

Thoughts on the Future

The black veils of the white-sheeted Ku Klux Klan appear to be on the rise once more in our nation.

This Klan is not an actuality that one can see. Instead, it is taking the intangible form of hatred and fear, a form that the "superior" do not approve.

Even on our campus a group of men are bowing to this fear and hatred. It's fear of what is coming, for the end of segregation, the end of the myth of "white superiority" is nearing.

Many of this group probably acknowledge the equality of mankind. They acknowledge it, but do not believe that it should be lived. And so a myth lives on, a counterfeit myth of "sincerity of purpose", for no doubt these students believe themselves to be sincere.

But a few things should be thought about, what the future holds, both for A&M and for the individual.

Take the Corps, for instance, and take specifically its acknowledged purpose of training future leaders. Cadets will leave A&M and the majority go into one of the armed services—and, whether they like it or not, into a desegregated armed services.

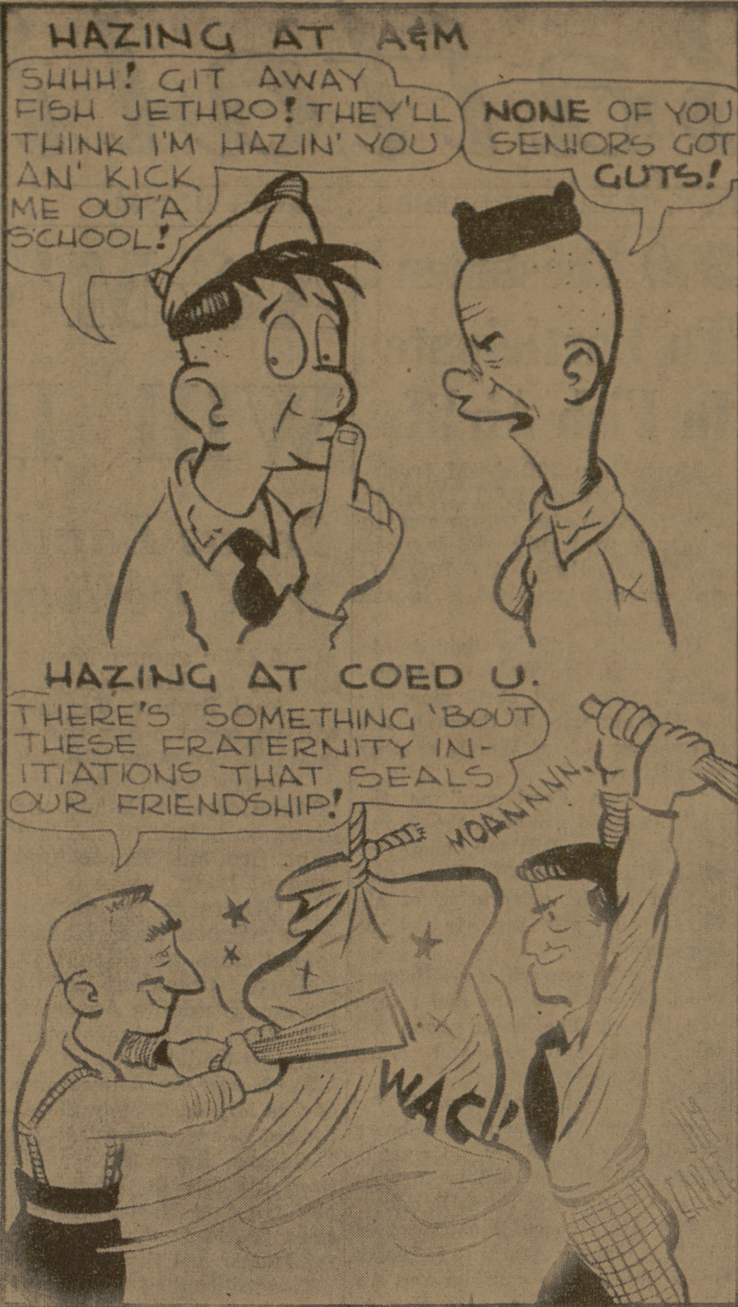

Civilian students also will be going into a desegregated armed services. They, too, will have no choice.

And both Corps and civilian students have to face a world that is moving, not standing still in the bogs of hatred, fear and prejudice.

At least, we sincerely hope that the world is moving toward better ground.

Think about these things, even if you don't like to do so. Negroes and whites are going to be together for a long time to come.

No one is shoving integration down A&M's throat. The Board of Directors has its policy on this matter; future action is in their hands and will be based on what they consider is necessary in light of the Supreme Court's decision.

