

Town Hall Sells All Tickets By 2:30 Yesterday

All but three of the 1,774 Town Hall non-students tickets were sold out early, Thursday morning at Guion Hall.

First to lead off in the line, unexpectedly though, was Pete Hardesty, business manager of student activities, who spent the night in his car.

The most outstanding person in the line was Michael McGuire 14, son of Mr. and Mrs. J. P. McGuire, 113 Langford. Mrs. McGuire said "Mike was real 'chipper' after his night out and was to school on time." The seats are in the eleventh row.

The last three tickets were sold to Mr. S. S. Floeck at 2:30 p. m. Thursday.

C. G. (Spike) White said there were more than 200 students that bought tickets this year than there were last year.

The box office will not be opened at any Town Hall performances. "Town Hall Staff did a bang up job in the ticket sell," said Spike.

LET'S GO RODEO

STARTS TONIGHT—The 31st annual All-Aggie Rodeo starts at 8 p. m. tonight in Aggie Rodeo Arena. Sponsored by the Saddle and Sirlin Club, the western show also will be presented at 2 p. m. Saturday. Tickets are on sale in the Student Activities Office, or at the gate.

Freshmen qualifiers in the 300-foot medley relay are: Company C, Company H, Squadron 20, 22, 18.

Langford Picks Head Of Architect Chapter

Ernest Langford, head of the Department of Architecture at A&M, has announced the formation of a local chapter of the American Institute of Architects.

Chartered as the Brazos Chapter of the AIA, effective July 1, 1952, the group will hold installation ceremonies for officers Nov. 13. Langford will serve as president and Wm. E. Nash, Bryan architect, as secretary, until the annual meeting in December.

AIA Director for Texas, Edward L. Wilson of Fort Worth, and Herbert M. Tatum of Dallas, president of the Texas Society of Architects, will be present for installation ceremonies. Langford said the Brazos Chapter hopes representatives from other Texas chapters also will attend.

The AIA was founded in 1857 and is the professional organization representing practicing architects in the U. S. About 19,200

architects are registered in the country, with 14,000 practicing in their own names. Approximately 9,000 are AIA members.

Charter members of the Brazos Chapter are Langford, Nash, W. W. Caudill, research architect for the Texas Engineering Experiment Station, Arch C. Baker, A&M architect and Henry D. Mayfield.

One of the immediate objectives of the local chapter will be furthering the cause of architectural education, Langford said, and an attempt will be made to interest all students registered in the Department of Architecture.

Langford said an opportunity will be given draftsmen and students to associate themselves with the local chapter. Other Texas chapters are located in Austin, Dallas, El Paso, Fort Worth, Houston, Brownsville, Corpus Christi, Amarillo and San Antonio.

Their wages work for the community, too!

Telephone people are important three ways to the community in which they live.

They provide a valuable service that speeds business and social affairs, guards the health and security of the community, day and night. They take part in many local activities—welfare and youth work, civic and service clubs. And in addition to all this, they contribute to the prosperity of the community itself.

Few things give you, so MUCH for so little as your telephone

For most telephone people live—and spend their money—in and near the places where they work. This money goes to local stores and service stations—to local plumbers, carpenters and painters—pays taxes, buys eggs and cheese and clothes and furniture, and all the other things needed for living.

On the job and off it, telephone people are good people to have around.
