

News Briefs

THE FOURTH and last installment fees are now payable at the Fiscal office. The fee from now until the end of the semester will be \$41.75. Fees must be paid by Dec. 17 to avoid paying the penalty of \$1 for each day late.

OFFICERS for 1954 will be elected at the final business meeting of the A&M chapter of Sigma Xi at 7:30 p. m. Friday in the Biological Sciences building lecture room. Committee reports will be given.

TWO STAFF members of the range and forestry department are presenting papers at the First National Weed Control conference in Kansas City, Mo. The men are A. H. Walker, extension range specialist, and Wayne G. McCully, Agricultural Experiment station. The meeting will end today.

FRANCES L. ARNOLD, home economics editor for the system, has been named home economist and radio specialist for a national project in agricultural communications. The appointment is effective Jan. 1.

FAMILY FAVORITES

By Mrs. Raymond Reiser

(Ed. note—Guest editor this week is Shirley Reiser, wife of Dr. Raymond Reiser, A&M professor of biochemistry, Mrs. Reiser, a member of the foods group of the College Women's Social club, is well known for her cookie recipes, and, in the past, she has catered for social functions. She is also a member of the Campus Study club. The Reisers, who have been here since 1940, have two sons, Richard, 13, and Donald, who will be 10 next month. Mrs. Reiser is a native of Raleigh, N. C.)

I have chosen mostly cookie recipes since they are my favorites. Here is a quick and simple one that requires no cooking or baking.

Apricot Balls

1 lb. dried apricots 3 tablespoons confectionary sugar 1 fresh coconut 1 teaspoon rum flavoring

Grind together apricots and coconut. Add flavoring and sugar. Roll in additional sugar and serve.

Date Tarts (Muffins)

1 cup fine chopped dates 1/4 teaspoon salt 1 cup boiling water 1 egg (well beaten) 1 teaspoon soda 1 teaspoon vanilla 1 tablespoon butter 1 1/2 cups flour 1 cup sugar 1 cup nuts

Boil water, add to dates, butter and soda. Let stand till cool. Add sugar, egg, salt and vanilla. Beat. Add flour with nuts to dates. Beat well. Bake in very small muffin tins at 350 degrees for 20 minutes. Will make 48 tiny muffins.

Pecan Crisps

1 cup shortening (butter preferred) 2 teaspoons vanilla 1/2 cup confectionary sugar 2 cups pecans (cut fine) 1 1/2 cups sifted flour

Cream shortening, add sugar and vanilla. Mix well. Add pecans and flour. Make rolls about 2 1/2 inches and 1/2 inch wide. Place on cookie pan. Bake at 350 degrees till slightly brown at edges. When baked roll in confectionary sugar.

Ice Box Cookies

1 lb. butter (creamed) 3 tablespoons vanilla 2 cups confectionary sugar 6 sifted and level cupfuls flour 1 egg

Cream butter. Add remainder of ingredients. Mix well. Refrigerate for 3 or 4 hours. This recipe is excellent for a cookie press.

Floating Island

Here is a simple dessert that we like. It is very good served with cookies or cake.

2 cups milk 1/2 teaspoon salt 1/4 cup sugar 1 teaspoon vanilla or rum flavoring 2 eggs

Beat 1 egg and 1 egg yolk until blended. Add 3 tablespoons sugar and salt. Add milk and mix well. Cook until mixture coats a spoon. Cool. Add flavoring. Beat egg white until stiff. Fold in 1 tablespoon sugar. Drop by teaspoonfuls on custard. In center of egg white place a teaspoonful of strawberry jam. Chill.

Job Calls

- Dec. 11—Sperry Farragut corporation, branch of the Sperry corporation, will interview winter and spring graduates in mechanical and electrical engineering. Dec. 11 & 12—Chicago, Rock Island and Pacific Railroad company will interview January and June graduates in civil, mechanical, electrical and industrial engineering, industrial education and business administration. They have a special training program open to college graduates that extends over a period of two years and gives experience in the principal operating departments including engineering, mechanical and transportation activities.

