By The ASSOCIATED PRESS

AUSTIN—The Daily Texan, student publication at the University of Texas was ordered to withhold from yesterday's publication an editorial on political consequences of the veto of the Natural Gas Harris Bill.

The editorial was ordered withheld by Harrell Lee, editorial director of Texas Student Publications, and Dr. DeWitt Reddick, acting director of the School of Journalism.

Yesterday's development was the latest in a growing controversy between Willie Morris, student editor, and the University Board of Regents over Morris' presentation of editorial views. Morris has accused the regents of trying to impose censorship.

A section of the editorial page was left blank. Dr. Reddick said yesterday that the editorial "was a continuation of a practice that the Board of Student Publications in its policies had said should not be followed. It was a presentation of sweeping statements that were not substantiated by a basis of fact and a continuation of one particular point of view the Texan has been following without the presentation of any diverse points of view."

In the editorial Morris wrote that by the veto of the Harris bill the President "served the best interest of the nation."

The bill sought to exempt independent gas producers from federal price fixing authority and had strong support in Texas.

# Center News

The following activities are scheduled for tonight:

5:15 p.m.—MSC Speakers Group will meet in room 2A and 2B.

6 p.m.—MSC Great Issues Dinner will be held in rooms 2C and 2D.

9 p.m.—MSC Great Issues Reception in rooms 2C and 2D.

MSC Great Issues Committee will present Hodding Carter, a noted authority on segregation, who will speak on "The New Southern Rebellion." The speech will be at 8 p.m. in the MSC Ballroom. Great Issues season tickets will be honored and tickets will be sold at the desk.

The Self Improvement Speech Committee meets in rooms 2C and 3C at 5:15 today. Reservations for each meeting should be made before 2 p.m. the preceding day.

# Short Courses Held Here

The Civil Engineering Department will sponsor a Water and Sewage Short Course March 4-9 with Joe H. Sorrels serving as chairman. Six-hundred and eighty persons are expected to attend the meetings which will be held in the available rooms of the Center, with luncheons and banquets scheduled throughout the week. Registration will be held in the Serpentine Lounge of the MSC beginning at 3 p.m. March 4, and will continue until 8 a.m. March 5. There will be a registration fee of \$2 per person.

A Dairy Manufacturers Course is scheduled for March 14-15. The course is to be sponsored by the Dairy Husbandry Department with A. V. Moore chairman. Meetings will be in the assembly room of the Memorial Student Center. A banquet will be held in the ballroom at 7 p.m. on March 14. Registration will be held in the Serpentine Lounge on the second floor of the MSC from 8 to 10 a.m. March 14. A registration fee of \$5 per person will be charged the approximately 85 dairymen who are expected to register for the short course.

# Ag Players Holding Final Rehearsals

The Aggie Players are moving into final rehearsals of "Family Portrait", a pre-Easter play to be presented March 23, through 27 in co-ordination with the College Station Council of Church Women. Costuming and distribution of tickets are being handled by the Council of Church Women, headed by Mrs. J. B. Baty.

"The play is not an attempt to tell the entire Easter story," Director C. K. Esten said. "It relates the feelings of Christ's family and neighbors towards his ministry. The story is timeless."

For these reasons the costuming will not be dated but will consist of present day apparel. The designing of the sets will stress simplicity, to high-light the portrayals of the characters.

Several of the local churches are

planning to use a night's performance as their pre-Easter service during the week. Each church has been allotted a block of 200 tickets for each performance.

The cast will feature Florence Delaplane as Mary, the mother of Jesus. Also in the cast are Lane and Allan Coulter, Don Fisher, Bill Swann, Chris Pavelka, Ardith Melloh, Gene Logan, Toby Hughes, Roy Cline, Joe Dannenbaum,

Helen Page, Lari Wester, Roger Clark, Clint White, Connie Eckard, Bill Fink, Iris Bullard, Charles Ware, Helen Brady, Ronald Ruth, Shirley Smith, Evelyn King, Dan Ellington, Barbara Johnson, Pat Huebner, Jim Leissner and Phil McNemer.

# Foreign Grads From 51 Countries

Fifty-one students, from 21 foreign countries, are currently enrolled in the graduate school at A&M.

Fourteen of these students are from India, eight from Peru, five from Mexico, three from both Norway and Pakistan, and two from Egypt and Argentina. Brazil, Canada, Ceylon, Columbia, Denmark, Greece, Japan, Korea, Holland, Palestine, Panama, Paraguay, Philippines and Puerto Rico have one student each.

