

Red Army Troops Freed

Red Army Troops Push Berlin Riots

LIN—(AP)—The Russians and open trucks carried steel-helmeted infantry. The East German government radio announced shortly before midnight that the first mass arrests of "provocateurs" had been made. The broadcast said they were seized from among the 3,000 men employed at the nationalized Bergmann-Borsig heavy machinery factory in the Soviet Sector. The exact number arrested was not disclosed. All the plant employees had taken part in the general strike. The march of Soviet forces into Berlin continued for seven hours. In the darkness, West Berliners (See Red Army Page 5)

450 New Books Received By A&M Library

The Cushing Memorial Library on the Campus of A and M has received approximately 450 volumes of new books which will be available to the students soon, according to Michael V. Krenitsky, Assistant Librarian. These books were selected to meet the requirements of the people of this area and consist of some of the latest articles published for recreational reading, study and research work, Krenitsky said. One of the books received by the library for research work is "Russia and Her Colonies" by Walter Koharz, a distinguished writer and broadcaster on international affairs. This book of information is the most comprehensive study of Russia and its people ever to be published in the English language, he added. "The Berlin Story" by Curt Riess is an interesting biography of the old and new city showing the contrasts in the lives of the people living in the Soviet and American Sectors. For recreational reading, two good examples are: "Yankee Ships" by Reese Wolfe, which is an informal history of the American Merchant Marine, and Alice Marriott's "Hell on Horses and Women". Marriott's book is a story of the western development in which the author shows why the cattle country is a wonderful place for mules and men but "Hell on Horses and Women".

Deans Leave Florida Meet

P. Abbott, Dean of Arts and Sciences, and Dr. Howard W. Dean of Engineering, left for Gainesville, Fla., to attend the 61st annual meeting of the American Society for Engineering Education which is held at the University of Florida from June 22nd through 26th. Abbott will present a paper "Modern Engineering from the Viewpoint of the Creator" to the Physics section of the meeting. A conclusion of the meeting will see Dean Barabian and Dean Barabian planning to visit the laboratories at the University of Miami and other places returning to College Station.

Additional Grads Summer Classes

By MIKE SLIMAN
Camp Arrowmoon, district camp for Boy Scouts of Brazos and Robertson Counties, is the scene of much excitement and activity this week now that the 19th annual camping period is underway. This annual affair opened on Sunday and will continue until 2 p.m. Sunday, June 21. Closing ceremonies will consist of a Court of Honor at which time the candidates for advancement and merit badges will receive their awards. Arrowmoon, located in the sand hills of Robertson County between Hearne and Bryan, was especially built to serve the needs of the scouts of Brazos and Robertson Counties. It contains approximately 85 acres on which has been built a mess hall, a kitchen with modern facilities, a 45 by 90 foot swimming hole and a few things which nature has added to provide a realistic outdoor setting to the camp. The swimming hole, although having concrete on three sides, is actually a dammed-up creek. At the present encampment are approximately 100 boys representing nine scout units or explorer posts. This camping period will give these scouts a program of training in scout skills, allow advancement in rank, achievement in merit badge work, and permit those

STILL CLEANING UP—Babe (Didrikson) Zaharias smiles as she washes the hood of the Zaharias' new Cadillac during a visit to the R. O. Bowen home in Fort Worth. Once the world's greatest woman athlete, Mrs. Zaharias is now recovering from a cancer operation.

School Conference To Bring Over 500

At the general assembly meeting Tuesday, June 23, Dr. Kate Wofford, head of the Elementary City of Florida, will talk on "Leadership is a Human Problem." R. E. Slayton, superintendent, Longview schools, will preside. Dr. David H. Morgan, dean of A&M college, will deliver the address at the general assembly on Wednesday, June 24. Miss Beryl Walker, president, Texas Association for Instructional Supervisors, will preside. George B. Wilcox, head of the Department of Education and Psychology, A&M, is secretary of the conference. R. E. Slayton, superintendent of the Longview public schools is president of the Texas School Administration Conference, John O. Rodgers, Georgetown, is president of the Texas Association of County Superintendents and Miss Beryl Walker, supervisor, Hale county school, is president of the Texas Association for Instructional Supervisors.

20,000 Freed By Rhee; Four Camps Involved

MUNSAN, Thursday, June 18—(AP)—About 20,000 anti-Communist prisoners of war stormed out of four UN prison compounds today on orders of defiant South Korean President Syngman Rhee—orders that could wreck a Korean armistice just as it seemed only hours away. The U. S. prisoner command ordered several infantry units—presumably American—into a search for the liberated anti-Communist prisoners of war. Radio Seoul said at noon today that South Korean Lt. Gen. Won Yong Duk announced completion of the release of anti-Communist Korean prisoners of war and said anyone trying to arrest them—"regardless of nationality"—would be dealt with severely. UN Command officers here had no comment. Their grave faces reflected the seriousness of the South Korean act.

