

Track Team Goes To Meet Saturday

Texas A&M will enter 27 varsity track and field men in the Border Olympics at Laredo Saturday, Coach Frank Anderson announced this week.

Defending champions but some what weaker this year, the Aggies will challenge the Texas Longhorns for the team title. The Longhorns, powerful in the dashes and middle distances are heavy favorites to go unbeaten this spring.

Col. Andy will put in his bid for the Aggies via his great distance runners—James Blaine of Imperial and Dale DeRouen of Port Arthur—plus the 440 and weights men.

Those running the quarter and making up the mile relay team are Carol Libby of Alvin, Gerald Stull of Beaumont, Frank Norris of Falfurrias and Terry Vetter of San Antonio.

Bobby Gross of Big Springs and Tom Bonorden of Port Lavaca will be strong contenders for the shot put crown. Southwest conference javelin thrower Pete Mayeaux of

New Orleans also will participate. Aggie entries who will leave by bus for Laredo early Friday afternoon:

Sprints and sprint relay—Harley Hartung, Don Tedder, Charles Killough and Ken Fry.

440-yard dash and mile relay—Libby, Stull, Norris and Vetter. 880—Blaine and Wallace Kleb. Mile—DeRouen, Blaine and Bob Boles.

Two - mile — DeRouen, Verlon Westmoreland and Billy Cocks.

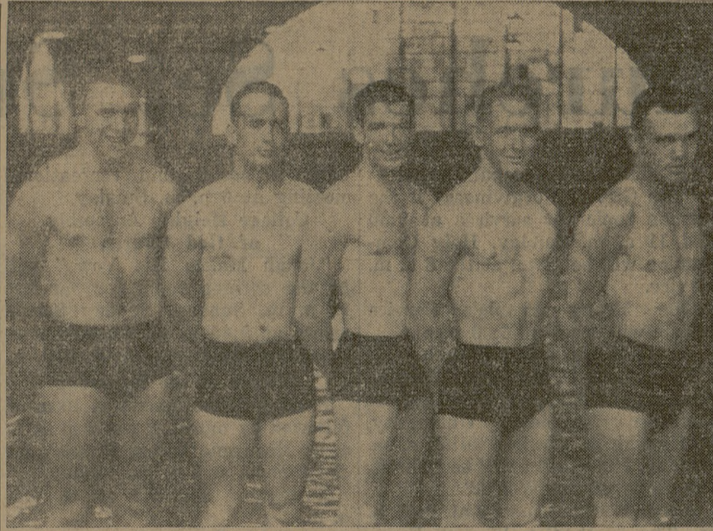

Hurdles — Glenn Blake, Tom Dollahite, Hartung and James Hollingsworth, highs, and Ken Fry, Hartung and Tedder, lows.

High jump—Marvin Swink, John McIlheny and Bob Harben.

Broad jump—Bobby Robinson. Pole Vault — James Earle and Edward Reeder.

Weights—Gross, Bonorden and Harry Cox.

Javelin—Mayeaux, Dollahite and Joe Wilson.

SENIOR SWIMMERS—These swimmers will be swimming their last conference meet for A&M this weekend. They are (l to r) Burt Koegl, Paul Wallin, Casey Snell, Jim Burns (captain), and John Cameron.

Aggies Play Brooke Here at Kyle Field

Undefeated after two games the Texas Aggie baseball team entertains the Brooke Army Medics at Kyle field Saturday afternoon at 2 o'clock.

The Aggies collected 19 hits and 19 runs in their series with Sam Houston State, winning 5-0 in Huntsville and 14-8 at College Station.

Coach Beau Bell used four pitchers in the series, Southwest conference hurler Jerry Nelson, Beaumont junior, winning the first on a fine, 7-inning stint in which he gave up but two hits, fanned five and walked four. Tex Vanzura of Austin finished out.

Ed Hennig, Tyler righthander started the second game but had to give way to Lou Little, Schulerberg senior, after four frames and the latter allowed but one hit and one run to register the win.

The Cadets are hitting a lusty .306 to date, far better than their

team average of last spring and with sophomores pacing the attack things are looking up at A&M, diamond-wise.

Bell has three soph in his batting order at the moment. Outfielders Ben Hubbard of Cuero and John Stockton of Bryan with Jimmy Howell, first baseman from Stephenville collected five of the seven hits in the first Bearkat game and three more in the 12-hit attack Tuesday. Stockton has four for eight while Hubbard has three safeties in six trips.

