Blusterous Beauty Brings Bid For Batt Column Berth

One sweet lass out of all those attending A&M this summer has answered the Battalion's plea for women reporters.

Corona Crumm, sixth year physical education major and prominent sorority socialite from TU, has submitted her application for

Batt employment. Miss Crumm, daughter of Mr. and Mrs. Silas C. Crumm of New Pig Bank, expressed her desire to author a column entitled "Crummy Catches," in which she wishes to expound upon a co-ed's pursuit of male companionship at A&M.

CHS Band Will Wear New Suits

A&M Consolidated High School will have new uniforms for its band members this fall, said Mrs. J. Brusse, publicity chairman of the Consolidated High School Band Booster club.

The new uniforms will be available for the 55-member marching band in time for the first football game.

The new uniforms will be quite a change from the old Eisenhower jacket with white pants the band has worn for the past four or five seasons. They will have maroon hip-length unbelted coats with white trimmings. The cap will be of the air force type, also with white trimming. The pants will be gray with a maroon stripe.

Mrs. Brusse said it would cost the Band Booster Club about \$3100, which the parents are donating.

Mrs. Wesley Smith is president of the club. Robert L. Boone is the band director.

Senior Rings Will Arrive By August 1

544 senior rings, orders 11 and 12, will be in and ready for distribution by August 1, said Mrs. Dell Bauer, ring secretary.

Students that will classify as seniors at the end of the first session of summer school may order rings between July 27 and August 1. These rings will be delivered in September.

Army Will Award Commissions In Friday Exercises

Commissioning exercises for army cadets completing their scholastic requirements for degrees in July will be held Friday, July 16, in room 209 of the military science building at 9 a. m., said Lt. Col. D. F. McGee, the commissioning officer.

The exercises will be informal and uniforms are optional.

Air force commissions will not be awarded until completion of the second summer term, said Maj. H. O. Johnson of the air science department.

Registration To Be In Duncan Hall

Registration for the second summer term here will be held in Duncan hall July 19 from 8 a. m. to 12 noon.

Students will enter the north door of the west wing. Registration cards will be issued outside.

Before registering, students should be sure that they have all their records clear.

1200 Firemen Here For 25th Training Session

The latest in firefighting equipment and technique are being demonstrated this week to approximately 1,200 "smoke eaters" attending the 25th annual Firemen's Training School here at A&M.

H. R. Brayton, director of the school for the Texas Engineering Extension Service, explains the course is aimed at reducing loss to the state's property owners from uncontrolled fires. Since the school started he estimates about \$2 millions has been saved in fire insurance premiums by Texans. The State Fire Insurance Commission now allows three to five per cent reductions in key rates for cities which send firemen to the school.

Firemen are provided "combat" experience in all types of fires during the week-long training. Oil pits, gasoline trucks, butane tanks, a four-room house, wrecked airplanes and automobiles go up in smoke. Then there are lecture periods each day.

Among more than 90 instructors on Brayton's staff are these men from the capital and larger cities in the state:

Austin—Henry Timmerman and Eugene Sanders, State Fire Insurance Commission; William R. Willis and Lester Gross, State Hospitals and Special Schools; Insp. H. B. Whitworth; Capt. Hugh Brinkley; Dee Wheeler, State Department of Public Safety; Jack R. Maguire, Texas Insurance Advisory Association.

Dallas—W. G. Burns, city fire marshal; Hal H. Hood, county fire marshal; William D. Story, Texas Fieldman's Association; C. C. Benson, National Auto Theft Bureau; G. M. Kintz, H. F. Browne, M. Baker, R. D. Bradford, J. B. Hynal, L. S. Kovash, U. S. Bureau of Mines; Vale Fitzpatrick, Mine Safety Appliance company; R. Roy Simmons, training chief; Paul R. Andrews, assistant training chief; Capt. W. H. Sharp, Capt. Guy Harbert, Capt. Jack Wilcher, Engr. W. H. Lumpkin; Hugh V. Keepers, assistant manager of Fire Prevention and Engineer Bureau; A. G. Tipton, General Detroit Corporation; Burr Williamson, C-O-Two Company; T. A. Perry, district chief; O. C. Martin, district chief; Capt. R. M. Nichols, maintenance engineer;

School building men from the six New England State Departments of Education will be special guests to hear Caudill's talk on "Planning a Dynamic Architecture for a Dynamic Education." The meeting, part of a six-day institute, is sponsored by the Cooperative Program in Educational Administration in New England.

Caudill's firm, composed of former teachers and architecture students at A&M College, has built more than 50 schools in Texas and Oklahoma in the past four years. Their designs have won national honors in competition sponsored by the American Institute of Architects and by The School Executive magazine.

The firm's newest project is a \$4½ million school plant in San Angelo. It will include a new \$2 million high school and remodeling and additions to existing elementary schools.

San Antonio—A. L. Rathke and A. G. Campa, training chiefs; Richard Nunn.

Also on the list of instructors are Chief Erwin T. Patterson and Ass't Chief Edgar Mueller from Randolph Air Force Base, and SWO V. Allen and Sgt. Carl Baker from Carswell Air Force Base.

Scoates Promoted To Captain In Local Reserve

1st Lt. W. D. Scoates, who is employed as assistant research engineer with the Texas Engineering Experiment station of College Station, has been promoted to the rank of Captain. Capt. Scoates, who is a member of the 9807 Air Reserve Squadron of Bryan-College Station, is married and has two children. The oldest child, Mary Ellen, is 11 years of age and the youngest is a son, Sam, age 1.

