relief will be temporary. There'll be plenty more hot days before the summer is over, said a weather bureau forecaster.

He said the slow-moving cool front should consolidate in the Panhandle-Wichita Falls area Thursday night and move to the Dallas-Fort Worth area Friday night and Saturday.

### Midland Storm

The storm at Midland started with sand blowing in from the Northwest. It cut visibility to 200 feet. For about an hour a wind estimated at above gale strength littered streets and the courthouse lawn with tree limbs; tore at signs; blew down scaffolding at some buildings under construction. A hole was knocked in a building roof.

In a short time Midland had 1.2 inches of rain, with the fall continuing as the storm moved South, Southeast. Rain fell at Wichita Falls and a late temperature reading there was 75 degrees. Some break in the heat wave had come. But Texas had plenty of high temperatures Thursday—more heat of the sort which has caused at least 17 deaths over the state. In four other deaths heat was listed as a contributing cause. Dallas had its tenth straight day of 100 or better temperatures—one day short of a record of 11 days set in 1925. The Dallas maximum Thursday was 102. The highest in its run was 107 Aug. 7.

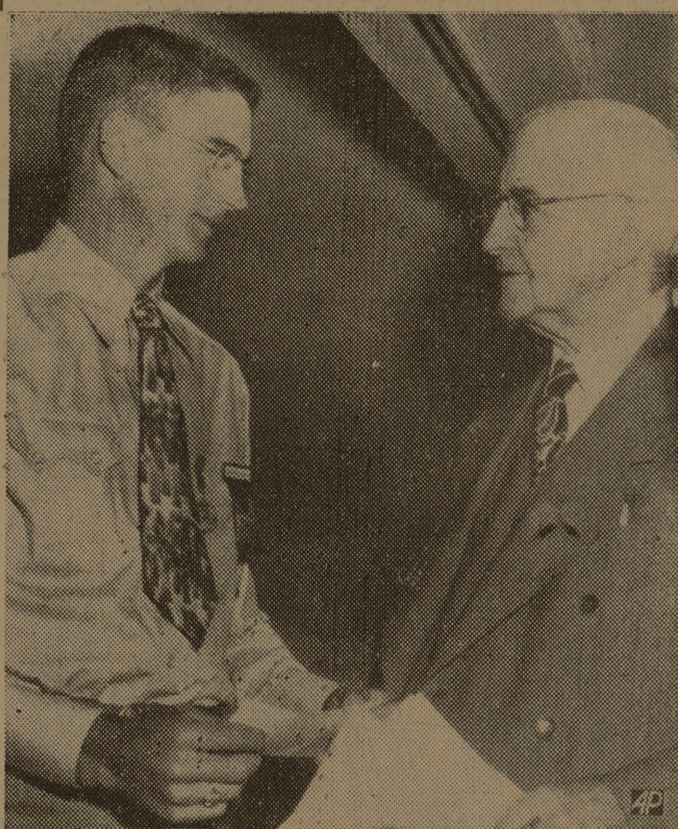

### Rain at Childress

Rain fell Thursday too at Childress, in the Panhandle, bringing temperatures down to an afternoon reading of 78.

Showers cooled Wichita Falls down fast to a 75 after a high of 102 degrees but rose again to hit 81 by 8:30 p. m. There were showers at Big Spring, and north of Abilene, too.

The forecast called for continued high temperatures, except: scattered showers and not so warm in the extreme North part of East Texas, and in the South Plains. Scattered thundershowers were (See THUNDERSHOWERS, pg. 4)

## Top FFA Member

Garland L. Carroll of Cleburne received a special \$250 award from Jesse Jones in Houston after Carroll was named Lone Star Farmer at the state convention of the Future Farmers of America. The 17-year-old Carroll was selected as top man among the 33,000 FFA members in Texas.

## Freshman Week Activities Get Underway September 7

By C. T. HUDSON, JR.  
Battalion News Staff

Approximately 1500 Freshmen are expected to enter A&M Freshman Week, according to Dr. John R. Bertrand, dean of the Basic Division.

The new students will begin their stay here Friday, Sept. 7 at 8 a. m. by obtaining room assignments at the housing desk in Sbisas Hall Annex and Drawing their uniforms at the clothing warehouse.

### Refreshments Served

Refreshments, sponsored by the YMCA, will be served in Sbisas at 10 a. m. Saturday, Sept. 8, for the new students, their parents and friends and members of the faculty. All meals will be served in Sbisas for students and parents. A general assembly will be held at the Grove at 7 p. m. for the new freshmen with C. H. Ransdell, assistant dean of the Basic Division, presiding. A program of introductory speeches, introductions, announcements, and Aggie Songs will be featured.

A series of tests will be held in Duncan Hall beginning at 7:30 a. m. and 1:15 p. m. respectively, on the second day of Freshman Week, Saturday, with any off time being devoted to the drawing of uniforms at the clothing warehouse.

### Cashion to Preside

M. L. Cashion, general secretary of the YMCA will preside over the General Assembly at the Grove at 7 p. m. at which time in introduction of local ministers will be made.

