

UN Loses Control In Korea Conflict

By Bob Boriskie
Summer Editor

When President Syngman Rhee notified General Mark Clark he would withdraw the South Korean Army from the UN command if an armistice under the present terms is signed with the Communists, he gave the UN a hotfoot with a blowltorch.

Probably never in the history of the United States have we been so completely forced to eat humble pie. It is no longer up to us to say whether an armistice will or will not be signed.

Food Protection, Sanitation Needed To Stop Dysentery

AUSTIN, June 24, (Spl.)—Commenting on the unusually high incidence of dysentery in Texas at the present time, Dr. Geo. W. Cox, state health officer, said food protection and sanitary measures are needed to control the disease. He described dysentery as being an infectious disease characterized by diarrhea, pain in the abdomen, and toxemia.

"The germs gain entrance to the body through the mouth," Dr. Cox said, "and then make their way to the intestines in the same manner in which food does."

Dr. Cox warned that dysentery affects young children more often and more seriously than adults, frequently resulting fatally; however, he said it may occur at any age. It is usually more prevalent during the summer season, and the great number of cases now being reported are unusual for spring.

"Food protection and adequate sanitary measures are more urgently needed now than ever before if we control the potential possibilities of epidemic dysentery in this state," Cox said.

Local Man Attends Church Meeting

Standley P. Clark, research engineer in the cottonseed laboratory of the Engineering Experiment Station, attended the first Christian Faculty Fellowship Conference to be conducted by the National Council of the Churches of Christ in North America, at Park College, Parkville, Mo. this week.

The A&M Board for Presbyterian Student Work and Campus Christian Life, sent Clark to represent Presbyterian members of the A&M faculty at this interdenominational conference.

To the faculty section of the Presbyterian Educational Association of the South, at Montreat, N. Carolina, June 23-26, the board is sending Keith Russell of the Physics Department, and Dick Adams of the Oceanography Department.

Attending the Montreat meeting from June 23-29 will also be the Rev. Norman Anderson in the Bible professors' section and the Rev. Charles G. Workman in the student workers section.

A&M Consolidated Beats Conroe High

A&M Consolidated High School Summer League Baseball team came thru with a win over Conroe high school. Winning with a long margin of 6-1 the consolidated boys rode the strong right arm of Hickman the pitcher and the booming bats of Engelbrecht and Carroll.

THROATY PROBLEM

Twenty-three cases of sore throat were reported in Bryan and College Station for the week ending June 20, announced Bryan-Brazos County Health Unit officials.

The Battalion

Lawrence Sullivan Ross, Founder of Aggie Traditions
"Soldier, Statesman, Knightly Gentleman"

The Battalion, official newspaper of the Agricultural and Mechanical College of Texas, is published by students four times a week, during the regular school year. During the summer terms, and examination and vacation periods, The Battalion is published twice a week. Days of publications are Tuesday through Friday for the regular school year, and Tuesday and Thursday during examination and vacation periods and the summer terms. Subscription rates \$6.00 per year or \$3.50 per month. Advertising rates furnished on request.

Entered as second-class matter at Post Office at College Station, Texas under the Act of Congress of March 3, 1879.

Jewelry Like Clothes Needs Regular Care

To be at its bright and shiny best, your jewelry like all your personal belongings should be kept spotless with regular, careful cleanings and since it is important to the beauty of your jewelry that you use the proper methods.

The best way to keep your artificial pearls fresh is to wipe them frequently with a soft cloth to remove surface dust or powder as it collects on them. Periodically,

take a soft cloth dampened with mild soap and water and wipe the pearls carefully, drying away all traces of moisture when you are finished.

Oriental or cultured pearls may be washed occasionally in mild soap and water. Dip them into lukewarm suds and rub them clean with a soft cloth, then quickly rinse in fresh lukewarm water and dry them as thoroughly as possible. It is a good idea to stretch them taut on a soft towel between two pins so that the string dries more quickly.

Platinum, palladium or gold jewelry with diamonds or colored gems such as rubies, sapphires, aquamarines or the like should be kept clean by regular washings with mild, lukewarm soap and water. An old toothbrush is ideal for getting into the crevices of rings, brooches or other jewelry.

In the case of fashion jewelry, considerable care should be taken in its cleaning, particularly in instances where the stones are set with glue rather than with prongs. In most instances, it is best simply to wipe the surface of the stones and metal with a cloth dampened in water to which a few drops of ammonia have been added.

Foundation Work Underway On New Dairy Cattle Center

The foundation work on the new dairy cattle breeding center has begun and construction on the building is expected to commence soon, says Murry Brown, instructor in the Dairy Husbandry Department.

The contract for \$75,000 awarded Bergstrom Corporation, General Contractors of Marshall, Texas, calls for 150 working days in which to complete the building.

This will be the seventh new building to be added in recent years to the college dairy.

Repairs Launched On A&M Hospital

Foundation repair and lifting has been started on the college hospital and contracts have been let for others, M. C. Tate, superintendent of constructions said.

The Van Cleave Construction Company has been contracted to repair the foundations of the old wing of the college hospital, the Exchange Store and Cushing Memorial Library. Another contract is pending for foundation repairs on the Academic Building, Tate added.

There is an unusual clay formation found in the Bryan-College Station area that causes building of large size to sink and crack. The clay has an unusual capacity to expand or contract when it is wet or dry which causes buildings to "heave".

The necessary repairs will be made by removing the earth around the foundations, raising the sunken portion of the building with hydraulic jacks and placing horizontal concrete support beams and vertical piers under the foundation.

The cost will be an estimated 80 thousand dollars, Tate said.

CHEAP TEXAS BEEF

Recently, cheap New Zealand beef made sensational headlines when shoppers queued up for blocks awaiting their turn to buy. How recent that was.

Now, we have made special beef buys of good quality veal and baby beef sizes of Texas cattle we can offer at these sensational values. Not for ten years have we seen anything like this.

- VEAL ROUND STEAK lb. 55c
- VEAL LOIN STEAK lb. 65c
- VEAL T-BONE STEAK lb. 69c
- VEAL CUTLETS lb. 89c
- Freshly Ground GROUND VEAL lb. 27c
- (5 POUND LOTS) lb. 26c
- VEAL SHOULDER ROAST lb. 39c
- VEAL POT ROAST lb. 33c
- VEAL SEVEN STEAK lb. 45c
- VEAL BRISKET STEW lb. 19c
- Fine for Barbecue—Veal SHORT RIBS lb. 29c
