

Fish Bow to Yearlings In Season Finale, 9-0

A pair of talented Shorthorn hurlers left nine Aggies stranded on the base paths in blanking the Fish 9-0 on Kyle field yesterday in the season finale for both teams. Righthanders George Myers and Harry Taylor pitched seven-hit ball

between them to best A&M's left-handed ace, Toby Newton, and hand the Fish their sixth defeat in 11 games. Newton finishes the season with a 2-2 record, and 53 strikeouts. He whiffed 11 Yearling batters yesterday while giving up 10 hits and issuing four free passes.

Taylor gave up only one hit, a triple by Ed Dudley, in three innings of pitching, and fanned six. He struck out the first four men to face him.

Myers, who retired in the seventh for a pinch-hitter, gave up six hits, all singles, in his six inning stint. He hung up 10 strikeouts.

The Shorthorns wasted no time in scoring in the first inning, pushing across two runs on a single, walk, error and two stolen bases. Woody Woodman, Texas second baseman, singled to lead off the first frame, Wayne Graham walked after one out to push Woodman to second. Woodman stole home and Graham came in on an error by first baseman Bobby Conrad.

A&M threatened in its half of the first as John Cantrell and Gordon Maxwell singled after one out. Myers bore down, however, and got Dudley on strikes and Conrad on a fly-out to end the inning.

Texas picked up two more runs in the third. Woodman led off with a walk, stole second and came in on a single by Graham. First sacker Jerry Good drove Graham home with a sharp single through the pitcher's box.

The Fish staged their most serious threat of the afternoon in the last of the sixth with Maxwell and Dudley smashing singles, and Frank Krupa working Myers for a walk to load the bases.

James Smotherman fell away from an inside pitch that hit his bat and rolled fair in front of the plate. The Shorthorn catcher grabbed the ball, stepped on home plate,

Ag Fencers Win SWC Title

A&M's fencing team walked away with the Southwest conference championship for the third straight year by downing strong teams from Texas and Rice here last Saturday.

Co-captain Bill Huettel and Don Burton won individual championships. Huettel won top honors in the sabre division, and Burton took first in the epee. Don Cashey of Rice copped the foil championship.

The Cadet foil team, composed of Don Roth, Jerry Ramsey, Carl Hill and Johnny Shanks, won five to four from Rice, but lost by the same margin to Texas. Jim Pigg, Burton and Carl Wagner carried

and relayed to first before Smotherman could regain his feet.

Ken Keener walked to load the bases again, but Bobby Durham was called out on strikes to end the inning, and the rally.

Maxwell led A&M at the plate with two hits in three trips. Dudley had two for four and finishes the season with a lofty .488 average, highest on the Fish squad. Dudley also got the game's longest hit, a triple, in the eighth.

the epee team to victory by winning 15 out of 18 bouts.

A&M's sabre team also took first place as Huettel, Co-captain Art Garner and Hill took 12 of 18 bouts. Rice finished second in the meet, and Texas third.

Elections for next year's officers were held immediately after the meet. Roth and Hill were elected co-captains, and Nelson Bourn secretary.

What young people are doing at General Electric

Young scientist works on new ways to handle "hot" radioactive fuel

Whenever uranium is "burned" in an atomic reactor, certain valuable elements such as plutonium are left behind in the "ash."

These products are highly radioactive, but they must be recovered because of their great value to the atomic energy program.

This is the job of 31-year-old H. Ward Alter, Supervisor of the Separations Chemistry Unit at the AEC's Knolls Atomic Power Laboratory, which General Electric operates in Schenectady, N. Y.

Alter's Work Is Vital, Important

Alter is doing his job well. He has already received the Coffin Award, General Electric's highest honor, for developing an apparatus that makes possible faster, safer, and more efficient recovery of the valuable elements in the "ash."

The work done by Alter and his group helps lower costs, increase efficiency and expand our knowledge of the chemical processing of spent radioactive fuels.

25,000 College Graduates at General Electric

When Alter came to General Electric in 1948, he already knew the work he wanted to do. Like each of the 25,000 college-graduate employees, he was given his chance to grow and realize his full potential. For General Electric has long believed this: When fresh young minds are given freedom to make progress, everybody benefits—the individual, the company, and the country.

Progress Is Our Most Important Product

GENERAL ELECTRIC

H. WARD ALTER joined G.E. in 1948 at Knolls Atomic Power Laboratory after receiving a B.A. in 1943 and Ph.D. in Chemistry in 1948 at U. of California. He served with the Manhattan Project at Oak Ridge, 1944-46.
