A&M Hosts 1,600 At Annual State 4-H Club Round-Up

This year A&M again is host to the state 4-H Round-Up, sponsored by the Agricultural Extension Service.

About 1,600 persons — district delegates, adult leaders, and county extension agents — registered for the conference yesterday afternoon and attended the first program last night at Guion Hall, where they heard an address by George Foster, associate leader in 4-H Club programs with the Fed-

eral Extension Service in Washington, D.C.

The group is staying in the new area dormitories on the campus.

Today the short courses got underway, along with the judging contests and team demonstrations. At 1:15 p.m. in Guion the 4-H-ers saw the Texas premiere of "The Town that Came Back," a movie made by the Ford Motor Co. showing how a small Missouri town was brought back by the 4-H Club.

At 6:30 tonight the group will enjoy a chuckwagon feed sponsored by the Texas 4-H Recognition Committee. At 8 o'clock they will move to Kyle Field for the Share-the-Fun Fest, where entertainment will be provided by district contest winners.

Tomorrow the short courses will continue. These comprise everything from agricultural engineering to farm and home development, and include practically every phase of agriculture and home economics.

The round-up will end Friday night with the state 4-H recognition banquet at Duncan Hall, followed by a program at Guion Hall, both sponsored by Sears, Roebuck, and Co.

Engineers Library Gets New Collection

An outstanding library of engineering books, documents and maps, totaling more than 13,500 pieces, has been presented to the Texas Engineers Library by Mrs. J. F. Springfield of Austin.

Collected by the late Mr. Springfield, civil engineer widely known throughout the state as a utilities expert, the material is the result of a lifetime of gathering and preserving engineering materials, chiefly federal and state documents. The collection includes important sets of the United States Geological Survey bulletins, monographs, water supply papers, mineral resources, professional papers, annual reports and geologic folios.

Other material includes U. S. Department of Agriculture soil surveys of the 48 states, annual reports, yearbooks, technical bulletins and farmers' bulletins. The collection also contains U. S. Army Engineers Reports on Rivers and Harbors, U. S. Bureau of Standards Reports, U. S. Coast and Geodetic Survey Reports and many other federal documents.

The collection is expected to materially strengthen the water and transportation information files of the Engineers Library, particularly the water collection project started in 1952 by the Water Research and Information Center of the Texas A&M System.

Estimated value of the material is \$25,000, but it is considered priceless by researchers.

Staff Member Is At AMS Meeting

Dr. Maurice H. Halstead, associate professor of meteorology and staff member of the Department of Oceanography, is participating in the first meeting of the Agricultural Meteorology Committee of the American Meteorological Society held in conjunction with the Society's 137th national meeting at Kansas City.

Formed in June of 1954 in recognition of the increasing importance of agricultural meteorology, the committee has as its purpose the promotion of research in this field and its applications in the solution of the unique problems of agricultural meteorology.

Weather Today

PARTLY CLOUDY

Skies today will be partly cloudy, with a possibility of scattered thunder showers late this afternoon. Yesterday's maximum temperature was 93 degrees; this morning's minimum, 67 degrees. Rainfall was .6 inches.

WRONG NUMBER — Seventeen year old Marilyn Miller makes the last call of the last cranktype telephone in service, before it was replaced in Whitney, Tex. Miss Miller had been selected as "Miss Dial Telephone," in a contest that highlighted a community celebration on the day of complete change-over to modern telephone service. The other girls are, left to right, Carol Haima, Betty Eubank, Joy Webb, and Jackie Woodside.

Spanish Dances

Inesita Appears Tuesday

The first appearance here of Inesita at 7:30 p.m. Tuesday, June 14, in the Memorial Student Center promises to prove an attractive event, for she has achieved international recognition for her artistry and virtuosity in Spanish dance.

It is noteworthy that the climate, topography, and architecture of Southern California, where Inesita grew up from childhood, bear a close resemblance to that of the province Andalusia in Southern Spain.

More important, here live large numbers of Spanish-speaking people whose traditions go directly back to Spain itself. On Saturday nights and special holidays no party is complete without the singing of regional songs, including the Flamenco of Andalusia, and dancing to Paso Dobles, Sevillanas, and Jotas. It was in this atmosphere that the talents of Inesita were nurtured throughout her early years.

The dancer was only of high school age when she secured her first employment in a restaurant on Olivera Street in the old Spanish quarter of Los Angeles. Here she danced each night for many months with a Spanish orchestra for accompaniment.

Dow Chemical Co. Awards Given

Roy E. Mitchell of Fort Worth and Robert J. Ring of Wichita Falls have been named winners of freshman scholarship awards sponsored by the Dow Chemical Company, announced Dr. F. W. Jensen, head of the chemistry department, and Dr. J. D. Lindsay, head of the chemical engineering department.

