

## Campus-Beautiful Projects Underway

Beautification of the campus is well underway with the planting of rye grass and the addition of shrubs in many places.

Workmen were busy yesterday breaking up sidewalks near the site of old Foster Hall.

Howard Badgett, manager of the A&M physical plant, said a beautification plan for the area from the Exchange Store to the Physics Building is now being considered for approval by the chancellor.

Breaking of the sidewalks where

Foster Hall stood is the first work to be done on beautifying this section of the campus which surrounds the Academic Building.

The beautification program will involve changing and adding sidewalks first, Badgett said. This will be completed before landscaping is begun.

All planting in the program will be done during the winter months, so sidewalk work should get underway soon, Badgett added.

He said officials are considering placing a walkway of some kind through the Academic Building parking lot to alleviate congestion and the necessity of dodging cars when students change classes.

### Shrubs Added

Shrubs were planted for a hedge along the new sidewalk between the Mechanical Engineering Building and the ME Shops Building last week. Other planting is also being done at this time by the floriculture and landscape architecture department.

### Landscaping

Landscape plans for the new Engineering Building and Texas Engineers Library building are complete, Badgett said. Work will begin soon on adding greenery to these new buildings.

Badgett said all planting must be done during the winter and he expects a big change over the campus during the next few months.

Workmen were also busy this week chopping down dead trees, an annual chore which is done just before the bonfire.

## Hines Explains Church's Duty To Colleges

"Counteracting the increasing fragmentation of truth is the primary responsibility of the church on a college campus," said the Rt. Rev. John E. Hines, Episcopal Bishop Coadjutor of Texas.

Speaking to the Episcopal students and parish members of St. Thomas Chapel last night, Bishop Hines outlined the work of the college church.

"The physical unity of our present has brought about this fragmentation," he said. "We tend to become specialists, forgetting the spiritual unity that should be a part of our lives."

Rev. Hines defined this fragmentation as the breaking off of parts of the truth and presenting them as the whole truth.

"We are also guilty of fragmentation of individuals," he said. "We judge a man's worth by his utility to us, rather than his qualities as a person."

To counteract this, Bishop Hines said, the church must be a community on the campus.

"Because it is composed of many families, the church can show the student how the life of one family is carried out," he said.

Helping students choose a vocation was another way he suggested for the church to be useful.

"By vocation, I don't mean profession," he said. "Vocation is that quality that makes a profession enjoyable."

## Many Phones Still Out of Commission

Only a few of College Station's telephones damaged by Monday night's rain were back in service today. Phones were out in the Woodlands area, on Main Street, and between College Station and Bryan.

"We have crews out working," said John B. Goehenaer, wire chief, "but I don't want to estimate how long it will take to get all the cables repaired."

The service failure was caused by water getting into cracks in the cables caused by the long dry spell.

G. M. Brennan, division manager, was unavailable for comment.

## Dance After Bonfire Planned for Ballroom

A dance in the MSC Ballroom after the bonfire is being planned by members of the dance committee.

Tentatively the plans are for a local band to play, refreshments to be sold, and no charge for admission. However, these plans must be approved by Miss Betty Bolander, MSC program consultant.

## Weather Today

**MILD**  
WEATHER TODAY: Clear. The wind velocity will be light out of the north. The low this morning was 37 and the high yesterday was 64.

## DH Majors May Receive Help From Dairymen

Two \$250 a year scholarships for freshmen agricultural students planning to major in dairy husbandry are offered by the American Guernsey Cattle Club, said A. L. Darnell, professor of dairy husbandry.

Students selected will be given work on one of the major Guernsey dairy farms in the nation each summer during their college careers, Darnell said.

Those accepted will receive regular pay for the summer jobs in addition to the yearly scholarships.

This assistance offers an opportunity for a good job after graduation in addition to financial aid in completing college, Darnell added.

Any interested freshmen agricultural students should contact Darnell in the Agricultural Building.

## TU Ticket Sales Now Going Slow

Only 800 student tickets have been sold for the A&M-TU turkey-day tilt, said Pat Dial of the Athletic Office.

