Community Supper Planned Tonight For Consolidated

By WELTON JONES

A community supper in the Consolidated Schools gymnasium at 5:30 tonight, will begin Texas Public Schools Week (March 5-10) in the Consolidated Schools, according to Dr. Les Richardson, Consolidated school superintendent.

"After the supper and beginning at 7:30, the school will hold open house," Richardson said. "Each parent may accompany his child through an abbreviated schedule of the child's classes. Each class will be conducted as an ordinary period, except it will be only ten minutes long."

Open house will be held in the junior and senior high schools, grades five through twelve only.

Tickets for the supper, which is sponsored by the Mothers and Dads Club, are 85 cents for adults, and 70 cents for children. They are being sold by children in grades three through eight, and will also be available at the door, according to Mrs. Walter Metzger, general chairman.

"Money earned by the supper will be used to provide equipment and services for the school for which there is no available tax money," said C. D. Laverty, publicity chairman for the supper. "Several local businessmen are donating goods and services for the supper."

The first annual Consolidated School Science Fair will be presented in the school's science wing tomorrow from 11 a.m. to 5 p.m., according to K. C. Morgan, Consolidated science teacher.

"There will be exhibits from such organizations as the Photography Club and the geometry classes, as well as from the biology and chemistry classes," Morgan said. "Stu-

dent's individual projects will be judged, and the winners sent to the district Science Fair in Galveston March 16."

There will be no admission charge for the program.

R. L. Boone's Consolidated choir will be featured on radio station WTAW from 6 to 6:30 Monday night and Tuesday night at the same time, the Lincoln School choir will present a program over WTAW.

Mrs. Eugene Rush's public speaking class will present a program for the College Station Kiwanis club at their weekly noon meeting in the MSC, to be held Tuesday.

"This year we especially want to invite all tax-paying citizens who do not have children in school to visit in the schools during the week," said superintendent Richardson. "The official Public School Week only lasts from March 5 to March 10, but we are happy to have visitors at any time."

April 15 Deadline

Tour Europe For Credit

By MARK SMITH

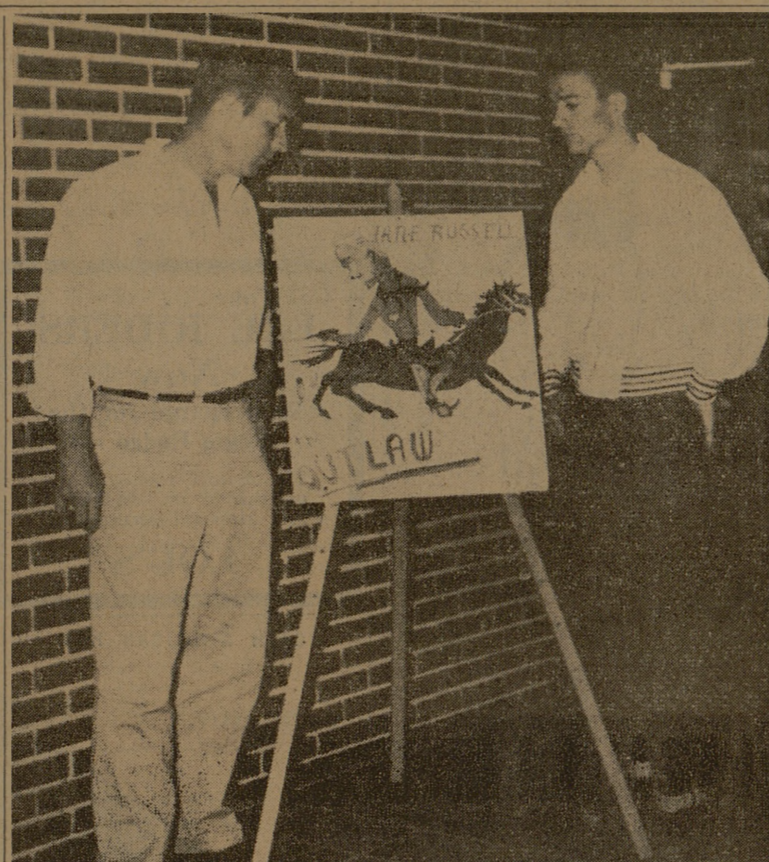

A&M students now have a chance to tour Europe for college credit, according to Dr. Edward C. Breitenkamp, assistant professor of Modern Languages.