Job Interviews

The following job interviews will be held tomorrow in the Placement Office:

The SQUARE D COMPANY has positions in field, production, design and application engineering for mechanical, industrial and electrical engineering majors.

WESTINGHOUSE ELECTRIC SUPPLY CO. will interview business administration majors for sales trainees in the Consumer Products Division.

FARNSWORTH & CHAMBERS has opportunities in engineering, sales, estimating and construction for civil, chemical, electrical, mechanical and architectural engineering and accounting majors.

AETNA CASUALTY & SURETY CO. will interview business administration, economics, agricultural economics, industrial engineering and industrial technology majors for position of field representative trainee.

CURTIS - WRIGHT CORPORATION, Wright Aeronautical Division will interview mechanical and aeronautical engineering majors for men interested in field engineering work.

LONE STAR GAS CO. and

Lone Star Producing Co. will interview mechanical and civil engineering majors for Distribution and Transmission Divisions. They will interview petroleum engineering majors for production positions.

MINNEAPOLIS-HONEYWELL REGULATOR CO. has positions leading to careers in research and design, production and industrial engineering or factory management for aeronautical, electrical, industrial and mechanical engineering majors.

PROCTER & GAMBLE CO. will interview chemical, mechanical, industrial, civil and electrical engineering, chemical engineering and business majors for the summer and workshop program.

Whitney Replaces Late J. W. Barger

Howard S. Whitney has been appointed to take the position held by the late J. Wheeler Barger in the Agricultural Economics Department. Whitney has been doing research in grain marketing in this department.

He received his B.S. from Oklahoma A&M in 1943. From that time until July of 1946 he served in active duty with the Marine Corps. He then returned to Oklahoma A&M and completed his master's degree.

Whitney joined the Agricultural Economics Department at Oklahoma A&M and continued in that position until he joined the staff here in November of 1954.

TRIANGLE BANQUET ROOM

Open for all:
BANQUETS — DINNERS — LUNCHEONS
RECEPTIONS and WEDDINGS

(By Reservation Only)
For Information Call: Mr. J. A. Ferreri — TA 2-8508
(Between 9 a.m. & 5 p.m.)

The Battalion

The Editorial Policy of The Battalion Represents the Views of the Student Editors

The Battalion, daily newspaper of the Agricultural and Mechanical College of Texas and the City of College Station, is published by students in the Office of Student Publications as a non-profit educational service. The Director of Student Publications is Ross Strater. The governing body of all student publications of the A&M College of Texas is the Student Publications Board. Faculty members are Karl E. Elmquist, Chairman; Donald D. Buehard, Tom Leland and Bennie Zinn. Student members are Derrill H. Guiles, Paul Holladay, and Wayne Moore. Ex-officio members are Charles Roeder, and Ross Strater, Secretary. The Battalion is published four times a week during the regular school year and once a week during the summer and vacation and examination periods. Days of publication are Tuesday through Friday for the regular school year and on Thursday during the summer terms and during examination and vacation periods. The Battalion is not published on the Wednesday immediately preceding Easter or Thanksgiving. Subscription rates are \$3.50 per semester, \$6.00 per school year, \$9.50 per full year, or \$1.00 per month. Advertising rates furnished on request.

Entered as second-class matter at Post Office at College Station, Texas, under the Act of Congress of March 3, 1879.

Member of The Associated Press

A Campus-to-Career Case History

Winfield Giguere, here tuning the coils of an IF strip on an experimental FM receiver that uses the new high-frequency transistor.

"Our business is new ideas, new developments"

Winfield J. Giguere, or Gigs as he is known, graduated in 1954 from the University of New Hampshire with a B.S. in Electrical Engineering. Shortly after graduation he joined Bell Telephone Laboratories in Murray Hill, New Jersey.

"Experience has come my way in a hurry," says Gigs. "I've worked on carrier system amplifiers, speech transmission problems, and experimental types of coaxial cable. The Labs are always pushing ahead, trying new ideas, exploring new developments.

"For example, right now I'm working with the transistor that smashed a fre-

quency barrier." This new transistor has a cut-off frequency of at least 500 mc and can be used to amplify 2500 separate telephone conversations simultaneously. It will make possible broadband, high-frequency amplification in many fields using subminiature components.

"There are thousands of other fascinating projects underway at the Bell Labs. You see, at the Labs our business is new ideas, new developments, and that's one reason why I like working here. It's exciting. If there are better ways to communicate, you can bet the Labs are looking for them."

Winfield Giguere is typical of the many young men who are finding careers in Bell Telephone Laboratories. Many other career opportunities exist in the Bell Telephone Companies, Western Electric and Sandia Corporation. Your placement officer has more information about these companies.