"I believe the reason students aren't buying is that they think tickets are going to be sold next week," Dial said. "However, tickets are being taken off sale at 5 p. m. Friday."

The remaining duets will be sold as reserved seat tickets, and will cost \$3.60 apiece. The space reserved for the Aggies at the game will depend upon the number of student tickets sold, Dial added.

## Recreation Council To Ask Tax Support

The Recreation Council will ask the City Council to pass an ordinance putting them on a tax supported basis at the next meeting.

The city Council meeting, postponed from Monday, will be held Monday, Dec. 8.

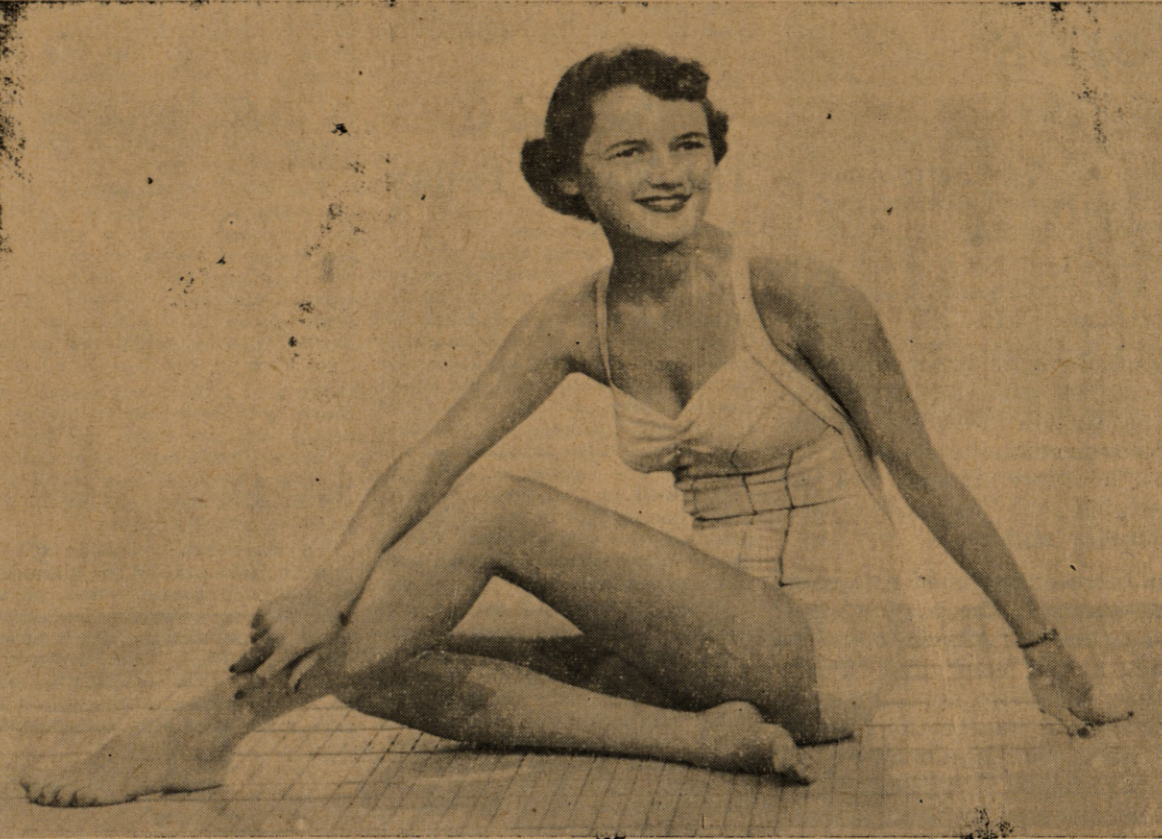

## Large Crowd Attends Final Showing of 'All My Sons'

A near capacity crowd of almost 300 persons attended the final performance of "All My Sons" in the MSC Ballroom, last night.

The non-acting crew of the Aggie Players had to set up additional chairs to accommodate the many late-arrivers.

The audience surrounded the "theatre-in-the-round" on three sides.