Mitchell won the award for chemistry, and Ring, the award for chemical engineering.

The awards amount to \$200 each and will be distributed during the sophomore year. Their purpose is to encourage higher interest in the fields of chemistry and chemical engineering and to promote higher scholastic achievement in these fields.

At The Grove

Thursday, June 9—"Beach Head" with Tony Curtis and Frank Lovejoy.

Monday, June 13—"Because of You" with Loretta Young and Jeff Chandler.

Tuesday, June 14—"The Mississippi Gambler" with Tyrone Power.

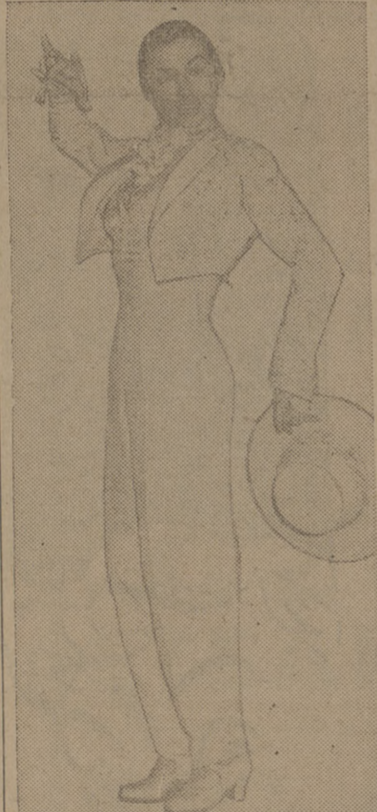

Wednesday, June 15—"Her Twelve Men" with Greer Garson and Robert Ryan.

Quickly the word went out among the aficionados of dancing that this young Californian would bear watching. It was said of her then: "She is accomplished in the

style of Andalusia without making a step or movement in bad taste, manifesting elegance and refinement and exquisite distinction, putting in it all the soul of an exceptional artist."

The teacher to whom Inesita is most indebted for her training in the classic dance is Jose Fernandez, a disciple of the legendary Argentina, himself a brilliant artist with the castanets and a highly admired exponent of the classic dance. Inesita studied Flamenco with Joan el Estampio, the foremost maestro of the Flamenco dance in Spain today.

Tickets to the performance are on sale now at the main desk of the MSC. Admission to those who do not have a season ticket to the summer series will be 75 cents.

Inesita At MSC Tuesday

AVMA Chapter Elects Officers

Joe West was elected president of the A&M junior chapter of the American Veterinary Medical Association for 1955-56.

Other officers elected were Bill Ard, president elect; Jerry Van Hooser, vice-president; E. T. (Zeke) Skidmore, secretary and treasurer; Willie Buller, reporter; Rob Dubose, parliamentarian; and Delbert Davis, sergeant at arms.

Sponsors for next year will be Dr. A. A. Price and Dr. R. D. Turk.

Aggie-Ex Writes Book On Fishing

"Night Fishing in Texas," by John W. Honea, '48, has been published by the Naylor company of San Antonio.

The book contains information for Texas fishermen and was compiled from data gathered during weekend and vacation fishing trips.

Honea helped pay his way through college by selling bullfrogs to Houston hotels, during which time he began gaining data for the book.

Couch Gives Paper

Dr. J. R. Couch of the departments of Poultry Husbandry and Biochemistry & Nutrition recently appeared on a radio program with Secretary of Agriculture Ezra Taft Benson. Couch was in Chicago to give a paper, "The Atomic Age of Poultry Nutrition," before an estimated 1,500 persons attending the American Feed Manufacturers' Meeting.

Summer Enrollment Shows Good Increase

Final Total Could Reach About 1,900

The summer school enrollment at A&M this year has shown a considerable increase over that of last year. Although final figures are not quite ready, Registrar H. L. Heaton reported that through yesterday 1,672 students had registered at the college for the summer term.

This figure compares very favorably with last year's total of 1,338. Neither includes the students registered at Junction. Last year, 138 students were at the summer Junction school, and unverified reports have placed this summer's total there as around 180.

Adding this Junction figure to the total here, the summer enrollment figures to be around 1,850. Since 59 students registered later in the summer last year, Heaton, estimating a like amount of increase this summer, placed the final expected figure to be around 1,900.

In the final breakdown between last summer and this summer, counting students both here and at Junction, there were 1,555 students last year and around 1,900 expected this summer.

Exactly why the enrollment was so much better this year cannot be immediately answered. Heaton had expected the enrollment next fall to show an increase. This summer's showing possibly could be an indication of that increase.

