## Adjunct

(Continued from Page 1)

Special campfires are scheduled on certain nights where students and instructors discuss educational, moral, and ethical problems faced by young people today. Some of the regular classes also are held out-of-doors.

Physical education courses offered include swimming, volleyball, basketball, and softball. Since the camp is located near the South Llano River, canoeing is also a popular sport.

Conferences on health and physical fitness are also included in the athletic program.

An organized inter-cabin intramural program is also offered. Under this program, students can compete in ping pong, diving, and canoe races in addition to sports available in the physical education program.

## Talent Shows

Other recreation is provided by talent shows produced by the students themselves and a weekly movie.

Students are housed in screened fireproof cabins. Each cabin houses 12 students. These living quarters are grouped around a modern tile lavatory bath house.

A large building near the entrance to the camp contains classrooms, offices, a library, and a medical clinic. The clinic has a registered nurse on duty 24 hours a day. A doctor is available on call at all times.

Located north of the cabin area is a combination mess hall and lounge complete with ping pong tables and the latest magazines and newspapers.

All buildings have concrete floors, steel frames, and corrugated concrete asbestos roofs.

In addition to training prospective A&M freshmen, the Adjunct is also headquarters for the school's advanced summer practice courses in civil engineering and geology.

The first term for the coming summer session begins June 8 and will close July 17. The second term is from July 20-Aug. 28. Each term lasts for six weeks.

## Former Student Serves Aboard Naval Vessel

Jasper T. Hassey, hospital corpsman first class, is currently serving aboard the control vessel USS PCEC 896 in Pacific waters.

Hassey, former A&M student, entered the Navy in Feb., 1946.
