

B Infantry Wins Freshmen Intramural Handball Title

B-Infantry copped the freshman handball championship last night edging B-Field Artillery 2-0. Clyde Tew and James McKnight provided the deciding win in a closely matched third game, defeating artillerymen Clo La Flur and Ray Perkins.

The Infantry wallsmackers dropped the first tilt as Porter Everts and John Speedie lost a 2-0 tussle with Davis Glickman and Marvin McCree. The Infantrymen bounded

back in the second game when Wiley Sommer and Glen Hindman blanked John Zeigler and Bob Barker 2-0.

In the crucial Tew-McKnight vs. La Flur-Perkins match the Infantry team drew first blood with a 21-4 victory. La Flur and Perkins rallied in the second tilt to return the slap 21-8 and even up the contest. Tew and McKnight took the final win and the Corps championship.

VICEROYS are Smoother

Here is the reason: Only VICEROY has 20,000 filters in every tip—twice as many filters as the other two largest-selling filter brands—to give that smoother taste—that VICEROY taste!

VICEROYS are Smoother than any other cigarette. Because Viceroy's have twice as many filters as the other two leading filter brands!

THE MOST FILTERS FOR THE SMOOTHEST TASTE

Viceroy

TWICE AS MANY FILTERS

Brand B

Only HALF the FILTERS

Brand C

LESS than HALF the FILTERS

The exclusive Viceroy filter is made from pure cellulose—soft, snow-white, natural!

TCU Rules All-SWC; Toby Newton Only Aggie

TOBY NEWTON—only Aggie picked for All-SWC

Champion Texas Christian landed five players on the All-Southwest Conference Baseball Team, three of them being unanimous selections.

BOB McDANIEL, who pitched the Horned Frogs to the title; Al Paschal, who led the league in batting, runs, hits, doubles and tied for the lead in total bases, and Bob White, talented outfielder, were the Texas Christian contributions for the unanimous circle.

Only one other player got all the votes of the coaches. He was John Wolda of Rice.

BAYLOR PLACED four on the all-conference team, Rice three, Southern Methodist two and Texas and Texas A&M one each. Southern Methodist's Bryan Bush lacked only one vote of being unanimous at a catching position. There were two ties—Don Berry of Baylor and Carl Reynolds of Rice share the first base position; Toby Newton of Texas A&M and Mal Shaw of Southern Methodist tied for a pitching post.

Here is the all-conference team: Pitchers—Bob McDaniel, Texas Christian; John Wolda, Rice; Mal Shaw, Southern Methodist, and Toby Newton, Texas A&M.

Catchers—Bryan Bush, Southern Methodist, and Jerry Sims, Rice.

PCC Penalizes 8 of 9 Schools

VICTORIA, B. C.—The Pacific Coast Conference slapped fines up to \$1,550 on eight of its nine member schools Tuesday and tightened the strings on alumni and booster clubs.

Washington State College was the only school given a clean bill of health.

California drew the top fine of \$1,550 and beleaguered UCLA and Washington did not escape.

Already hit with a financial deduction of close to \$95,000, the University of California at Los Angeles drew an additional fine of \$350. Washington, which stands to lose \$52,000 in Rose Bowl money while on two-year probation, has to dig up \$250 for minor violations under today's ruling.

These fines all were in the normal line of conference business for the spring meeting. There was nothing in the line of the probation actions which marked previous conference sessions this month.

BROOKLYN—Home runs by Johnny Logan, Ed Mathews and Hank Aaron, who also banged a double and two singles in a 13-hit barrage, powered the National League-leading Milwaukee Braves to a 7-3 victory over the Brooklyn Dodgers tonight.

CLEVELAND—Tom Brewer, Boston Red Sox right-hander, pitched his sixth straight victory over the Cleveland Indians last night, beating them 5-3 with the aid of a two-run homer by Billy Goodman, his first in 184 games.

What's doing

at Pratt & Whitney Aircraft

Today's leadership . . . a reflection of policies established in aviation's infancy

Back in The Roaring Twenties, the magic dream pictured American families someday using the light personal airplane as freely as the family car. Among the realists, however, was a handful of men who were unshakable in their conviction that the real future of aviation lay with bigger aircraft, higher speeds, greater ranges—all possible only through engines of higher power and more reliability than those of that era.

In the spring of 1925, six of these men of vision founded a company in Hartford to undertake the development of a new aircraft engine—an air-cooled type. The year's end heralded their first success—Pratt & Whitney Aircraft's "Wasp".

This talented group of men continued to improve their powerplant designs, developing engines of steadily mounting power that operated efficiently and dependably. They contributed much to aviation's progress—so much so that currently three-quarters of the world's commercial airliners and many of our nation's first line military aircraft are P & W A-powered.

Today's P & W A powerplant designs are supported by the very finest research facilities and equipment, and a technical staff that is continually being strengthened. That nucleus of six men has grown into one of the world's leading engineering organizations. Yet to this very day, engineering achievement at Pratt & Whitney Aircraft is guided by its founders' simple policy . . . the best airplanes can be designed only around the best engines.

The Original Wasp, the first P & W A engine—designed, fabricated and assembled in less than seven months. Weighing under 650 pounds and officially rated at 410 horsepower, this lightweight, air-cooled radial engine was a milestone in aviation history and set the pattern for almost three decades of record-breaking advances.

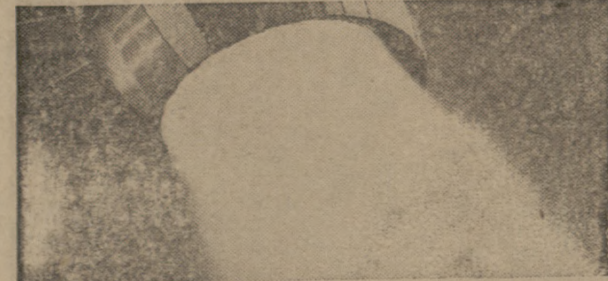

The Double Wasp, an 18-cylinder, two-row piston engine rated at 2400 horsepower for basic use. Its rating increased by water injection to 3400 horsepower, the Double Wasp was instrumental in turning many a military crisis into an aerial victory in the decisive battles of World War II.

The Wasp Major, a 28-cylinder engine with pistons arranged in four rows of seven each and a 3800-horsepower rating. Its power and performance having never been equalled, the Wasp Major represents the apex of the art of building reciprocating engines.

The J-57 Turbojet, first jet engine in history to be officially rated in the 10,000-pound-thrust class. In quantity production since early 1953, the J-57 has continuously undergone progressive development. It gives every indication of having almost unlimited growth possibilities.

The Engines of Tomorrow, advanced jet, turboprop, and nuclear. Already in various stages of development, these aircraft engines of the future will further contribute to the long history of leadership that Pratt & Whitney Aircraft has established in the field of aviation.
