Blood Permission Forms May Save An Aggie's Life

Work is ready to start again for the next blood donation drive set for March 2.

Forms will soon be sent to corps units and non-military dormitories for students between the ages of 18 and 21 who wish to give blood. These forms must be signed by a student's parents before he can donate. A student who is 21 or older does not need his Parents' permission.

It is vitally important that as many students as possible give blood during the March drive. Each pint donated may mean the difference between life or death to an injured Aggie.

The importance of blood donations has been violently demonstrated to students here this school year. Right now blood is being used in an attempt to save Gene Brady, an 18-year-old freshman who was critically burned in an auto accident. Another student, Charles Arnold, who was injured in a car crash near Waco, might not be alive today if it wasn't for donated blood.

Blood given here is sent to a blood bank in Waco. Any student injured in districts near Waco which do not have blood supplying facilities would probably receive blood from this station. This service is provided free of charge. The blood which helped save the life of Arnold came from the Waco bank.

The Waco blood center also helps A&M students injured outside of Texas. These students would probably receive blood from the nearest city in that state. But this blood must be replaced. It would come from Waco.

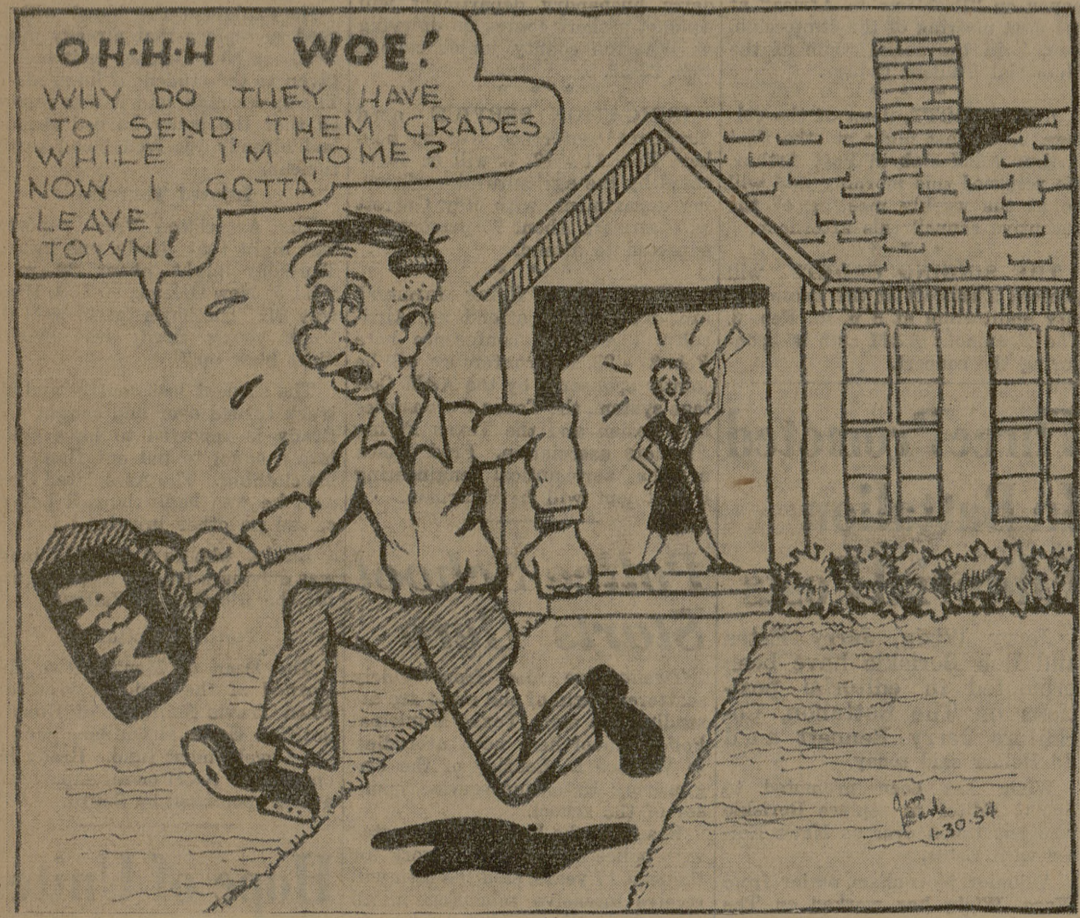

This would in turn leave the Waco bank short of valuable blood. The only way the shortage can be corrected is through more donations.

Consequently the need for blood donations is continuous. Students here can do their part by obtaining one of the permission blanks and mailing it home for their parents to sign.

This form will permit a student to give blood. It might also permit another to live.

Job Interviews

Feb. 3—The district engineer of the bureau of public roads will interview graduates and undergraduates who have completed their junior year in civil engineering and are interested in the highway engineer trainee positions now available. Graduates will be placed in a training course for three years, designed to provide a thorough grounding in the fundamentals of highway engineering and serve as a basis for a career in the organization, leading ultimately to posi-

tions of considerable responsibility. The undergraduates will be interviewed for summer employment at the GS-4 level.

Feb. 3 — The Texas company will interview BS level chemistry majors for analytical work and MS or Ph D level for research work; chemical engineering majors for development and process work; and mechanical and civil engineering majors for design work.

Feb. 5 — Firestone Tire and Rubber company will interview spring

and summer graduates at all degree levels in business administration, agricultural economics and economics for positions as sales trainees.