Profs to Attend Dairy Meeting In Wisconsin

Dr. I. W. Rupel, Dr. I. I. Peters and R. E. Leighton, members of the Dairy Husbandry Department, will attend the 48th annual meeting of the American Dairy Science Association to be held at the University of Wisconsin June 22nd through 24th. This meeting will provide an opportunity for those attending to discuss the many problems confronting the dairy industry, share with each other the latest scientific information, and formulate plans for advancement of the industry. Dr. Rupel is chairman of the Resolutions Committee and of the sub-committee on graduate curricula. He is also a member of the curricula committee and of the cattle type committee. Dr. Peters is a member of the student affiliate committee and of the standard plate court committee. A paper entitled "Relation of Breed and Free Gossypol Levels to Cottonseed Meal Toxicity in Dairy Calves" is to be presented by Leighton.

NEW DIRECTOR — Dr. J. M. Bethea (above) has arrived in Austin to assume his duties as executive director of the Texas State Board for Hospitals and Special Schools.

District Scout Committee To Invite Others

Plans for making Camp Arrowmoon available to Boy Scout troops other than those in Robertson and Brazos Counties were discussed at the regular meeting Tuesday night of the Brazos District Scout Committee. Although church groups, Cub Scouts and other worthy and needful organizations use Camp Arrowmoon at various times during the year, most of the year the area is idle. It is thought that by allowing scout troops from other districts to use the camping area and facilities, many more people will benefit from its existence at practically no extra cost. In order to use Camp Arrowmoon now, all that is necessary is the permission of the District Scout Committee and payment for use of electricity and gas. The meeting also included plans for the formation of a five-man executive committee. The chairman, vice-chairman, and district commissioner of the Brazos District Boy Scout Committee automatically will become members of this new executive committee and the two other positions will be filled from the 65-man district committee. The main purpose of this executive committee is to streamline the work and duties of the district committee into a more efficient working unit, according to Professor Don Burchard, Chairman of the District Committee.

Recreation Picnic Date Set For July

College Station residents are asked to mark the date, July 2, on their calendars. That is the night chosen by the College Station Recreation Council for its first community picnic of the current year, announced R. L. Skrabanek, chairman of the Picnic Committee. Following the pattern set last year, families are asked to bring their own picnic suppers. Refreshments of different types may be purchased at the picnic. Among other forms of entertainment, a free gala fireworks display is being planned. Exact time of the different events will be announced later.

Managers Of Little League In Parley

The Little League managers met at Roy Oden's Southside Grocery Store at 8 o'clock Wednesday night to discuss league affairs. Equalization of the league rosters will be made after Thursday's games which will end the first half of league play. The game between the Pirates and the Cubs which ended in a tie Tuesday afternoon will be played off Monday afternoon. Cards were passed out to the managers to be distributed to the new players. These cards request the consent of the parents. Each parent has to give his consent before the boys are allowed to play in the league.

Film Society Ducats Are Still Available

Season tickets may still be purchased for the A&M film society's summer showings, said Bob Boriskie, society president. The tickets are \$1.00 each and are transferable. No admissions will be sold for individual pictures. Four movies have been shown this summer and have been well received. "I believe every student and faculty member should take advantage of the chance to see these classics," Boriskie said. Remaining films on the schedule are: Christina, June 18; Captain Kidd, June 25; Prisoner of Shark Island, June 29; Les Miserables, July 6; Rains Came, July 13; Razor's Edge, July 16; Grand Illusion, July 27; Berkeley Square, August 17; Arsenic and Old Lace, August 20; and Julius Caesar, August 27. Tickets may be bought at the office of student activities or at the desk of the MSC, Boriskie said.

Agromony Students Study Soil Types

Under the direction of J. F. Mills, Instructor of Agronomy, the members of the Agronomy 418 class are taught to judge soil profiles. In trying to find the different types of soil, the students are given twelve samples which consist of anything from excellent to a poor type of soil. To judge the soil, the class must grade each sample on depth, color, texture, consistency, and determine if it was a calcareous or non-calcareous type of soil. A chemical test is also made on each sample to show if the soil is acid or base. This knowledge is all very important, according to Mills, because it will determine the fertility of the soil and enable the farmer to know the proper measures to be taken to improve his soil properly.
