The Palmers have led lives which took them to various places around the world ever since Vincent, who was graduated from Harvard in 1935, became a member of Dr. Will Beebe's expeditions while attending college, and Lucie, gave up her social position to follow the vocation of deep sea diver and underwater painter in oils.

Mrs. Palmer said that once while she was painting "down under," a giant turtle "posed" for her and "He even helped me finish my painting—in a few gulps!"

Both Vincent and Lucie Palmer have battled sharks, octopi, barracuda, and strange mammals of the deep sea which seldom come to the surface of the ocean.

Vincent Palmer is also the president of Vincent Palmer and company, underwater engineers, devoted to developing the resources of the seas.