Feb. 5 — Archer-Daniels-Midland company will interview organic chemistry, chemical engineering and business administration majors at all degree levels. Chemists would work in research which encompasses organic chemistry, protective coatings development, nutritional studies, etc.; chemical engineers would go into production work which covers plant operation and management, and process development and engineering; and business administration majors would be interviewed for sales positions.

The Battalion

Lawrence Sullivan Ross, Founder of Aggie Traditions
"Soldier, Statesman, Knightly Gentleman"

The Battalion, official newspaper of the Agricultural and Mechanical College of Texas, is published by students four times a week, during the regular school year. During the summer terms, and examination and vacation periods, The Battalion is published twice a week. Days of publications are Tuesday through Friday for the regular school year, and Tuesday and Thursday during examination and vacation periods and the summer terms. Subscription rates \$9.00 per year or \$.75 per month. Advertising rates furnished on request.

Entered as second-class matter at Post Office at College Station, Texas under the Act of Congress of March 3, 1879.

CAMPUS CLEANERS

What's Cooking

7:30 p. m. — Petroleum Engineering club meeting, petroleum building, Spring semester membership cards will be available. Texas A&M Czech club meeting, room 2D, MSC. Czech club sweetheart will be chosen. P E club, election of officers.

WEDNESDAY

12:35 a. m. — Squadron 7 (1950-51) meeting, Dorm 9 lounge. All members of the 1950-51 freshmen squadron 7 are urged to attend. Plans for a reunion party are to be made.

Bruckart Takes Point IV Job

R. F. Bruckart of the industrial engineering department will leave Feb. 8 for Tel Aviv, Israel, on a controlling and teaching assignment under the Point IV program. With a two-year leave of absence from the college, Bruckart will work on methods of improving Israel's industries.

Bruckart has published several papers on time-and-motion work in industry.

Liggett & Myers Tobacco Co. says...

FOR more than thirty years we have used research day in and day out learning about tobaccos and cigarettes in the public's interest.

Continuously we and our consultants have analyzed, experimented with and smoked all kinds of tobaccos... especially Southern Bright, Burley, Maryland and Turkish cigarette tobaccos.

Our own cigarettes and competitive brands have been submitted to the most exacting scientific scrutiny including thousands of analyses of millions of pounds of tobaccos.

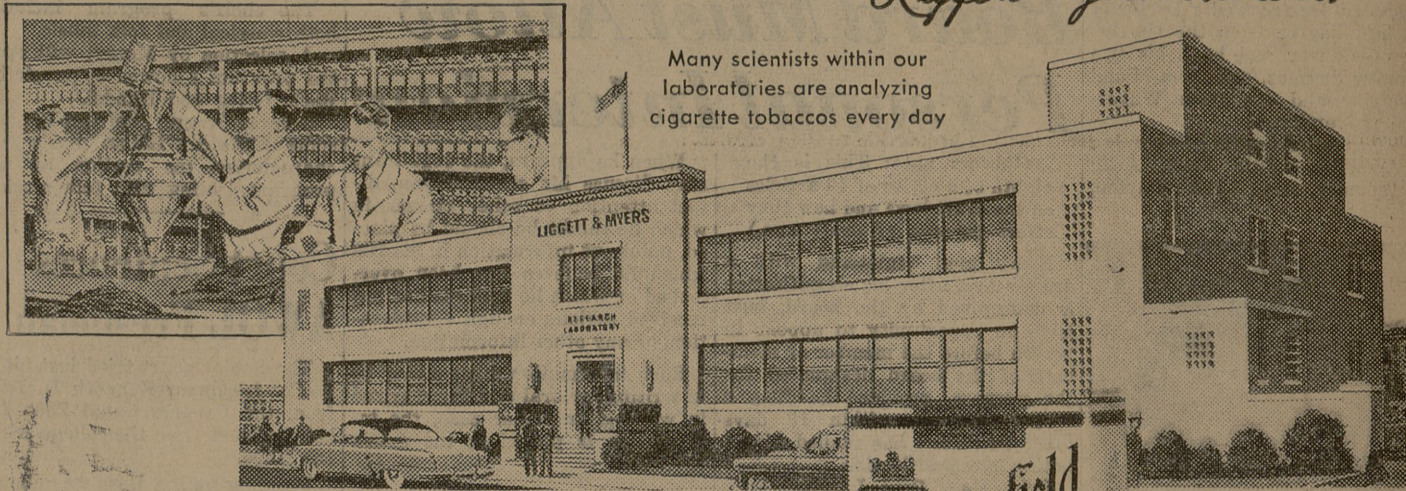

From all these thousands of analyses, and other findings reported in the leading technical journals, our Research Department has found no reason to believe that the isolation and elimination of any element native to cigarette tobaccos today would improve smoking.

For four years we have maintained in the smoker's interest an intensified larger scale diversified research program. A half-million dollar 30-ton machine, the world's most powerful source of high voltage electrons, designed solely for our use has tested tens of thousands of cigarettes. This program has already given to us direct and significant information of benefit to the smoking public.

Our consultants include Arthur D. Little, Inc. of Cambridge, Massachusetts, "one of the largest and most reputable industrial research organizations in the country" (From Business Week Magazine) and eminent scientists from leading universities.

Today the public can confidently choose from a variety of brands—by far the best cigarettes ever made by the tobacco industry.