A large network of spotlights aided the effects of the play, which depended on mood lighting.

A LOVELY MISS—Aggie sweetheart Claire Williams shows she has more than a very charming smile. The pretty TSCW sophomore from San Antonio will be on hand at the Texas University game to see the Aggies parade. But nix on inquiries, she's already dated for the game—ask Corps Commander Weldon Kruger.

## New Building 'Just Grand'—Barlow

By JON KINSLOW  
Battalion News Staff

The engineering department is still wearing off the newness of its building which was opened Nov. 5.

Constructed at a cost of \$567,000 the building was built to house the industrial architectural and aeronautical engineering departments; the engineering extension service; and the dean of engineering offices. The building is located between Mark Francis Hall and the Agricultural Engineering Building.

### Barlow Comments

When asked how he liked the new engineering building, Dr. H. W. Barlow, dean of engineering, said it was "just wonderful." It is the best lighted and ventilated building on the campus, he added.

The building, simple but adequate in design, has greatly eased the pressure of needed classroom space in the School of Engineering. Before moving into the new building, the industrial engineering department was housed in Austin Hall, and the architectural engineering department under the rotunda of the Academic Building. The aeronautical engineering department had been using the Aeronautical Engineering Building, which was used by the laundry until 1940.

### Low Cost

The cost of constructing the building was less than any of the buildings built during the recent building program. It was designed so that morning classes are held in the part of the building that is coolest in the morning.

Similarly, the labs are on the

shady side of the building in the afternoon. With the exception of the aeronautical engineering wind testing lab on the third floor, all classrooms and labs are on the first two floors. This is so students will not have to go above the second floor to get to their classes.

### Nine Classrooms

Nine classrooms, not including labs and maintenance shops, are in the building. In addition to the classrooms and two design labs, there are conference rooms where students may accommodate 55 students. There is no main lecture room in the building.

"We like it fine now that we are beginning to get used to it," was the comment of Mrs. Nadine Havard, who works in Dean Barlow's office.

Six months in planning and 10 months in constructing, the building was designed by Adams and Adams, Dallas architects. The plans were drawn from suggestions of those who use the building.

## Draft Board Set-Up In Housing Office

A sub-division of the Bryan selective service board has been established in the Housing Office, Room 100, Goodwin Hall, for the convenience of students.

Registrations here will be forwarded to the student's home town selective service board, so the student will be officially registered at his legal residence.

Law requires that a person register for the draft within five days after his 18th birthday.

## Cherry 'Fish' Smiles

By JOEL AUSTIN  
Battalion Co-Editor

There's a new air about the campus this week. Freshmen are bearing their cherry red smile and activity on the bonfire grows by the day.

Perhaps the Aggies have been underdog in score during the last few football games, but that doesn't mean students have given up about Texas University, who is already picked to play in the Cotton Bowl by virtue of a sure win in the Southwest Conference.

### Anything Can Happen

When the Aggies and Longhorns play anything can happen—and it usually does. And when the A&M students start getting ready for the big Thanksgiving game, it looks like a major operation is about to take place.

Symbolic of what is considered the "cookie-pusher" school and its

## Local Artists To Show Work In Houston

Forty paintings from the MSC Art Gallery Committee will be exhibited Nov. 22-25 in the Shamrock Hall of Exhibits during the Allied Arts Association Festival in Houston.

Participating in the festival which has the motto "Art for all," the committee will have paintings from students and College Station residents on display.

"We are proud and honored the association invited us," Mrs. Ralph Terry, advisor and instructor of the committee, said. "I am especially proud because the show we will present is the best exhibit my students have ever had," she added.

Louis Hampton, art gallery committee chairman, and student artists Dick Tarver and Bill Johnson will accompany Mrs. Terry to Houston Saturday. Mrs. Hubert Wamble of Caldwell will help take the exhibit to Houston, and Mrs. Joe S. Mogford will bring it back, Mrs. Terry said.

