

# News Briefs

Michael V. Krenitsky, assistant librarian at Cushing Memorial Library, who is working on his Ph.D. in agricultural economics, has been elected for membership on the committee on Professional and Educational Problems of the International Association of Agricultural Librarians and Documentalists.

Dr. Lawrence S. Dillon, associate professor of biology, has written the lead article in the current issue of Science magazine titled "Winds in Climate and Life Zones in North America". The article deals with the climatic conditions that existed during the Last Ice Age and the effects of the ice-sheet on the distribution of plants and animals in North America.

Agtex Beauty Suzone Fayne, a six-year-old cow in the Dairy Husbandry Department has produced 21,850 pounds of milk, 724 pounds butterfat produced on twice-daily milkings for 365 days. This is an average of 28 quarts daily for one year.

Prof. J. K. Riggs of the Animal Husbandry Department spent two days in San Antonio this week reporting on two years of research into performance and killing qualities of Santa Gertrudis steers under various methods of management to the Santa Gertrudis International.

## At Other Schools

### Frogland Living Under Probation

By JIM BOWER

A heavy axe will hang over TCU students' heads for the next few weeks.

It seems that the Froggies "Ranch Week", an annual affair celebrating western customs has been placed on probation in lieu of further misconduct on the part of the celebrating students.

The probation was brought about by "a large scale violation of the University's alcoholic beverages regulation last year." It was stated that the probation was in effect, an appeal to students to help make Ranch Week a "high class affair."

**Better build a fence around "the old water hole."**

Wading through the editorials we notice that TCU has made a decision to add 10,000 seats and a \$100,000 press box to Amon Carter football stadium as an incentive toward bringing top collegiate grid teams to Fort Worth.

There was no need for this since we were planning to come anyway.

#### Baylor

Turning to Baylor, we see where some young lady has written an editorial blasting what she calls segregation of women by the American male—especially in the field of business. She states in her tirade that the United States constitution guarantees every citizen the right to liberty, life and the pursuit of happiness.

We always thought that men themselves were enough of a guarantee to life, liberty and the pursuit of happiness for women. No need for government interference.

Elsewhere in The Lariat we find the following:

"In the Spring a young man's fancy . . ." and so is a young woman."

We'll drop the subject. No use to talk of things like that here. SMU

#### The Hilltoppers are at it again.

Apparently ignoring the sympathies of their own Dr. Mouzon, of A&M probation fame, the SMU Campus is on the move to let Texas Tech into the Southwest Conference.

Currently, they (The Campus) are conducting a survey to determine just how SMU students feel about letting Tech into the conference. Also, the Student Council, by a 13-3 vote has passed a resolution concerning the Tech admittance controversy directed to the Faculty Athletic Committee.

Tread lightly Ponies. Faculty committees play for keeps. But good luck, Texas Tech.

#### Texas

Naturally the thought of faculty intervention brings us to the problem at UT.

Willie Morris, Daily Texan editor, has received added support in his battle against the Board of Regents. J. Frank Dobie, sage of Texas folklore, has added fuel to the fire with his blistering attack on the Regents. We had to turn to "The Texas Observer" for all the letter—it got censored, too.

To you Editor Morris, we have just one request. Please put The Battalion back on the mailing list. We are on YOUR side, boy.

The United States government is officially represented in more than 60 international organizations.

## Center News

The Memorial Student Center has various events coming up of interest to students and others.

Cafe Rue Pinale will be held at 8:30 p.m. Friday in the game room of the MSC.

An Intercollegiate Talent Show audition trip to the University of Texas and Lon Morris College will be made this weekend by members of the Music Group.

The Music Group, Dance Group, Dance Classes, Film Society Junto and Bowling Committee will meet in the MSC Monday night.

The MSC Directorate will meet at 4 p.m. Tuesday in the Center.

A directorate's assistants' meeting will be held at 7:15 Tuesday in the Directorate's office.

The Bridge Committee, Dance Classes, Public Relations Group and the Camera Committee will meet in the MSC Tuesday.

The television set in the Serpentine Lounge is on from 8:30 a.m. until 10:30 p.m.

## Castle To Speak

Ralph Castle will speak in the Anderson School Auditorium on State Highway 90 at 3 p.m. Sunday afternoon.

On nationwide tour as a member of the Christian Science Board of Lectureship, Castle will speak on "Christian Science: Healing by the Power of God."

Castle is speaking under the auspices of Christian Science Society of Anderson.

## What young people are doing at General Electric

### Young manager handles finances for \$40,000,000 business

General Electric is made up of more than 90 product departments that operate as individual "businesses" — each conducting its own legal, financial, manufacturing, engineering, marketing and research activities.

One of the most important of these businesses is the Technical Products Department that makes broadcasting and communications equipment and semi-conductor devices. Responsible for managing the finances of this \$40 million business is Robert H. Platt.

#### Platt's Work Is Important, Responsible

In the next ten years, the Technical Products Department is expected to reach the \$100 million mark — more than doubling its present size. This is a big job. And it requires Platt to keep tabs on everything from tax, cost, and general accounting to payrolls, budgets and measurements, credits and collections, and internal auditing.

#### 25,000 College Graduates at General Electric

Experience gained in the Business Training Course and as a traveling auditor gave Platt a variety of financial experience. Like each of our 25,000 college-graduate employees, he was given the chance to grow and realize his full potential. For General Electric has long believed this: When fresh young minds are given the freedom to make progress, everybody benefits — the individual, the company, the country.

Educational Relations, General Electric Company, Schenectady 5, New York

ROBERT H. PLATT joined G.E. in 1941 after receiving his B.A. at Colgate University. He served 2 years in the Navy, attaining the rank of Lieutenant (J.G.). He is also a graduate of G.E.'s Business Training Course.

Progress Is Our Most Important Product
