

New Student Rights Respected, Morgan Says

Every student has rights which are to be respected, Dr. David H. Morgan, president of the college, told the class of '59 at the annual welcome address Monday night in The Grove.

No officer or student shall violate those rights, he told more than 1,700 students gathered for the occasion.

"All development does not come from classrooms," he said, "but extra-curricula activities develop a student into a well rounded indi-

vidual." Morgan said this group is particularly important—"A&M student life is dependent on this class; as you go through, look for changes which will help A&M."

Morgan gave a brief discussion of the college and its departments. A&M is one of seven military colleges and is "outstanding," he said.

"We hope you will go through this week and decide you are here because you want to be here and not because an uncle or cousin

wanted you here," said Morgan. "If there is a feeling of resentment, it's not our fault."

About 91.4 per cent of the freshmen enrolled have signed up for ROTC, Morgan said.

Morgan then read parts of the basic policy of the college. One quote is that a student has the privilege of the best use of his time toward an education.

C. H. Ransdell, acting dean of the Basic Division, served as master of ceremonies.

Engineer Dean Takes Over New Position

A&M's new Dean of Engineering, Dr. John C. Calhoun Jr., has been nationally recognized as one of the nation's top petroleum and natural gas engineers. He came to Texas A&M, assuming his duties Sept. 1, from a position as professor and head of the Department of Petroleum and Gas Engineering at the Pennsylvania State University.

Dr. Calhoun will head the engineering teaching, research and extension work of a major part of the A&M System, directing the School of Engineering at A&M College and the work of the state-wide Engineering Experiment Station and Engineering Extension Service.

He has served as an independent consultant to many national oil producing and exploration companies. He is chairman of the Mineral Engineering Division of the American Society of Engineering Education. From 1947 to 1951, Dr. Calhoun wrote the regular weekly feature, "Engineering Fundamentals," for the Oil and Gas Journal. Later these columns were revised and published in book form under the title "Fundamentals of Reservoir Engineering."

A 1937 graduate of Pennsylvania State University, where he also took his M.S. degree in petroleum and natural gas engineering in 1941 and his Ph. D. in the same field in 1946, Dr. Calhoun served as research worker and teacher at his alma mater from 1937 to 1946. From 1946 to 1950 he was at the University of Oklahoma, where he became chairman of the School of Petroleum Engineering, before returning to Penn State in 1950.

A native of McKean County, Penn., Dr. Calhoun is 38 years of age, married, and the father of four children.

Freshmen

(Continued from Page 1)

night in The Grove for all students desiring to attend. Tomorrow morning, new students will tread the floors of Sbis Hall to register for the fall semester and get their first taste of Aggie registration.

Freshmen will be allowed to return home for the weekend upon completion of registration. All upperclassmen will register Saturday according to the published schedule. Classes will begin at 8 a.m. Monday morning.