Junior Letterman Les Byrd, benched in the opener, came back with a triple and two singles and three RBIs in the second contest. The Winners righthander adds power to the young outfield.

Here's the probable order for the Brooke-Aggie game Saturday:

Jim Dishman, ss; Hubbard, rf; Howell, lb; Stockton, cf; Charles Leissner, 2b, Jim Parrish, 3b; Byrd, lb; Jim Williams, c.

Directors Approve Construction Grant

The A&M board of directors has appropriated \$15,000 for construction of a quonset building which will house all equipment used by the firemen training division of the Texas Engineering Extension service.

The building will be constructed on the firemen-training grounds north of the college view apartments. It will be forty by one-hundred feet, space enough to store pumps and a rescue truck in addition to other equipment and a classroom.

Equipment will be used on "disaster street", scheduled for mid-March. The street will be a mock section of a city that has been devastated by a tornado or bombing. Training with the equipment will be plumbers, electricians, policemen and firemen, according to Col. H. R. Brayton, chief of firemen training.

Nixon Shows Film At IE Club Meeting

Frank Nixon, instructor in the I. E. Dept., presented two films on the Bell Helicopter at the last meeting of the I. E. Club. Nixon worked for the Bell Aircraft Corporation before coming to Texas A&M College last September.

Previous to the program presented by Nixon, Rex Edward Hall, senior I. E. major from Dallas, was selected to represent the I. E. Club at the National American Industrial Arts Association Convention in Los Angeles on March 23-26. There will be representatives from all parts of the United States at this convention.

The regular business meeting was held and refreshments were served before Nixon presented his program.

Quisenberry Goes To Regional Meet

Dr. John H. Quisenberry, head of the poultry department, will leave Monday to hold meetings in Andrews, Sutton, Reagan, and Midland counties.

The meetings will be held to help County Agents, and poultry producers with their egg and broiler problems, Quisenberry said.

Meetings of this type are held continuously throughout the country by some member of the poultry department or a member of the Agricultural Extension Service, he said.

What's Cooking

FRIDAY
7:30 p. m.—Brazos Flyers Flying club meeting, projection room, New Engineering building. A film will be shown and all interested in flying or invited.

7:45 p. m.—South Louisiana club meeting, room 11, C. E. building. Discuss Aggicland picture and spring function.

MONDAY
7:05 p. m.—Pre-Law society meeting, YMCA. Very important meeting, very short, all members urged to attend.

Jury Will Receive Hoax Robbery Case

HOUSTON, March 11 (AP)—A federal jury will receive tomorrow the case of three of the four men charged in the \$57,721 faked robbery of the Houston National Bank New Year's Eve.

Judge T. M. Kennerly will charge the jury before noon.

The defense presented only two witnesses after Kennerly denied motions of instructed verdicts of innocence in favor of Johnny Navarro, James Mitchell and Nick Mitchell.

Sewage Workers Ask For More Data

COLLEGE STATION, Texas, March 11 (Sp)—The Texas Water and Sewage Works Association today recommended that "all state and federal agencies dealing with water supply development make available to the Water Research and Information Center at Texas A&M College, all data of public interest which would be useful in water facilities on a community or regional basis."

The Association, meeting at Texas A&M College, with more than 700 members attending, delegated four of its members to submit recommendations on the development of future water supplies. Submitting the report which the Association adopted, were R. U. Andrews, chairman, sewer engineer for the City of Fort Worth; R. J. Hennon, water superintendent, Port Neches; Edward Geeslin, water superintendent, Brady and W. L. Petit, superintendent, Weslaco.

The recommendations include, "that the development of reservoirs, treatment plants and treated or raw water supply mains on a multi-city basis be encouraged, especially when financing of such projects by single municipalities would jeopardize their overall financial status;

"that further consideration be given to legislative action establishing a revolving fund for long term loans to municipalities for providing needed works, if bonds cannot be sold by normal procedures. "That every regional association encourage all participating municipalities and water districts to maintain records of water production, consumption and losses or

waste. Also that vigilant control be exercised to keep fully aware of declining groundwater tables and diminishing raw surface water reserves.

"That existing River Authority boundaries be expanded, of conditions warrant such expansion and other authorities created to facilitate coordination of water and soil conservation programs — that the river authorities be given the specific power to establish rules and regulations covering stream pollution abatement and also empowered to initiate legal action to enforce them so that the quality of the water to be put to beneficial use will not be impaired—also that perhaps closer coordination of water development projects for the area should be undertaken by individuals, industries, municipalities and water districts in order that an integrated water plan of the area might be developed.

