### A CAMPUS-TO-CAREER CASE HISTORY

"The interview was the tip-off"

Ed Burtner, '52, watched the way job interviews were conducted before choosing his job. Let him tell you how it worked out.  
(Reading time: 31 seconds)

"During the spring of '52—my last year at the University of Maryland—I was interviewed by a number of companies. I was about to get my B.S. degree in accounting.

"It seemed to me that there was a great deal to be learned from the way I was interviewed. Bell System interviewers took their time about job offers. They didn't rush me or themselves.

"I had two talks with the Bell interviewers and then was invited to meet and talk with department heads. Not only did they get a chance to look me over, but I also had an opportunity to get a closer look at their operation. I figured if the Bell System was that careful in selecting its men, it is careful in other things. The interview was the tip-off.

"That's why I'm working here in Washington, D. C., for one of the Bell Com-

panies—The Chesapeake & Potomac Telephone Company. My first job—after general training—was supervising a billing unit with 20 employees.

"Since then I have assisted on internal audits in all departments. I've helped with special studies for management and have become better acquainted with operations of the entire company. Now I'm working on the general books as an accounting supervisor.

"That Bell System interview has certainly meant a lot to me."

Ed Burtner is moving forward. His experience is typical of the engineering, physical science, arts and social science, and business administration graduates who join the Bell System. He went with an operating telephone company. There also are opportunities with the Bell Telephone Laboratories, Western Electric and Sandia Corporation.