And, by the way, of the students registered here, 102 are female. This compares with 84 "Lady Aggies" last summer. No breakdown was immediately available as to just how many are married and how many are single.

Male summer school students are living in Puryear, Law, Leggett and Bizzell halls. Hart Hall has been kept aside for special short course housing. The ladies are living in private homes and apartments in the area.

As far as payment of student activity fees this summer, 678 had bought activity cards through yesterday. Last summer, the figure was less than 400.

Scout Leaders' Meeting Is Tonight

The Arrowmoon District will have a combined meeting of the Scout Leaders Roundtable and the Explorer Leaders Roundtable at 8 tonight. The meeting will be held at the Troop 80 Scout House in Sue Haswell Park in Bryan.

Roundtables for the coming year will be planned tonight. Every Scout troop should have their Scoutmaster, Assistant Scoutmasters, advisors and Troop committee chairmen present for the meeting.

The Explorer units should have their advisors, assistant advisors and committee chairmen at the meeting.

Library Shifts Will Be Made This Month

Several changes in the arrangement of the library will be made this month, according to Robert A. Houze, librarian.

The books for reserve and required reading will be moved soon to the new room on the first floor. At the same time the catalog department will be moved from the second floor to the present reserve and required reading room on the third floor. The old cataloging room will become the science and agricultural reference room.

The order and bindery preparations departments have already been moved to the third floor. The Asbury room will remain on the third floor as a browsing room but will be equipped with tables and chairs for study purposes.

Study carrels for the use of graduate students and the faculty will be set up in the air-conditioned basement.

These changes will place all public service departments on the first and second floors and all the technical processing departments on the third floor.

Hornbeak Honored By AGC Chapter

The student chapter of the Associated General Contractors, composed of architecture students in the architectural construction option, A&M College, recently presented a gift certificate to their faculty sponsor, Harold Hornbeak. Mr. Hornbeak is an assistant professor in the Architecture Department.

The certificate was presented to him by C. D. Foxworth, president of the AGC student chapter in appreciation of his efforts in their behalf during the past academic year.

Two Students Charged With Theft At A&M

Two A&M students have been charged with misdemeanor theft of articles belonging to the Athletic Department at the college. The charges were filed in justice court.

Charged are Gerald K. Forester, 19, a last year's freshman from Fort Worth, and Carl E. Green, 18, from Austin, also a last year's freshman.

Forester was released on bond in his hometown Tuesday, after Bryan Sheriff J. W. Hamilton and Deputy Billy Hanover had found several pieces of athletic equipment at his home.

Green was released Saturday after other pieces of athletic equipment had been found in a cabin he had rented at a tourist court.

Included in the equipment taken were various kinds of balls, warm-up suits and shoes.

Sheriff Hamilton said that Green admitted taking the articles, and that he said he intended to return them.

Trial for the students will be held later.

So far, no action has been taken by the college, but Lt. Col. Taylor Wilkins, assistant commandant, said that definite action will be forthcoming.

Warden School Has 15 Graduates

Fourteen men chosen by the Texas Game and Fish Commission and one regular student of A&M were graduated from the college's Game Warden school this week.

The school for wardens, offered by the college's Department of Wildlife Management and the Commission, consists of a full se-

mester of intensive training. Instruction is given both by regular teaching staff and by seasoned game wardens.

Those graduating were R. L. Flanagan of Comanche, William V. Lowry of Quanah, N. E. Glover of Gatesville, Weldon Fromm of Childress, Travis L. Hobbs of Fort Worth, Sherman Bales of Marshall, Robert Lys of Wheelock, Charles McCallum of Mesquite, Bill Hoyle of Georgetown, Billy V. Perkins of Pearland, George W. Vickers of Van Horn, Charles W. Burnette of Bagwell, Sanford DeVoll of San Saba, James D. Clay, and Homer A. Floyd of Beaumont. Clay has been assigned to the Anahuac area for duty.

Staff Members Revise Text Book

A new, second edition of "Propagation of Horticultural Plants," written by Dr. Guy W. Adriance and Fred R. Brison has been announced by the McGraw-Hill Book Co. of New York City.

The publishers say, "For the past 15 years this top-level work has been generally regarded as the standard text for undergraduate courses in the subject."

"This book is designed as a basic text for college students in horticulture, and also for the amateur propagator and gardener who is interested in both a broad survey and in accurate, detailed information."

The authors are, respectively, head of the department, and professor in the Department of Horticulture at A&M.

GRADUATION DAY—Dr. J. E. Adams, Dean of Agriculture, presents a diploma to James D. Clay of Fort Worth, who was graduated from the college's Game Warden School this week. The school is offered by the Department of Wildlife Management and the Game and Fish Commission.