The names and home addresses of the students are available at the office of the dean of the graduate school.

# A&M Students Practice Teach

Nine education and three physical education majors will practice teach this semester at Stephen F. Austin High School and Lamar Junior High School.

The practice teaching is for Education 212 which is now required for a teaching certificate. It is a six-hour credit course for seniors.

"The students will observe for two or three weeks before actually starting to teach," said H. W. Cook, principal of Austin. "They will teach the whole semester or a major portion of it."

Steve Love, fifth-year student, Rodolfo Hernandez and Gerald R. Anderson, seniors, are teaching biology at Austin. Seniors Gary Palmer and Kerry Whitton are teaching a course in American history while James Braeutigam, senior, is an algebra instructor.

At Lamar seniors John Fortenberry and Lawrence Layman are teaching math. Sixth-year student Charles Gabriel and senior Tommy Sawyer are instructing world history class. Jake Hinson and George Johnston, seniors, are working with the Physical Education Department.

# HOW TO MAKE SOME OF AMERICA'S PROSPERITY STICK TO YOUR FINGERS

IF YOU'RE like most Americans, you're earning more now than ever before. But if you're like a lot of us, you're having a tough time trying to hang on to this extra money. What comes easy—seems to go just as easily. Spending a little too freely and going a little too far into debt may be tempting, but it certainly isn't wise. Actually, now is the best opportunity you'll ever have to save.

What most of us need is a simple, systematic savings plan—one that will work automatically and pay off with guaranteed results. Your Government has provided just such a plan. And over 40 million Americans are already cashing in on it.

Why don't you join them? Sign up for U. S. Series E Savings Bonds on the Payroll Savings Plan where you work. Or buy Bonds regularly where you bank. As little as \$18.75 a month invested in Savings Bonds will give you a cash backlog of \$1,182.60 in just 3 years—\$2,456.70 in 9 years and 8 months.

For the big things in your life, be ready with U. S. Savings Bonds

The U. S. Government does not pay for this advertising. The Treasury Department thanks, for their patriotic donation, the Advertising Council and

# The Battalion

There are three good reasons why U. S. Savings Bonds should be part of every investment program. They're safe—your principal is never subject to market fluctuation. They're sure—Bonds pay an average of 3% per year, compounded semiannually when held to maturity. They're liquid—you can always cash them, if you have to, after you've held them for 2 months.

Treasury Secretary Humphrey recently said, "The continued success of our economy depends not only upon the Government, but upon the efforts of all the people trying to do a little more for themselves and their loved ones. It is the sum total of all these individual efforts that makes our system superior to anything known in this world before."

Let's apply his words to our private affairs. And the best thing that you can do for your loved ones is to buy wisely—save sensibly—and preserve our American prosperity for them!

# Unlicensed Dogs Being Picked Up

City authorities are now picking up unlicensed dogs found in the city limits, according to Ran Boswell, city manager.

"We have picked up 21 dogs since last Friday," Boswell said. "We keep a dog for 48 hours before we destroy it."

Licenses have been issued to 215 dogs so far, a drop from 239 at this time last year, Boswell added. "Anyone wishing to reclaim a dog or get one may do so by paying the city dog tax at the City Hall, and having him vaccinated."

# Branson Attends

Dr. R. E. Branson, of the Agricultural Economics and Sociology Department, represented the Texas Agricultural Experiment Station at a meeting of the Southern Region Poultry Marketing Research Committee recently at Fayetteville, Ark. The Committee made plans for further studies in the improvement of marketing of poultry and egg products.

Upper Michigan's iron mines produced approximately 13 million tons of ore in 1950. But in 1915 they produced more than 19 million tons.

# CAN YOU THINK BEYOND MACH 2?

Designing Airborne Vehicles of the Future traveling at speeds so great that thin air becomes a blazing, solid wall... is the challenge that North American offers to aeronautical engineers and to specialists in most other sciences.

Join North American's engineering operations at Los Angeles. Here's where the F-100 SUPER

SABRE — holder of the world's first supersonic speed record — was designed and built. Share the knowledge and experience that has led to North American's supersonic supremacy. Be a part of a compact team of top engineers and scientists. Work on the most advanced projects right from the start. Enjoy personal rewards and recognition from challenging assignments.

See your Placement Office for an appointment with the North American Representative, or Write: Bill Nance, Dept. 56COL, Engineering Personnel Office, North American Aviation, Inc., Los Angeles 45, Calif.
