

## Accidents To Take Heavy Toll

UNLESS THIS FOURTH is different from all that have preceded it, thousands of Americans will become dependents on Independence Day.

This warning was issued by the National Safety Council as the nation approached one of its most dangerous holiday periods, and motor vehicle accidents again lead the list of Fourth of July hazards.

And it gives one cause to be considerably startled when the Council announces that one out of every two persons now living in this country has been or will be injured in a motor vehicle accident before he dies, if our present accident rate is maintained. Holiday accidents, when traffic on the highways is especially heavy, are major contributors to this deplorable record.

Second high on the Fourth of July accident list is drowning. Falls, fireworks and firearms, sunstroke and heat exhaustion, food poisoning and miscellaneous accidents also exact their toll.

The Council asks that wherever you are going on the Fourth, start early and take it easy. Don't be in too big a hurry to get there. Obey legal and common sense speed limits and keep your car under control at all times. Slow down at sundown, and hold your night-time speed below the limit.

Independence Day tolls are not inevitable. They can be prevented. Police departments and other officials all over the country will be alert to prevent as many accidents as possible. But always the size of the toll depends chiefly on the good sense of every American. Take it easy on the Fourth.

## One-Third of Voc Ag Teachers Are A&M Grads

This year, about 40,000 Texas high school boys received a total of almost 9,000,000 hours of instruction from 937 vocational agriculture teachers of which more than one-third were A&M graduates.

The large portion of A&M trained vocational agriculture teachers in the state brought out in a recent survey, said Dean C. N. Sheppardson of the School of Agriculture.

Of the 937 active vocational ag teachers at the present time, 323 of them are graduates of A&M, and 110 of that 323 hold Master's degrees granted by the college.

In addition, 26 others who hold bachelor of science degrees from other schools hold master's degrees from A&M.

To provide study opportunity in agricultural subjects, the college's School of Agriculture offers 20 different fields of specialization, covering practically all phases of agricultural production, processing and marketing.

A teaching staff of 101 men provides instruction in these subjects. Of this group, 54 have Ph.D. degrees, and 46 have master's degrees.

Three-fourths of this staff is on joint teaching-and-research assignment, giving them an opportunity to participate in current research developments in their fields.

Students also have the opportunity to maintain such contact, and to keep up with the work of full-time research and extension staff specialists.

Prospective vocational ag teachers are required to take at least 60 hours of instruction in the various fields of agriculture and at least 17 hours' instruction in agricultural education, which includes student teaching.

"These high requirements afford the prospective vocational agriculture teacher an unusually broad and comprehensive training in the problems of agricultural production," Dean Sheppardson said. "This training, backed by an adequate foundation in science, also prepares the student to analyze and solve the new problems which are constantly occurring in our rapidly changing economy."

## Job Calls

● The De Leon Independent School District is in need as assistant coach in their high school. This coach would also be required to teach another subject. Physical education majors may qualify.

● The Port Lavaca Plant of the Aluminum Company of America has one opening for an electrical engineer for electrical maintenance and distribution work, one opening for a mechanical engineer for mechanical maintenance work, and three openings for electrical, mechanical and chemical engineers for production work.

● Mathematics and physical education majors may qualify for the opening at Panola County Junior College at Carthage, Texas. Applicants must have a master's degree with a major in mathematics and must be able to take over and do a reasonable good job as head basketball coach after serving one year as assistant. Teaching assignment will be either engineering drawing, algebra and trig, or business mathematics and education.

● The Engineering Department of Texas Employers' Insurance Association at Dallas is in need of mechanical, electrical, industrial engineering and industrial education majors for work as safety engineers.

● There is a vacancy for a man for credit and collection work with the General Motors Acceptance Corporation at Bryan, Texas. Business administration and agricultural economic majors may qualify for this work.

● Chemical, mechanical and industrial engineering majors may qualify for openings with the Silas Mason Company at Burlington, Iowa, as junior engineers.

