Speed Limits Made To Save Your Life

Christmas recess begins Saturday at noon. You are a little late getting away from the campus, and are in a hurry to get home and start enjoying your 16 glorious days of vacation.

It is more than a hundred miles home, and you think you have to be there two hours after you leave the campus.

You're doing fine, almost home and in fifteen minutes less than record time. In fact you are overjoyed by your new record and are going so fast that you don't see that car in front of you in time to stop.

Crash! Now you can spend the rest of your 16 days in a hospital. If you're lucky you'll be able to come back to class Jan. 3. If you're not your parents may be attending your funeral. Either way you lose, and if you had just taken your time it could have been avoided.

Remember when you start home, don't drive over the speed limit. One in every five urban accidents is caused by excessive speed, and more than 38 per cent of traffic fatalities in rural areas were needlessly caused because someone was driving too fast.

When you start back after the holidays, leave home early enough so you won't have to drive fast. The administration has added an extra day to the vacation so you will have plenty of time to get back to school without setting any speed records.

Negroes Organize Panel

A group of College Station Negro residents have set up an organization patterned along the lines of a chamber of commerce with the goal of "improving the economic, recreational, health and welfare of Negro residents in the community."

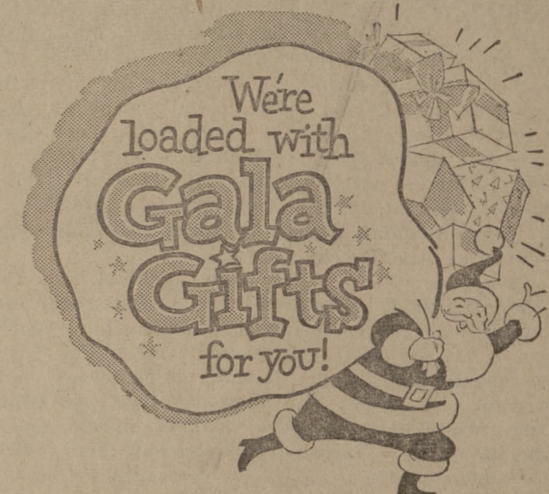

Several preliminary meetings were held, at which the problems of the community were discussed, and then the council was formed and officers elected.

Henry Williams will serve as president; James Stewart, vice-president; D. B. Washington, secretary; Riley Woods, treasurer; and Phillip Steen, chaplain. Walter Steen is chairman of the board of directors, whose members include the Rev. L. W. Flowers, Sam Pearce, W. A. Tarrow, Sam Kearney, James Stewart Jr., Tommy Preston, Effie Hollie and A. C. Clark.

W. A. Tarrow, principal of Lincoln School, and a member of the board of directors, stressed that the newly formed organization had no connection with the National Association for the Advancement of Colored People.

"We merely want to encourage the people in our sections of the community to take pride in their surroundings and help them improve their living conditions," Tarrow said.

"Most of our home-owners want to be proud of their surroundings, and we plan to give them an opportunity to help themselves."

Disdainful of dust or water...
Immune to jars and jolts...
Winds itself as you wear it

OMEGA Seamaster®

Preferred by all active men who seek a dependable self-winding watch

The weakest point in ordinary waterproof watches is the fit of the crystal. Under extremes of temperature it expands or contracts. Each little opening permits dust or dampness to penetrate. The steel-rim, pressure-fitted Seamaster crystal maintains a perfect seal under all conditions. The unique Hydro-Seal back and Hermetic Crown give additional immunity. Of all water-resistant watches we consider the Seamaster best.

In stainless steel and 14 karat gold, \$95 to \$775. Federal tax included. Silver-white or black dials, also calendar-date models.