All students will be urged to attend the church of his choice Sunday. A directory of local churches

will be posted on the bulletin board in each dormitory. Sunday afternoon at 3 p. m. the MSC will hold open house with refreshments in the Ballroom, sponsored by the House Committee of the MSC for new students.

Col. J. E. Davis, Commandant, will deliver a speech on "The A&M Cadet" from 8 a. m. to 9:50 a. m. at the general assembly in Guion Hall on Monday, Sept. 10.

The remainder of the day, until 5:30 p. m. will be spent at unit meetings presided over by counselors and company commanders. In these meetings the new students will be told of Aggie traditions, cadet counsel relationship, college regulations, and conduct of the campus.

### Welcome Address

A welcoming address will be given by Dr. M. T. Harrington, president of the college, and an introduction of the executive committee will be made at The Grove general assembly at 7 p. m. Music and other entertainment will also be presented by Walter Jenkins, choir director at the First Methodist Church of Houston.

General assembly will be held in Guion Hall from 8 to 10 a. m. Tuesday, Sept. 11, with an address on "Opportunities in Agriculture" given by C. N. Shepardson, dean of Agriculture, and "Opportunities in Veterinary Medicine," given by Dr. I. B. Boughton, dean of the School of Veterinary Medicine. Individual conferences will be

## Chicago Firm Aids Experiment Work

A check for \$2,500 has been received by the Texas Agricultural Experiment Station from the Calcium Carbonate Company of Chicago. The money will be used in evaluating special electro calcium carbonate as a diluent for insecticides.

"These investigations are to be conducted under the direction of C. F. Rainwater during the fiscal year beginning July 1, 1951," Dr. R. D. Lewis, director of the TAES, says.

## Aggie Debate Club Sets Tournament Plans

The Aggie Discussion and Debate Club directors would like to contact any student interested in debating—particularly the incoming freshmen.

The current debate organization was formed in 1946 under the sponsorship of the A&M Department of English, and was directed by Karl Elmquist. Current directors are associate professors Harrison Hieth and Lee Martin.

### Defeated West Point

Aggie debaters have defeated West Point teams three years, in 1948, '49, '50. Veteran debaters who will return this year are Dan Davis of Lubbock and James Farmer of College Station. These two students are seniors with four years debating experience.

Last year the 1950 team won the University of Houston Debate Tournament. Farmer and Davis were judged superior debators at

## Group Seeks Method To Keep Health Unit

## Herdsmen's Course Begins on Campus With 128 Attending

By ALLEN PENGELLY  
Battalion News Staff

Final attendance records for the 1951 Texas Herdman's short course showed that 128 cattlemen registered for the three day conference which began here yesterday morning at the Beef Cattle Center.

The opening day ceremonies began with a welcome by Dr. Charles N. Shepardson, dean of the School of Agriculture. Following Dean Shepardson was

Dr. J. C. Miller, head of the Animal Husbandry Department, who lectured on "The Responsibilities of Purebred Breeders."

W. D. Roberts, manager of Flat Top Ranch, Walnut Springs, led a discussion on "The Selection of Cattle for Breeding Purposes." "Rules and Regulations for Registration and Transfer of Cattle" was the topic of Harry Gayden, executive secretary of the American Brahman Breeders Association.

Comments on Gayden's speech were voiced by Milton Miller, southwestern representative of the American Aberdeen-Angus Association, and W. J. Largent, a Hereford cattleman from Merkle.

After the noon-day break, John K. Riggs associate professor in the Animal Husbandry Department, lecturer to the students on the value and procedure of keeping herd records.

### Breeding Problems

A discussion concerning the "Breeding Problems and Difficulties" was conducted by R. O. Berry, a professor in the Animal Husbandry Department. Another discussion, "Management of a Breeding Herd" was led by W. B. Roberts.

Yesterday's activities were completed when J. H. Jones, professor in the Animal Husbandry Department, gave a talk on "The Feeding of Young Breeding Cattle for Proper Development."

School began this morning with a lecture by Edgar A. Hudgins, a Brahman cattleman from Hangerford, whose topic was, "Feeding Breed Cattle for Show and Sale." Milton Miller followed Hudgins' lecture with a discussion on "The Selection of Show Prospects."

This afternoon, Miller and Tony Steward, secretary of the Texas Angus Association described the proper methods of clipping cattle for show purposes.

### Hoof Trimming

Along that same topic, Albert Blankenship, college herdsman, and Arthur L. Gee, former college herdsman, demonstrated the proper methods of hoof trimming for show purposes.

Tonight, beginning at 8 p. m., a movie illustrating the raising and breeding of Brahman cattle in Brazil will be shown at Guion Hall. The public is invited to attend this free movie.

The film is shown through the cooperation of the Animal Husbandry Department and the A&M Latin American Society.

## Women Schedule Convention Here

Students of A&M will experience an unfamiliar sight when the Texas Home Demonstrators Association meets on the campus the last week in August.

Three thousand women will be on the campus to celebrate the Association's 25th anniversary.

The Association was formed in 1926 when the club women were attending a farmers short course at A&M with their husbands.