Several members of the 9807 Air Reserve Squadron have completed active duty tours during the month of June. Maj. W. O. Davis and 2nd Lt. C. C. Bellomy completed their active duty training in Austin, while Lt. Col. E. R. Waggoner and Capt. E. J. Schneider spent two weeks at Kelly Air Force Base in San Antonio last month. Capt. W. L. Ulrich took his active duty training at the Bryan Air Force Base. All of these members have Mobilization Training Designations.

Korean Vets Asked To See Advisor

All Korean veterans who do not plan to enroll for the second summer term should report to 102 Goodwin and complete certificate for pay before leaving the college, an announcement from the veteran's advisor said yesterday.

19 A&M Cadets Qualify In Camp Shooting Match

Nineteen Signal Corps ROTC cadets from A&M have qualified with the M-1 Carbine during the opening phase of six weeks of training at Camp Gordon, Ga.

Local cadets who qualified were: Roger E. Sessions, James C. Pigg, Albert G. Schlichter, and John L. Shanks, sharpshooters;

Frank J. Way, Otto G. Anderson Jr., Harry E. Dieckman, Clifford W. Douglas, Allen R. Hemier, Norman B. Kemp, Raymond A. McDaniel Jr., Charles H. Minter, Frank D. Norris, Kenneth L. Scott, Huntly E. Shelton Jr., Carleton K. Sherman, Charles L. Smith, Charles E. White, and Marshall D. Woodruff, marksmen.

Over \$2500 Spent In School Repair

Repairs totaling between \$2500-\$3000 are now being carried out at the A&M Consolidated schools.

Les Richardson, principal of the A&M Consolidated schools, said yesterday that the exterior work on all A&M Consolidated schools would be completed this week. This repair work consists of re-finishing the floors and painting all buildings on the outside.

All labor used in this repair work is furnished by regularly employed personnel of the A&M Consolidated school system. They will spend the remaining part of the summer assembling new desks and chairs for the new high school. In addition, they will prepare the class rooms in the new high school for use this fall.

Group To Pakistan Includes A&M Man

A small group of Texas professional and technical men are expected to arrive in East Pakistan in September to set up headquarters and begin organization of a \$1,700,000 technical assistance program between the A&M College system and the University of Dacca. The work, which will be expanded as additional field staff members are sent from Texas, is being done under a three-year contract recently signed between the Foreign Operations Administration of the United States government and the A&M System.

A&M vice chancellor for agriculture, D. W. Williams, who is in charge of the system's foreign program, is now selecting the key personnel for the project. The initial group will be headed by an administrator with the title of chief advisor and will include teaching, research and extension specialists.

These Texans will work with the schools of the University of Dacca in the development of modern teaching, research and extension programs in agriculture, engineering, home economics, business and teacher training. The Pakistan schools with which they will work include the East Bengal Institute of Agriculture at Dacca, the East Bengal Veterinary College at Dacca,

the Ansanullah Engineering College at Dacca, the Women's Training College at Mymensingh, the Teachers Training College at Dacca, the Primary Training College at Mymensingh and the Government College of Commerce at Chittagong.

Under the \$1,700,000 contract recently signed by the FOA and A&M system, the Texas system is employed to carry out projects and activities in the fields of education, agriculture, engineering, business administration and home economics in order to strengthen the educational, research and extension program of the University of Dacca.

The field staff, which will live in Pakistan, will include the Chief Advisor and twelve professional and technical men. They will study the work of the University of Dacca and its associated schools and make recommendations for improving procedures and adding needed facilities for teaching research and extension. They will organize and supervise new projects and will supervise construction of new facilities.

A small staff will be maintained in Texas to tie in the field work with that of the system and to handle other phases of the assistance program, which will include exchange of teachers and students for training here and in Pakistan. This staff will also select a number of consultants who will visit Pakistan throughout the program for short-time work in their specialties.

Grove Announces Next Attractions

It may be students' last chance to relax at the movies before the final exam cramming sessions start.

"Man Behind the Gun" starring Randolph Scott will be showing at the Grove Tuesday. Wednesday's attraction will be "Return to Paradise" with Gary Cooper.

Heat Hits 109 Yesterday; Whew!

Tuesday was College Station's hottest day of the year, the temperature rising to 109 degrees by 5 p. m.

Yes, its hotter than Hades outside, but the weather bureau reports that indications are it will be cooler by December 1. So until then, residents are advised to sit back and wait for this change to occur.

Coon, Potter Deliver Talks

Jesse B. Coon of the physics department attended a symposium on molecular structure and spectroscopy at Ohio State University June 14 to 18.

The conference was sponsored jointly by the University and the American Physical Society. Dr. Coon delivered a paper prepared by himself and Dr. John K. Ward on research they have been pursuing on molecular structure. Mr. Bobby L. Landrum, a graduate student in the department working on the same project, accompanied Dr. Coon.

James G. Potter, head of the department of physics, participated at a series of meetings in the north central states during the month of June.

At a meeting of the Society for Engineering Education at the University of Illinois June 14 to 18, Dr. Potter spoke on a panel discussion concerned with physics in engineering education. Other members of the panel included Dr. L. A. Du Bridge, president of the California Institute of Technology, Dr. A. P. Colburn and Dr. D. H. Loughridge, deans of engineering at the University of Delaware and Northwestern University, Dr. J. B. Fisk, Director of research, Bell Telephone Laboratories, and Dr. N. H. Frank and L. P. Smith, heads of the departments of physics of the Massachusetts Institute of Technology and Cornell University,