The tour will take two months and will include trips to Paris, London, Versailles, Florence, Rome, Venice, Geneva and Pompeii.

Dr. Breitenkamp said that if ten students signed up before the April 15 deadline, he would ask the Academic Council to give three credit hours to those taking the tour. If less than ten students make the trip, they can receive credit through the State University of New York.

The two-month tour is not restricted to college students; residents of College Station and Bryan can also join the party.

Included in the 59 days spent in Europe will be a four-week stay in Geneva, Switzerland, or in Salzburg, Austria. French courses will be taught at the University of Geneva; courses in German will be offered at the University of Salzburg. Those taking the tour will stay in private homes while attending classes and will be able to practice "at home" what they learn at school.

THE OUTLAW—Bob Cline, senior architecture major from San Benito, and Carl Maynard, senior architecture major from Nacogdoches, look over the Film Society advertising of their movie to be shown tonight. The movie will begin at 7:30 p.m. in the Memorial Student Center ballroom, and is titled "The Outlaw" starring Jane Russell.

"Four weeks of intensive study in Europe will be equal to a year of classes here," Dr. Breitenkamp said.

The tour will start in Paris July 2, and will travel as far south as Capri, Italy. July 21 the group will leave Capri for Geneva, Switzerland, where those desiring to study German will go to Salzburg, Austria. Students wishing to learn French will stay in Geneva.

Little League Will Hold First Meeting

All persons interested in the Little League are asked to attend a meeting at 7 p.m. March 8 in the Consolidated School cafeteria. This will be a mass orientation program.

J. Wayne Stark, president for the Little League in College Station, said the formal meeting will last about an hour and then will be thrown open for discussion. Rules of major and minor leagues of the Little League will be explained.

August 25 the group will reassemble and go to London, returning to the United States August 30.

Some of the high spots of the trip will be the Arc de Triomphe, the Bastille, the Champs Elysees, and the Eiffel Tower in Paris; the Casino at Monte Carlo; the Coliseum and Pantheon in Rome; the ruins at Pompeii; the Sistine Chapel and the Vatican in Rome; and London's Buckingham Palace, Windsor Castle and London Bridge.

Total cost for the University Study Tour, said Dr. Breitenkamp, is \$845 from Paris, the starting point. Fares to Europe range from \$330 to \$560 for boat passage from New York.

Those wishing to leave from Houston may fly directly to Europe for \$696. All prices are round trip, and the plane fare from Houston may be paid in monthly installments with a ten per cent down payment.

The tour is directed by the Institute of Academic Travel, Inc. This will be its eighth year, but the first year that A&M students have been able to receive credit for the trip. Dr. Breitenkamp is Texas representative for the tour.

Anyone wishing more information about the tour may write to: Dr. E. C. Breitenkamp, F.E. Box 237, College Station. Or he may be seen at his office, room 101-A in the Academic Building.

HIGH SCHOOL DAY STARTS TOMORROW

More Than 1,200 Seniors Expected For Activities

Registration begins at 2 this afternoon for high school seniors attending A&M's annual High School Day events. More than 1,200 are expected to attend.

Program of events for the weekend include an orientation period in Guion Hall from 8-10 tomorrow morning. At 10, the group will split and go on guided tours of the different departments and schools of the college. Tours will be guided by student members of various departmental clubs and societies.

Those still undecided on a course of study will meet briefly with A. E. Denton, Basic Division counselor, and then take the tour of their choice. R. G. Perryman, assistant registrar, will be available at the orientation period to answer questions concerning admission to A&M. All tours will start from Guion Hall.

At 12:15, the honored guests will be fed in either the Duncan or Sbis Dining Halls, for 75 cents per person.

