

Flow of Milk

Milk-hungry Aggies may cause themselves to be a lot hungrier, or thirstier, for milk if the present flow of milk bottles does not cease.

The flow is from the college mess halls to the dormitories, and mess hall workers have indicated a loss of up to 10 cases in a single night.

The average loss was reported to be about 100 bottles a day.

To cure this loss, one step suggested or thought about would be to cut out the two milks at night, an action that would undoubtedly be very unpopular.

It's ridiculous that such a thing should occur, anyway. Very few persons are in such a rush that they can't stop long enough to drink their milk in the mess hall.

It's like everything else—a good thing can be carried to an extreme.

And carrying away 100 bottles of milk per day is carrying things to an impossible extreme.

The Student Senate's Mess Hall Committee is working on this problem. Give them a little help, fellows, and stop the loss before anything drastic occurs.

AN OPPORTUNITY

An executive from the Warner & Swasey Company, leading manufacturers of machine tools, textile machinery, earthmoving equipment, and other precision machinery, will visit Texas A & M College on March 15th to interview high caliber men with technical backgrounds or mechanical interests who are looking for a career in research, development, engineering, sales, manufacturing, or finance.

This medium-sized company offers a program planned to prepare you rapidly for positions of responsibility in line with your background, training, and objectives.

See your Placement Director to arrange an interview, or write direct to: C.W. Ufford, Director of Industrial Relations,

LOOK AT'CHA! CLEAN UNIFORM, SHINED SHOES, NEAT HAIRCUT! WHAT'S WRONG? YOU TOO GOOD TA DRESS LIKE AN' AGGIE?

St. Mary's Will Build New Church

A new Catholic church will soon be built by St. Mary's Chapel, said the Rev. Charles W. Elmer.

Plans for the chapel are now being drawn up, he said. Construction will probably start this summer.

William E. Nash, architect for the building, said that sketches will soon be sent to the bishop of this area for approval. The Most Rev. Louis J. Reicher, Bishop of the Austin Diocese, must sanction the plans before any construction is undertaken.

The building's architecture will be colonial, said Nash. The chapel will seat about 500, including 100

in the choir loft.

In back of the old chapel is St. Mary's Student Center, a recreational building which was built two years ago. The colonial architecture of the new chapel will not match the modern architecture of the Student Center. The new chapel will be located one block north of the Student Center, which is on Spence Street. Land for the building has already been purchased.

Battalion

In looking back upon my experience of last week as a guest speaker at the Religious Emphasis Week at A&M, I find that I want to express appreciation to the Texas Aggies, one and all, for their outstanding kindness to me during my visit. You have an unusually splendid group of men at the college. Seldom have I been so impressed by the excellence of the student body as I was by the men of Texas A&M. There is a wholesome, spiritual, sturdiness about most of the students which is both refreshing and exciting. Your college is producing the kind of citizens that our country needs.

Not least was I impressed by the fine cooperation between the administration, faculty and student body in the development of your Religious Emphasis Week Program. I felt that the attitude of everyone involved was outstandingly fine. Your distinguished president, Dr. David Morgan, your most able YMCA secretary, Mr. Gordon Gay; your personnel officials like Dean Kamm and Mr. Penberthy and all the rest for their support of this program, gave very real significance to it.

In the future you will have one

Bald and golden eagles are about the same size and except for the California Condor are the largest birds of prey in North America.

outstandingly loyal supporter of the college in the person of myself. Wherever I go I shall sing the praises of Texas A&M. I wish Madison, Wisc. were not so far from Texas, but you may be sure that if I am ever again in the vicinity of College Station I will make every effort to renew acquaintances on your campus. Sincerely,
Morris Wee

Looking for a Spot to Begin a Career?

THE Bell Telephone System offers a wide variety of opportunities for graduates who can qualify.

Next Thursday and Friday, March 8 and 9, officials of these five Bell companies will be at the Placement Office to talk to Texas A&M men about a career when they graduate.

- **Western Electric** . . . manufacturing unit of the Bell System. Also develops, makes, and services electronic products for the armed forces.
- **Southwestern Bell** . . . builds, maintains, and operates the Southwest's vast communications system.
- **Bell Laboratories** . . . largest industrial research organization in the world. Electronics and communications research is fascinating.
- **Sandia Corporation** . . . applied research, development, and design on ordnance phases of atomic weapons.
- **A.T.&T. Company** . . . builds, maintains, and operates the nation's interstate communications system.

How about dropping by the Placement Office and arranging to talk to these officials?

OH YOU KIDS! LUCKY DROODLES!

WHAT'S THIS? For solution, see paragraph below.

DROODLES—POCKET EDITION. There's a pocket edition of almost everything these days. Why not Doodles? This one's titled: Shirt pocket of Lucky Smoker. This smoker might give you the shirt off his back—but he'd sure hang on to that pack of Luckies. Reason: Luckies taste better. You see, they're made of fine tobacco—light, mild, good-tasting tobacco that's TOASTED to taste even better. Matter of fact, you'll say Luckies are the best-tasting cigarette you ever smoked! Better pocket a pack today!