Mrs. F. H. Marks of Jacksboro was the first president of the organization. Mrs. R. M. Almanrode of Munday is now the organization's president, and was also one of the women at the first meeting on the campus in 1926.

Through the practical education of the housewife, the Association has done much to improve the agricultural conditions of Texas.

## At the Grove This Weekend

Fri., August 10—Dance, Music by Aggeland Combo—8 p.m.

Sat., Aug. 11—Square Dancing—8 p.m.

Sunday, Aug. 12—Skating—8 p.m.

Mon., Aug. 13—Movie, "Three Guys Named Mike," with Van Johnson—8 p.m.

By FRANK DAVIS  
Battalion City Editor

The Brazos County Health Unit, which has been in a precarious position since last Friday, received a much needed shot-in-the-arm yesterday at a special committee meeting held at Bryan City Hall.

Dr. H. W. Barlow, dean of the School of Engineering and an ex officio member of the governing body for the health unit, said there was a better than even chance that the state will match on a 40-60 percentage basis, funds used by the college mosquito and fly control.

"The money which the college spends on such projects is as eligible to be matched as the money which the city spends on similar projects," Barlow asserted. At the present time, the college spends \$14,270 a year for mosquito and fly control. If the state will match this, the health unit will receive almost \$10,000 additional money.

### Appointed Wednesday

The committee was appointed Wednesday by Dr. A. G. McGill, chairman of the governing body for the health unit to meet with representatives from College Station, Bryan, A&M, and Brazos County to devise a "more equitable" prorating of funds for the unit. After a stalemate, however, the group decided to explore the suggestion made by Dean Barlow.

Accordingly a second committee composed of Barlow, George E. Adams, Bryan mayor; H. A. Tomason, Bryan city manager; and Dr. David E. Brown was appointed to fully examine the possibilities of the state matching state funds. The group will journey to Austin Monday to meet with George E. Cox, state health officer.

Another boost which the health unit received was the unexpected support which the organization received from local doctors. Wednesday a formal protest, signed by 13 doctors was issued against the City of Bryan's slash in operating funds for the unit.

### Doctors Protest

In a letter to Mayor Adams, the doctors said: "We, the following physicians of Brazos county, wish to inform you that we feel that cutting the health department funds was unwise and to the detriment of public welfare. We recommend to you that the funds for this unit be restored."

The letter was signed by the following doctors: Joseph W. Gephert, R. Henry Harrison, C. M. Cole, R. H. Benbow, Nena A. Harris, R. B. Grant, Jr., Joseph M. Cox, L. D. Stuart, S. C. Richardson, T. T. Walton, Wari H. Kirk, T. O. Walton, Jr., and J. W. Marsh, Jr.

At the committee meeting yesterday, Mayor Adams made a suggestion that the city might increase meat inspection fees; thus increasing the amount of money which the state could match. Presently the inspection fee is 50 cents per head.

"If the meat inspection fee were increased to 75 cents per head, approximately \$1,000 would be added to the city budget, 40 percent of which could be matched by the state for the health unit," Adams said.

County Judge A. S. Ware said that \$5,630 was the limit that the county could contribute to the health unit. He pointed out that the money had to come from the more important passages.

(See HEALTH UNIT, Page 4)

## Brazil Movie To Feature Plantation

A movie picturing a Brazilian cattle, cotton, and coffee plantation will be shown tonight at 8 p.m. in the Guion Hall.

The film, sponsored by the Animal Husbandry Department and the A&M Latin American Society, will be used in connection with the three-day Texas Herdman's short course.

The ranch and plantation called Paradise, located at Bauru, Sao Paulo, Brazil, is owned by Olavo Ferraz. His ranch is the object of visiting American cattlemen because of his prize-winning herd of Nelore cattle, a particular breed of Brahman livestock.

It was at Paradise that Vice-Chancellor for Agriculture D. W. Williams conducted a tour in September, 1949.

The film is narrated in Portuguese, however Dr. J. C. Miller, head of the Animal Husbandry Department, and a member of the Latin American society will translate the more important passages.

## Williams Leaves to Assist Bureau of Mines Program

E. L. Williams, vice director of the Engineering Extension Service of the A&M System, has been given a leave to assist the Bureau of Mines, Washington, D. C., in the reorganization of its education-

al program. He will be in Washington during August.

He will conduct and supervise training programs for the Bureau's instructors in the eight regional fields throughout the year, following approval of the program as worked out in Washington. He will also give the Bureau's coal mine inspectors instructions on how to present their safety recommendations to their operators.

Williams, a nationally known authority on vocational industrial education, presented methods and a program of teaching safety education at a meeting at the Bureau's Region meet held in Dallas Aug. 1-4. At that time the Bureau gave a review of the various courses for the mining industry. He was asked to come to Washington to assist in the reorganization program.

The Texas Engineering Extension Service conducted the first training conference for the south-west region of the Bureau of Mines in 1945. Conference were held in 1946 and in 1949.

J. J. Forbes, chief of the Health and Safety Division, has asked that this training program be offered to all eight regions. Thomas H. Miller is administrative director of the Bureau of Mines.

E. L. Williams  
To Assist Mines Bureau