Sports dominate tomorrow afternoon activities with a golf match taking the leading spot at 1. Chasing the little white ball over the golf course will be Lamar Tech

and A&M. A triangular track meet between the University of Houston, University of Texas and A&M will start at 1:30 and the Aggie Tennis Team takes on the UH netters at 2.

A&M baseball prospects can be viewed in a game between the UH and A&M, starting at 3. Following the baseball game, supper will be served in either of the two mess halls for 75 cents per person.

High School Day activities will end tomorrow night when A&M's football team chooses up sides for its annual inter-squad game on Kyle Field, starting at 7:30.

Guests are being feted by the "T" Association.

Corps Students Invited To Civilian Day

The Civilian Student Council has issued a special invitation to Corps students to attend the Civilian Student Day barbecue and dance March 10. The council met last night to discuss plans.

Corps students may wear civilian clothes, beginning at 5 p.m. March 10, to the affair, according to Lt. Col. Taylor Wilkins, assistant commandant.

All students who want to attend the barbecue have been urged by Jack Quinn, ticket chairman, to buy tickets before 10 p.m. Wednesday, when sales for the barbecue end. Barbecue tickets are \$1. Tickets for the dance are \$2, single or couple for students and \$3 for non-students, single or couple. Dance tickets go off sale at noon March 10.

Quinn said that ticket sales are slow, and urged early buying to avoid a last-minute rush. He said he was very pleased with the sales in College View.

Barbecue ticket salesmen are to turn in tickets Wednesday morning between 11 and 12 at 105 Bizzell Hall. Dance tickets are to be turned in at the Office of Student Activities between 1 and 2 p.m. March 10.

Ray Carroll, chairman for the Civilian Day, has asked that all students able to do so contact him at once in 47 Milner about serving as waiters during the barbecue. About 30 men are needed.

The barbecue will be held in Sbis Hall from 6-7:30 p.m. Following the barbecue will be two dances, hillbilly and a combination popular, and rock-and-roll, and the judging of beards.

June Graduates

June graduates may now place their orders for graduation announcements in the Student Activities Office, second floor Goodwin Hall. Orders must be placed before March 15, according to C. G. (Spike) White, business manager of Student Activities.

Joe DeLatte Gives First Place Talk

O. J. "Joe" DeLatte was chosen the best speaker for the night at the first meeting of the A&M Speechmasters Group Wednesday night in rooms 2A and 2B of the Memorial Student Center.

DeLatte spoke of the subject, "The Pride of the Great John L. Sullivan" and a sub-title "Loving People" in a five minute talk.

Other talks given during the meeting were by Dick Wall, J. T. Belzner and John Partridge.

Those on the program for the meeting were Frank Jagger, chairman; Bill Yates, toastmaster; Don McGinty, topicmaster; Bob Ring, general evaluator; Joe Tindel, grammarian; and Bob Turner, sergeant-at-arms. Faculty advisor for the group is Dr. C. D. Laverty, English professor.

Dairy, Biochemistry

New Buildings Underway

By LELAND BOYD
Battalion Staff Writer

Contract for construction of a \$1,079,496 Dairy and Biochemistry Building was awarded Saturday by

the Board of Directors, calling of completion in 330 working days. The building is expected to be ready for use in September, 1957.

The building, which will house the Dairy and Biochemistry Departments, will have three stories in the main building and will have a wing housing the A&M creamery, which is now located across the railroad tracks west of the campus.

The building is to be located south of the Animal Pavilion on the corner of Lamar and Spence streets. In it will be the classrooms for dairying, laboratories for dairy manufacturing, classrooms and laboratories for biochemistry, the A&M creamery, and an electronic microscope laboratory.

New equipment valued at \$130,936 will be added to the Biochemistry department. When this department moves into the new quarters it will have advantage of having classes in one building, instead of having classes scattered widely over the campus, under the present setup.

Butler Will Speak At Convention

Dr. O. D. Butler, of the Animal Husbandry Department, will travel to Dallas March 12, to speak to the Texas Frozen Food Locker Convention on "Consumer Preference for Meat and Trends in Processing Frozen Retail Cuts."