"That projects covering the recharge of underground water strata and reservoirs without danger of contaminating the existing reserves also be undertaken, wherever applicable, to secure temporary relief and also to replenish these underground reserves for future use, especially should surface sources be depleted during future periods of drought.

"That in areas where applicable, treated domestic and industrial wastes be put to beneficial use as a water conservation measure and also to reduce pollutional loads on our water courses.

"That all state and federal agencies dealing with water supply development make available to the Water Research and Information Center, Texas A&M College, all data of public interest which would be useful in water facilities on a community or regional basis.

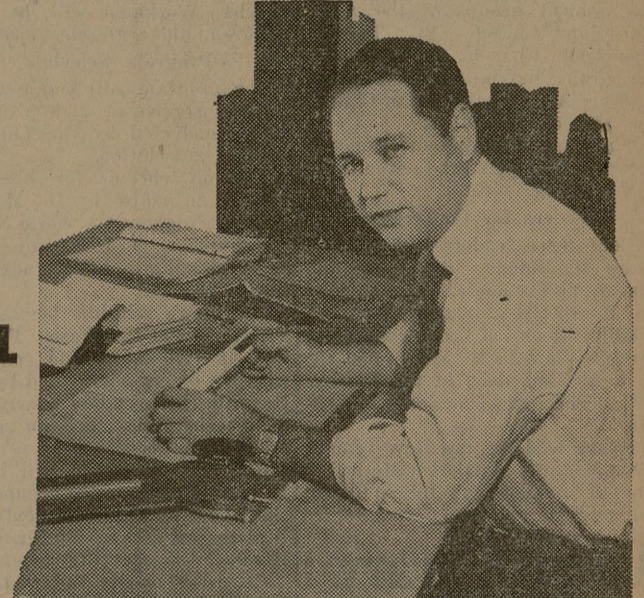

"That the activities and viewpoints of the Water Pollution Advisory Council be coordinated with those of the Water Resources committee in formulating future state policies concerning control and abatement of stream pollution. Water quality controls and development of projects for water quantity must be integrated to provide a practical plan of water supply development."

Native African To Speak On Campus

Julius Decau, a student from Kenya Africa, will visit the campus of Texas A&M from March 10 to 15. Decau will endeavor to bring to the students at A&M his christian convictions and understandings of those problems which mutually affect students in India, Africa and the U. S. A. Social security aspects of The Trade Movement, and the development of co-operative societies, will be his main topic of discussion.

Decau has studied at Ewing Christian College, and Holland Hall at the University of Allahabad, from which he graduated in 1953. His major studies were economics, political science and literature.

What Should You— as a PROFESSIONAL ENGINEER Expect from Your Job?

All Our Engineers Are On Regular Salary — Not Paid By the Hour

- **GOOD SALARY?** It's ALWAYS good at LOCKHEED! Regular performance reviews to give you every opportunity for promotion.
- **PLEASANT WORKING CONDITIONS?** LOCKHEED'S new Georgia Division offers the best—and your associates will be outstanding leaders in their fields. Your work with them will be inspiring and rewarding.
- **CHANCE FOR FUTURE?** LOCKHEED is one of the greatest names in both civilian and military aviation. You can count on LOCKHEED leadership now and in the future—and you can count on YOUR opportunity with LOCKHEED.
- **OFF-THE-JOB ADVANTAGES FOR YOU AND YOUR FAMILY?** LOCKHEED'S Georgia Division, at Marietta, only 8 miles from the Atlanta city limits, offers unexcelled opportunities for healthful, pleasant living, for cultural and educational advantages for your whole family.

North Georgia is famous for its fine climate and outdoor sports. Atlanta's 88 parks cover 1600 acres, and 22 excellent golf courses offer year-round enjoyment.

Desirable, modern housing and gracious Southern living; exceptional schools, colleges and universities; outstanding movie, theatre, radio and television entertainment await the LOCKHEED Engineer and his family. The needs of all creeds and denominations are filled by more than 500 churches.

EVERYTHING you, as a PROFESSIONAL ENGINEER, could want from your job awaits you at LOCKHEED'S Georgia Division

W. R. Parks, Lockheed Counsellor, will be on the campus to talk with . . .

MECHANICAL, ELECTRICAL, AERONAUTICAL, and CIVIL ENGINEERS

MONDAY, MARCH 15th