The pictures to be exhibited from here are:

"The Strike," Bill Johnson; "Green Apples," Charlie Brown; "Castor Beans," C. B. Campbell; "Snake Balls," Marjorie Morrison; "Garden Vegetables," Lena Searcy; "Old Relics," Nina Henry; "Zinnias," Mae Goodlet; "Landscape," Bobbie Goldsmith; "Autumn Near College Station," Mrs. E. G. Smith; "The River," Mary Dauchy; "On the Brazos," Ida Jensen; "The Lake," Helen Grumbles; "Juniper Tree," Lewis Oden; "Autumn Richness," Frances Schmidt.

"Avocado," Virginia Lee Dobson; "Rainy Day," Verna Motheral; "The Lone Tree," Ann Hilliard; "In the Glen," Tiny Micholowski; "Concho River," Ruth Mogford; (See ARTISTS, Page 2)

## Bonfire Guards Posted Tonight

Guard fires will be lit tonight as the first guard details are posted for the bonfire. Tonight from 7-11, Sqdn. 5 and A Chemical will be charged with bonfire security.

From 11-3, Sqdn. 11 and A Armor will be responsible for the blaze. From 3-7 a.m. Friday morning, Sqdn. 4 and A Ordnance will watch the campus.

"I'm not satisfied with bonfire progress, but things will improve," Tom Collins, head yell leader and

chairman of the bonfire committee, said this morning.

"We had a hard time with the pole raising," said Collins, "but stacking the logs was begun yesterday and a lot of work was accomplished by upperclassmen in the woods."

Fred Haddad was responsible for obtaining assistance in welding the king pin on the large flat bed trailer truck last night. He was in a North Gate cafe when he met Mac Gough, sophomore ME from Muleshoe, who offered to borrow his employer's equipment to repair the truck.

### Trailer Repaired

Gough called his boss, and borrowed the welding tools. Dukie Childs, Haddad, Collins and Ed Flynt, the driver of the disabled truck, worked until after 3 a.m. getting the vehicle back into running shape. The truck was on the drill field, ready to carry men to the woods this morning.

The centerpole of the fire is 52 feet above the ground, Collins said. A few large logs were on the drill field at 8:30 this morning ready to go on the pile.

### No Wood Brought In

No trucks brought freshmen to the woods yesterday, and no wood was brought in. This was the result of the broken king pin on the trailer truck.

All cutting yesterday was on land donated by W. E. Street of the engineering drawing department. The land is four miles south of A&M, off Highway 6.

Fred Wolters, Claude Burgin, and Clyde Goen have consented to let students cross their land to reach the cutting site. The route to the woods is well-marked, according to Collins.

The only casualty was Bud Williams, senior, who cut his finger while sharpening an axe.

## PE Building Project Ahead Of Schedule

Construction on the Physical Education Building is running slightly ahead of schedule according to J. A. Orr, 45, superintendent of the project.

The only thing that will slow it down in the next few months is the shortage of structural steel due to the big steel strike early this year.

There was a mix-up in the structural steel allocation for the fourth quarter of 1952. The contractor won't have this year's quota until the second quarter of 1953. Accordingly, the building won't be ready until sometime in the first semester of next year.

"Even with all these stoppages, the job is progressing very well," said Orr. "We have no man-power shortage now except for engineers. We did have some trouble during cotton picking season, but we're set, now," he added.

The building is about 25 per cent finished and will be the second largest building on the campus when completed. Only the Academic Building will be higher, and not by a very large margin.

## Chest Group May Extend Fund Drive

With only \$7,427.17 of the \$11,019 Community Chest goal collected, the Chest committee will meet this afternoon to decide on continuing the drive another week. The drive had already been extended through yesterday.

"I think the committee will decide to carry the drive over for another week," said Bennie Zinn, chairman. "Even if they don't, a few contributions will be coming in until the end of the month."

Two major reports were still out yesterday. The two are expected to add \$400 to the present total.

If the goal is not reached, cuts will have to be made in the allotments of the benefiting organizations.

Last year's Chest reached \$9,850 goal after the drive was extended three weeks.

## College Station Community Chest

Goal .....\$11,019.00  
Total now ..... 7,427.17  
Still needed ..... 3,591.83