● The Foster Wheeler Corporation with headquarters at New York is in need of mechanical and civil engineering graduates with little or no experience for field work on construction of oil refinery and chemical plants.

## 19 Policemen End Training

Certificates of completion were awarded to 19 policemen from 10 Texas cities and Bryan Air Force Base at the close of the third Texas Municipal Police Training School at A&M recently.

The school is sponsored by the Texas Engineering Extension Service, Industrial Extension Division. It was organized after numerous requests from members of the Texas City Managers' Association and the League of Texas Municipalities.

Wallace D. Beasley of TEES directs the school, which covers all phases of basic police work. Each class receives 120 hours of instruction in a four-week period of study. In addition to regular instructors from the department, specialists in all parts of the state serve as guest speakers and instructors.

Started in February, and operated during alternate months, the school has graduated 59 men from 29 cities in the state, Beasley said. The next session will commence concurrently with the fall school term, he added.

Policemen who received certificates were Henry Adams, patrolman, and Willie Baxter, sergeant, of the Bryan department; Melvin F. Campbell, chief, Eagle Lake; Sgt. Elbert L. Duggins and Sgt. Arthur E. Hewitt of Bryan Air Force Base; Cliff King, patrolman, and Marshall Rousseau, captain, Harlingen; Ben Leavell, chief, Daltart; A/lc J. N. Linville, A/lc Hermes Miller, and A/lc R. A. Rennie, all of Bryan Air Force Base; Audie J. Lynch and Dean A. Nicholas, patrolmen, Amarillo; Ira E. Scott, sergeant, and Curtis E. Strange, patrolman, Lubbock; Roland Shearer, chief, Perryton; Jesse Taylor, chief, Cuero; C. D. Weatherly, patrolman, Lufkin, and Ray York, patrolman, Lamesa.

## Newton Is Leader In Reforestation

Newton County, for the third successive year, exceeded all other Texas counties in reforestation, according to a summary of tree planting activities released by Don Young, head, Management Department of the Texas Forest Service.

Approximately 10,355,000 seedlings were planted by Texas farmers, ranchers and forest industries in the 1952-53 season, extending from December 1952, through March 1953. Newton County landowners planted 2,341,200 seedlings. Ranked below Newton, other leading counties in the total number of trees planted were Jasper, Tyler, Bowie and Nacogdoches.

Bowie County farmers, for the second successive year, headed the list of farm plantings with 574,200 seedlings. For the first time in recent years, Randall, a Panhandle county with 108 tree planters, led all Texas counties insofar as the number of tree planters is concerned.

Most of the tree seedlings were grown in Cherokee County at the 73-acre Indian Mound Nursery operated by the Texas Forest Service, a part of the A&M System. A severe windstorm which struck the Indian Mound Nursery at Alto in the spring of 1952, causing an estimated \$5,000 damage, together with the drought, seriously hampered the production of pine seedlings last year. A purchase of 2,200,000 pine seedlings from Louisiana in January, however enabled the Texas Forest Service to fill all orders for seedlings. A record production of 20 million seedlings is anticipated this year at the Indian Mound Nursery.

## Shepperd Releases Digest of Opinions Rendered in June

AUSTIN, July 1, (Spl.)—Attorney General John Ben Shepperd has released a digest of all opinions issued by his office during the month of June. They include the following:

Awarding a prize at a drawing for which anyone may register without requirement of attendance at the drawing or purchase of any merchandise is not a lottery.

A&M may discontinue operation of Bluebonnet Farm and execute a quit claim deed to the United States upon payment of all improvement expenses made by the State.

A county may rent a truck owned by an hourly employee of the county for the use of the county Road and Bridge Department.

A county commissioners' court may raise its own pay if other county officials are also raised. Such raise could not be retroactive to 1948.

The Teacher Retirement System cannot pool all of the assets of all of its funds for investment purposes.

### To Meet in 'Y'

Local Christian Science Services Sunday will be held at 11 a.m. in the YMCA Chapel, as the MSC will be closed for the 4th of July.
