

No Kids, Please

A Southwest Conference school's president said last night that Texas Tech's chances of getting in the conference are encouraging. He mentioned that representatives of other schools said "it would be good to have Tech in the conference."

But another matter was brought up that should be a cause for concern. This was another mentioning of the University of Houston for the conference. On this point, we would all do well to take Rice Institute's apparent attitude toward its neighboring school—just pretend it doesn't exist.

Aside from the financial standpoint, it's almost a shame that A&M plays the Cougars. Football is an inter-collegiate sport, or is supposed to be. It is not, in all but reality, a way to fill the money coffers of academic institutions.

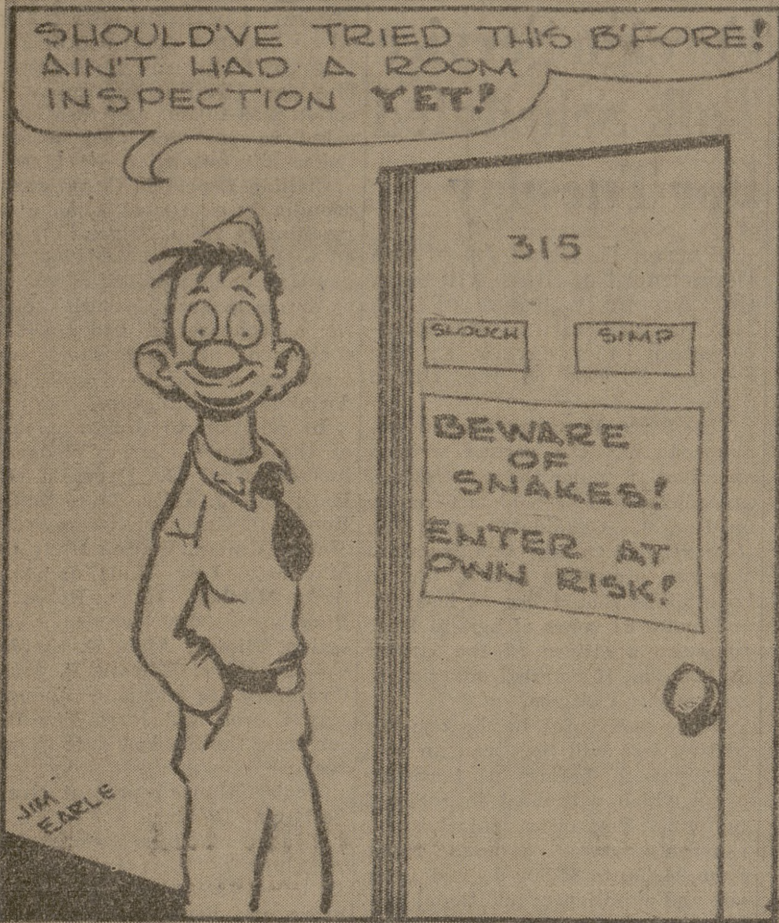

Students here have never, in so far as we know, asked to take a hand in who we play or who gets in the conference. But our team is one of our sports representatives, and we should have some right to express concern about questionable opponents.

UH has a good team, even though they lost their heads in the second half last Saturday. But their student body lost their heads during the entire game and afterwards. And have been doing so ever since we started playing them.

In some cases, surely, Aggies were at fault. But last week the students of our school underwent quite a bit of filthy and obscene remarks, plus a brutal attack, almost certainly at the hands of UH "tough guys." On the whole, the Aggies restrained themselves remarkably well.

And last year in Houston was even worse. Houston is a young university, big and brawny. And until the student body there evolves from its infantile ways, it has no place among its elders in the Southwest Conference.

The Battalion

The Editorial Policy of The Battalion Represents the Views of the Student Editors

The Battalion, newspaper of the Agricultural and Mechanical College of Texas and the City of College Station, is published by students four times a week during the regular school year. During the summer terms The Battalion is published once a week, and during examination and vacation periods, once a week. Days of publication are Tuesday through Friday for the regular school year, Thursday during the summer terms, and Thursday during examination and vacation periods. The Battalion is not published on the Wednesday immediately preceding Easter or Thanksgiving. Subscription rates are \$3.50 per semester, \$6.00 per school year, \$6.50 per full year, or \$1.00 per month. Advertising rates furnished on request.

Entered as second-class matter at Post Office at College Station, Texas, under the Act of Congress of March 3, 1879.

Member of The Associated Press

New Singing Cadets Named

The Singing Cadets have almost all new personnel this year. New members, mostly freshmen, have been accepted into membership, Bill Turner, director, said yesterday.

The new members are S. M. Gasaway, George P. Ottis, W. M. Huskinson, Sam D. Taloe Jr., Armond A. Buller, Kenneth R. Nerrettig, Don E. Linenberger, Elton Irving Wade, Michael K. Kohler, Charles E. Griffin, John W. Reynolds, Norman J. York, John W. Warner, Glenn Allen Estes and Deaine M. Heller, and Ben F. Yount.

Charles H. Robison, Emmett C. Flanagan, Arthur L. Cameron, Clem C. Sherek, Don Darrell Pullen, Don W. Morre, Robert Leon Moody, Albert L. Swink, Donnie R. Duplissey, George E. French, John

Irby Receives Pet. E. Fellowship

Tom L. Irby has received the Stanolind Foundation fellowship in petroleum engineering at A&M for the 1955-56 academic year. Stanolind Foundation, Inc., was created and is supported by Stanolind Oil and Gas Company of Tulsa.

The fellowship in petroleum engineering carries a stipend of \$1,500 and covers costs of tuition and fees. The college selects the fellow.

Irby's home is Mt. Vernon. He is a graduate of Mount Vernon high school and Texas A&M, with a B.S. degree in petroleum engineering. He will study for his M.S. degree as a Stanolind fellow. He is married and has one child.

Williams To Speak To ACS Monday

Dr. Roger J. Williams, director of the Biochemical Institute of the University of Texas, will speak to the local section of the American Chemical Society Monday at 8:15 p.m. in the Chemistry Lecture room.

Dr. Williams will speak on "A New Application of Chemistry-Chemical Anthropology."

He will point out how, in our need to understand people, this new science can be used to develop our society.

He received his BS from the University of Redlands in 1914 and attended the University of Chicago where he received his MS in 1918 and Ph.D in 1919.

Known in his profession as the discoverer of pantothenic acid, Dr. Williams is famous for his work on microbiological assay methods and applications, microanalysis and cancer research.
