WEDNESDAY, OCTOBER 22, 1952 THE BATTALION

Students Need to Think For Themselves--To Live

THE GREAT philosopher John Dewey insisted that human beings learn to live by living. This has vitally affected education and its contribution to a society that recognizes the worth and dignity of the individual.

Here at A&M we follow Dewey in knowing "School is life." Yet many students who are the life and the school know little of its operation.

Many are content to move with the crowd, from class to class, day by day, weekend to weekend, never stopping and giving life or school a critical analysis.

Realizing that extracurricular activity is one of the best ways of putting students in demanding situations, this college has built one of the most complete student activity programs in the world.

But the student activity program requires life; it requires students. Whenever the programs are taken from the students or

when the students are discouraged from acting like individuals, the possibility of thought and personality development are killed, and school is no longer life.

Students should roam their campus and seek the information they desire and not be in a market study program out-guided constantly by the wise old heads who lined by Swift & Co. To accept know best. Too often, students accept as final word advice and ideas from seemingly of livestock and meats in Chicago experienced counselors, thus squelching their from 9 a. m. Dec. 7 to 3 p. m. chance for responsibility and decision.

All activities on the campus should revolve around the students with the source of employed by meat packing busipower supplied by them. One does not learn nesses in marketing meats, poulto live by sitting constantly at a desk read-Swift & Co. suggests the essay ing, nor does one learn to live by always cover distribution of all these prowatching photoplays.

Inspection of facilities placed here for their education and enjoyment will help students gain a better understanding of life and learn by a person or group from A&M, to live. And without life, there can be no and all of them must be turned in school or students.

To Ag Students The annual Swift Essay Contest is in full swing again, and all undergraduate students enrolled in agriculture at state agricultural colleges

Contest Open

Swift Essay

are eligible. One winning essay will be chosen from those entered at each college, and that contestant will receive expense money for a trip to Chicago so he may attend the

International Livestock Exposition. The winner also will participate the award, the winner must participate in the entire market study Dec. 10.

To enter this contest, a student must prepare an essay on methods

ducts as a group and recommends that the essay contain about 1500 words.

The essays here will be judged to Dr. W. G. Kammlade, Jr. before Nov. 1, 1952.

Voters' Choice: Tax or Donation? Joins Bank Staff

FROM THE CITY DESK

By HARRI BAKER **Battalion City Editor**

College Station has an enviable juvenile delinquency record. For a city of some 4500 people, an almost complete lack of malicious mischief on the part of the young people is just short of amazing.

Credit for this can be given to the Recreation Council. Similar cities which do not have a planned recreation program 1926. have had serious delinquency problems.

In Corpus Christi, reports show the number of police calls were cut by 80 per cent after a community recreation program was started.

The Recreation Council has operated for nine years on voluntary funds, growing in scope all the time. They now have come to the point where they feel an assured source of money is necessary. Although organizations such as the Community Chest, the Chamber of Commerce, and the City Council have been generous with contributions, fees must be charged for certain activities. Council have been generous with contributions, fees must be charged for certain activities.

If for any reason donations from these sources were cut, the fees would have to be raised, which would force a lot of people to stop participating in the program.

Amendment Would Give Support

The council has drawn up a pro- imum of \$1,250 and a maximum of posal amendment to the city char- \$2,500.

Petition Needs 150 Names

To amend the city charter, the authors of the amendment must present to the City Council a petition signed by 10 per cent of the qualified voters of the city.

As College Station has about 1500 qualified voters, the council would need 150 signatures on the petition.

After the petition is filed with the City Council a special election must be called, if no regular election is scheduled for not less than 60 nor more than 120 days after

the petition is submitted. All voters of the city will be given a chance to vote on the amendment in this election. If a majority of the voters are in favor of the amendment, it be-

comes a part of the city law. If the special election is scheduled, a copy of the proposed amendment will be sent to all registered voters of the city at least 30 days before the election. A special citizens committee of

the Recreation Council, headed by Dean Howard Barlow, is circulating the petition

Vance, Pet E Dept. Head

petroleum engineering department at A&M, joined the staff of the Second National Bank of Houston on a part time r basis Oct. 15, as head of the oil and gas division.

The 53-year old petroleum en-gineer was born in Geneva, Indiana; and has lived in Texas since

After he was graduated from the University of California in 1923, Vance spent 1½ years as a geologist with United Oil Co. in Los Angeles and 1½ years with the U. S. Bureau of Mines in Casper, Wyoming, before coming to Texas.

He went through the early oil eum engineer. He moved to Midland in 1929 as division superinten dent of Continental Oil Co., suc cessor to Marland Oil Co.

Since 1931, Vance has been a consulting engineer and independent operator, first in Karo and since 1934, at College Statio ter, which would put them on a tax-supported basis. Under pro-visions of the amendment a tax partment of A&M.

Vance has held official positions in a number of technical associations and societies. He is the author of many technical papers.

An active member of American Petroleum Institute, American Institute of Mining and Metallurgical Engineers, American Association of Petroleum Geologists, Am-erican Society of Mechanical En-gineers and Texas Independent Producers and Royalty Owners, Vance is the author of "Petroleum Subsurface Engineering" and co-author, with E. DeGolyer, of "Bibliography of the Petroleum Industry

He is a graduate of Houston Law School, receiving an L. L. B. degree in 1939.
