

Plant Protection School Has International Touch

The third Industrial Plant Protection School to be held here Feb. 6-11, will take on an international flavor. Industrial plant protection personnel from all over Texas, many states and foreign countries will attend.

The school will be conducted by the Engineering Extension Service in cooperation with the Texas Education Agency and is sponsored by the Industrial Plant Protection Association of Texas.

One of the instructors will be an industrialist from Venezuela.

Purpose of the school is to provide plant protection personnel with practical, down-to-earth training in all practices and procedures related to plant security; to help instill in those attending a firm knowledge of the basic fundamentals of their job.

More than 55 topics will be covered. Among the topics are responsibilities and duties of plant officers, patrol activities and related problems and others.

Cape buffaloes are Africa's most deadly and vindictive animals, says the National Geographic Society. Wounded, they have been known to ambush hunters. Not content with killing their victims, they trample them with ax-sharp hoofs.

Fred A. Wolters, who for the past seven years has been associated with the Texas Agricultural Experiment Station here, has left the A&M System to take a position with the Texas Prison System. He will be assistant to Byron Frierson, who is in charge of agriculture for the Prison System, with headquarters at Sugarland. Wolters will work primarily with marketing of agricultural products produced by the Prison System.

Fred A. Wolters Leaves A&M System

Wolters Leaves Ag Exp Station

He was very active while here, being associated with the Former Students Association and president of the Brazos County A&M Club in 1954. A veteran of World War II with service in the Philippines, he now holds the rank of major in the Organized Reserve Corps.

The Wolters have four children.

This Survey Did Not Include Texas A&M

There's quite a gap between the ideal campus beauty queen and the average American woman, as statistics depict her.

So it seems, at least, to Jerra Lynne Tyler, this year's Helen of Troy at the University of Southern California.

For when Jerra Lynne matched her own dimensions against those reported by Henry Dreyfuss, one of the nation's foremost industrial designers, in his best-selling book, "Designing for People," she found that she was far from "average."

The Dreyfuss typical figure, which was developed after years of research and which serves as the model for the scores of products he designs, is five feet, three inches tall, and has a 39-inch hip spread, a 35-inch bust and a 29-inch waist.

Compared with her, Jerra Lynne towers to five feet, six inches, and measures 36 inches in the hips, 36 in the bust and 25 in the waist. A junior at USC and a major in business administration, she admits that she's not one bit envious of this mythical average woman Designer Dreyfuss has conjured up and christened "Josephine."

In the course of his research, which involved the collaboration of ear doctors, neurologists, psychologists and opticians, Dreyfuss found that three and eight-tenths per cent of American women are

left-handed, two-tenths of one per cent are color blind, four and one-half per cent are hard of hearing, and fifty-six and four tenths per cent wear glasses.

Jerra Lynne pleads "not guilty" on all scores.

But the Dreyfuss average woman, although she may win no beauty contests, has proved immeasurably useful to the industrial designer as the target consumer for whom he designs everything from telephone head sets to the interiors of hotel rooms.

Hogs Nip TCU; Tie Ponies For Lead

FORT WORTH—(AP)—Arkansas' cagers remained unbeaten in the Southwestern Conference play here last night and pulled back into a tie for the lead with Southern Methodist on a 74-72 victory over Texas Christian.

The Ponies and Porkers have 5-0 league records and will meet Saturday night at Fayetteville, Ark., for temporary settlement of the dispute.

Arkansas' verdict over the Frogs wasn't so close as the score indicates, but the final gun nipped a threatening TCU comeback.

AH Professors Serve As Judges

Two members of the Animal Husbandry Department served as judges in the recent Lampasas County Fair.

They were Dr. J. C. Miller, head of the department, and J. W. Gossett. Dr. Miller then went to Fort Worth to participate in a meeting of the State Livestock Brucellosis Committee.

The Lampasas County Fair, in which both judged in the junior livestock show section, includes fat steers, breeding heifers, fat lambs, breeding ewes, fat barrows, bred boars and bred gilts, making it one of the larger county shows in the state.

Robert Fulton's steamboat, "Clermont," began regular service in 1807.

Kurnick

(Continued from Page 4)

ceived a master of science degree in biochemistry and nutrition in 1955.

His award was made on the basis of outstanding scholarship record and potential importance of the work to be done.

HEY, SLOW DOWN! WATCH THESE LUCKY DROODLES!

WHAT'S THIS?
For solution, see paragraph below.

QUICK WAY TO BETTER TASTE: It's illustrated in the Droodle above, titled: Lucky smoker opening fresh pack. (He's merely doing away with a little red tape.) Better taste is what he's after, and better taste is what he'll get. Luckies taste better, you see, because they're made of fine tobacco . . . light, mild tobacco that's TOASTED to taste better. Break out a pack of Luckies yourself. You'll say Lucky Strike is the best-tasting cigarette you ever smoked!