He spoke recently to the contestants of Dry Lot Steer Feeding Contest sponsored by the Houston Packing Co., at an awards dinner at the Rice Hotel in Houston.

New equipment, which will go to the Creamery will enable it to handle the milk produced by the A&M College dairy and the experiment station, that are the suppliers for the college dining halls and the MSC.

Included in the new creamery equipment, which will be added to the usable equipment now in use, is a research size powdered milk drier, a vacuum pan for condensing milk, and two refrigerated storage vats for handling bulk milk.

The creamery will also have separate facilities for processing milk, cream, cheese, and ice cream.

M. T. Harrington Takes World Trip

Chancellor and Mrs. M. T. Harrington will leave College Station Sunday on a trip that will take them around the world. They will go by plane, leaving San Francisco March 7, stopping in Honolulu, Tokyo and Hong Kong enroute to Dacca, Pakistan.

While in Pakistan, Dr. Harrington will consult with A&M system staff members at the University of Dacca who are engaged in the cooperative program, sponsored by the Foreign Operations Administration of the United States government.

After leaving Pakistan the Harringtons will visit Cairo, Athens, Rome, Geneva, Frankfurt, Copenhagen, Stockholm, Glasgow, London and will arrive in New York City April 15.

They plan to return to College Station April 17.

Cafe Rue Pinalle Will Be Tonight

Rue Pinalle will open tonight at 8:30 with an all-girl floor show composed of 12 Lamar High School (Houston) girls. Music for the dance will be provided by the Capers' Combo.

Tickets for the dance, which ends at midnight, are 75 cents per person and may be purchased at the door or at the bowling alley in the Memorial Student Center.

Stags may see the floor show and the remainder of the dance after intermission, according to Miss Shirley Cannon, Center program consultant.

Sunday Television Program

Oceanography Has Radar

By JOE TINDEL
Battalion Staff Writer

On May 25, 1955, the lives of several persons were saved when a tornado struck the northwest end of the small town of Blackwell, Okla. The reason they were saved was because of a warning sent by the Texas Tornado Network radar detection station in Oklahoma City.

Work of the Texas Tornado Network and other information about tornadoes and their detection will be presented Sunday at 11:30 a.m. over KGUL-TV in Galveston. The program is produced each week under the auspices of the Department of Oceanography and Meteorology here. This week's program will be devoted to meteorology and

will be on the use of radar for tornado warnings.

Moderator for the show will be Roy Gaul, graduate student in oceanography. Stuart Bigler of the department will be special guest for the show.

The 30 minute program this week will include information about the Texas Tornado Network, the character of tornadoes, the life of a tornado and the use of radar for detecting tornadoes.

The program will give viewers information on what a tornado looks like, where and when it is most likely to occur, and how it looks on radar. This includes how the tornado looks when its originates and how it looks when it breaks up.

Radar detection of tornadoes began at A&M in the last two years. Chief among researchers on the project were Dr. Myron G. H. Ligda, head of radar meteorology, and Archie Kahan, head of the research foundation. Interest has grown in the project until now there are 31 tornado detection stations in the Texas Tornado Network. The network has contact with stations in Nebraska, Kansas, Arkansas, Oklahoma and parts of Louisiana as well as in Texas.

Tornadoes are tracked by stations in their vicinity and information is given to the area into which they are moving. Information is relayed from one area to another so that the tornado may be tracked as far as it goes.

Radar equipment in each area has a range of 0-100 miles. A&M's equipment is located in the Electrical Engineering Building and serves this area.

Scattered clouds with no drastic change in temperatures is forecast for College Station. Yesterday's high was 76 degrees; low, 63 degrees. Temperature at 10:30 this morning was 74 degrees.

Weather Today

UN Club Will Meet Tonight

The United Nations Club will hold a meeting tonight at 7:30 in the YMCA.

Rev. Lee C. Phillip, Dean of the Chapel, Prairie View A&M College will speak of his experiences from his visit to Paris, France, to attend the World's Centennial Celebration of the YMCA.

Refreshments will be served following the talk.
