THE BATTALION

THURSDAY, OCTOBER 30, 1952

With Open Minds, Hear Shivers Speak

TEXAS GOVERNOR Allan Shivers speaks in Bryan and College Station tomorrow as he continues his vigorous campaign tour for Gen. Dwight D. Eisenhower, Republican presidential nominee.

We would encourage students to hear one or both of these talks Friday by Gov. Shivers. Voters must be familiar with the issues at stake in both campaigns. Whether they are Eisenhower supporters or followers of Stevenson, a good open mind always helps us to see things that could have been unclear before.

Too many people like to come to a conclusion before they know all the facts and absent themselves from any further hearing of the opposing view. You may find logical fallacies in such a political talk as Gov. Shivers will make, but if you do, it will further illustrate your ability to think clearly and to

see issues in a light other than the warped way many politicians present them.

The text of Gov. Shivers talk has not been revealed, but we rather imagine he will be campaigning "against Trumanism", an issue he has taken over most of Texas already. If you follow his fight to replace "Trumanism" in the government, listen and see if your ideas and beliefs are confirmed through the speech.

Lyndon Johnson, Texas junior senator, has already visited Bryan to speak in behalf of Democratic nominee Adlai Stevenson. Let's take this opportunity to hear the opposition's voice, to use his words as a weight system of checks and balances for each candidate.

Hear Gov. Shivers' speech Friday, it will be helpful to you whether you are for the Democratic or Republican nominee.

Job Interviews

Interviews

Oct. 31—The International Business Machines Co. will interview January graduates at all degree levels that major in business administration, accounting, mechanical, electrical, industrial and petroleum engineering, physics, math and industrial education. They need business administration and accounting majors, and also engineers with an interest in sales, for work in their Sales Department. Physics, math, industrial, mechanical, electrical, petroleum engineering and industrial education majors will be interviewed for work in research and development and applied sciences. They will interview mechanical and electrical engineers for customer engineering work also.

Nov. 3—Boeing Airplane Company of Seattle, Washington, is interested in talking with aeronautical, mechanical, electrical and industrial engineering January graduates, as well as math and physics majors at advanced degree levels. Positions are available in Design, Development, Research and Production Engineering at either their Seattle or Wichita Divisions. The positions involve work on Jet & Piston-Powered Aircraft, Guided Missiles, Gas Turbines, Analog Computers, Industrial Controls, etc.

Draft Test Deadline Planned Nov. 1

Deadline for applications to take the December draft college qualification test is Nov. 1, said Lt. Col. Morris S. Schwartz, deputy state selective service director. "No applications will be accepted that are mailed after Nov. 1," Col. Schwartz said. "Applications for the Dec. 4 test must be post-marked no later than midnight, Saturday, Nov. 1."

Students may secure application forms and bulletins of information which tell how to fill out the forms from any local Texas draft board, Schwartz said.

Nov. 3—Geology majors interested in working with geophysical parties on explorations will be interviewed by the General Geophysics Company of Houston.

Nov. 3—Carnation Company of Los Angeles is interested in talking with animal, poultry and dairy husbandry majors, as well as agricultural economics, agronomy, bacteriology, industrial engineering and business administration graduates of the January graduating class. They will be here November 3 and 4.

November 4—Chemical engineering and chemistry graduates—all degree levels—will be interviewed by General Electric Company. They are recruiting men for rotational programs at Hanford Works (Richland, Wash.) and eastern plants of the company. They have a series of three to four three-month technical assignments in chemical development, design or production located at different plants. Attempt to arrange assignments on individual basis in line with each man's interests; final placement subject to each man's choice among available spots. Programs lead to all positions and types of work which chemists and chemical engineers might do in company.

Nov. 4—The Esso Standard Oil Company of Baton Rouge, La., will interview January & June graduates with degrees in chemistry, chemical, civil, electrical, industrial and mechanical engineering who are interested in possible employment in the Technical Organization of the Baton Rouge Refinery.

Nov. 6—Aeronautical, electrical, mechanical and industrial engineering graduates and business administration, mathematics and physics graduates will be interviewed by Aro, Inc. They will be placed in the Training Program and are assigned to current government facilities and private industrial organizations engaged in the development of aeronautical products for a period of approxi-

mately nine months.

Nov. 6—The Atlantic Refining Company will interview chemical, civil, petroleum, mechanical and electrical engineering graduates as well as physics, math and geology majors.

Nov. 6—The Texas Electric Company will be here Nov. 6-7 to interview electrical, civil, mechanical and industrial engineering graduates for positions as trainees. They will interview business administration majors. They are interested in talking with January graduates.

Nov. 6—Consolidated Vultee Aircraft Corporation of Fort Worth is interested in talking with January graduates with degrees in aeronautical, mechanical, electrical and industrial engineering and also physics graduates.

The Broome Electric Construction Company is in need of a junior engineer (Electrical Engineering major) with two or three years of college education to train as an estimator for electrical work, both building electric construction, power construction and line construction.

The Lockheed Aircraft Corporation of Burbank, California, is interested in receiving applications from mechanical, electrical, aeronautical engineering and math graduates. They prefer mathematical majors with working experience with electronic computing machines.

A&M Set for Test By Marketing Men

A&M was selected as a test school by the Student Marketing Institution of New York. The school was selected with 350 other colleges in the nation.

B. Q. Evans and J. H. Spadachene are student representatives for the program. The program is being conducted for the information of the American Tobacco Company.
