

Safety Is Subject For Extension Club

Four persons in twenty minutes lose their life because of an accident. That statement was made by John W. Hill, guest speaker at the Extension Service club meeting yesterday.

Introduced by Mrs. Grace Martin, chairman of the club's safety committee, Hill explained that living in a society as complex as ours demands that we be ever conscious of accident hazards and attempt to prevent mishaps that lead to injury or death.

Hill said that the total economic

loss to our country last year due to accidents was over eight billion dollars.

In Texas, he pointed out, there are six traffic fatalities per day and the cost to Texas per day is a half million dollars due to accidents.

He stressed the importance of driver education and felt that it should be a regular part of our public school program.

Pointing out the accident hazards in the home, Hill said that 29,000 people lose their lives in their homes every year.

He cited that such public organizations as the National Safety Council, National Red Cross and trade organizations were doing a lot to emphasize public safety.

Hostesses for the meeting were Mrs. Martin, Mrs. P. G. Haines, Mrs. Richard Burleson, Mrs. G. W. Orms, Mrs. J. W. Potts and Mrs. D. L. Weddington.

This year another nation-wide survey was made—a representative survey of *all* students in regular colleges coast to coast. Based on thousands of actual student interviews—this survey shows that, as last year, Luckies lead again—lead over all other brands, regular or king-size—and by a wide margin! The reason: Luckies taste better.