CAMPUS

TODAY thru SATURDAY

SET SAIL FOR FUN!! Cruisin' Down The River TECHNICAL! starring Dick HAYMES, Audrey TOTTER, Billy DANIELS, Connie RUSSELL and introducing THE BELL SISTERS

- Dec. 14—The General Geophysical company will interview geology, geophysics and geological engineering majors at all degree levels, who are interested in employment in the field of geophysical exploration. Dec. 16—Ford Motor company will interview January graduates for their graduate training program. Accounting, finance, industrial management and engineering majors will qualify. Dec. 17—Foley's in Houston will interview business administration students majoring in management, marketing or personnel who graduate in January. Successful applicants will be employed as junior executive trainees in merchandising. Reo Motors, Inc. is interested in contacting candidates for their management training program. Under this program trainees are moved through every office and production department of the company. The program requires approximately one year to complete. Business administration, economics, agricultural economics, industrial education and industrial engineering majors may qualify for the training programs with the North America Companies. These programs are for field representatives and casualty underwriters and involve intensive training. Tennessee Valley authority needs civil, mechanical, electrical, chemical and architectural engineering and architecture graduates to assist in the design, construction, and operation of hydro-electric and steam generating plants.

The secret of washing Venetian blinds well is to use an almost dry cloth. Dip the cloth in soap suds and then wring out most of the water. Go over each slat, reusing your cloth often. Then wipe the slats dry with a clean cloth.

MR. FOOTBALL HIMSELF CRAZYLEGS starring ELROY CRAZYLEGS HIRSCH, LLOYD NOLAN, JOAN VOHS

Community Chest Story Was Wrong

The report in Tuesday's Battalion concerning results of the 1953-54 A&M College Station Community Chest Red Cross drive was incorrect.

The fund committee collected \$12,449.09, not \$12,970 as reported in the Battalion.

The amended figure is \$520.91 less than the drive goal for the year, not \$100 short as the story said.

The chest committee gave each organization asking money from the fund, 95 per cent of its request, said Fred J. Benson, chairman of the drive this year.

A full allotment of money was made to the charity fund, to cover any emergencies that might arise during the year.

TREE IS AT HOME

MADISON, Wis. (AP) — Forrest Tree, a Madison city employe, has good reason to feel at home. He lives on Orchard Street.

Goldenrod Eggs are easy to prepare and small fry love this dish. Cook several eggs until they are hard, then slice the whites in thin slivers and add them to a cup of medium white sauce. Heat and pour over crisp toast; now rub the hard-cooked yolks through a sieve and let them garnish the dish. This amount will be enough for two or three servings.

X-Ray Unit Can Examine Horses

DALE E. DELONG Battalion Staff Writer

A&M's School of Veterinary Medicine has the only X-ray machine in the Southwest capable of examining animals as large as cattle and horses.

The machine is under the supervision of Dr. W. C. Banks. It is used to take X-ray photographs and for intermediate therapy in the diagnosis and cure of diseases.

Designed and developed by veterinary medicine faculty members, the machine is located in the large animal surgery room of the new veterinary hospital.

The X-ray unit is mounted on a crane so it can be moved easily. The operator of the crane can swing the machine to any position within its 180 degree operating radius.

The arm of the crane can also be raised or lowered as needed by the operator. The unit can be moved to any position on the arm of the crane.

Basically, the X-ray table is for operations. The X-ray machine was added to assist in the diagnosis and treatment of surgical cases.

To get an animal onto the operating table, the table top is shifted

until it is in a vertical position. The animal is strapped onto the table top and it is moved back to the horizontal.

The table top is raised and lowered by electric motors. A stand chute has been constructed so X-rays can be made of animals while they are standing.

Students and instructors wear lead-lined gloves and aprons to protect themselves from radiation given off when the X-ray machine is operating.

Additional protection is offered by a Geiger counter which registers the amount of radiation and indicates to those present when they have been exposed to the maximum amount of the rays.

The most radiation anyone should safely be exposed to is seven and a half milliroentgens per hour.

When the machine is in operation, everyone leaves the room to protect them from excessive radiation.

The American Merchant Marine Library Association places about a million books a year aboard merchant ships.

A&M Garden Club Holds Christmas Tea

The A&M Garden club will meet for a Christmas tea at 3 p. m. tomorrow at the home of Mrs. C. B. Campbell, 315 Suffolk South.

Chairman for the tea is Mrs. M. V. Krenitsky.

About 31 million families in the United States own automobiles.
