Groneman Appointed Education Coordinator

Dr. Chris H. Groneman has been appointed Coordinator for the Council on Teacher Education, Dr. David H. Morgan, president, has announced. Groneman head of the Industrial Education Department, also is chairman of the Athletic Council. The post heretofore has been chairman of the Council.

The Council on Teacher Education serves as an advisory council on the operation of all teacher education programs, both undergraduate and graduate. Also, among its duties are to prepare recommendations for certification of graduates.

The Council refers only to those departments who directly or indirectly prepare teachers.

Consisting of seven members of the general faculty, the council has the heads of the four teacher education departments and three members of the general faculty from other departments of the college, appointed annually in August by the president on recommendations of the Executive Committee.

"A need for greater responsibility and authority in the chairmanship was felt as a result of the work done by the Texas Education Agency in Teacher Education,"

President Morgan said. "On June 28, 1955, on recommendation of the Executive Committee, the Academic Council approved the recommendation that the chairman of the Council on Teacher Education should be appointed by the president on the recommendation of the Executive Committee for a term of four years.

"Observations of this operation and further evidences of the interest of the Texas Education Agency in a central office for teacher education justify this move and indicate that our four programs of Teacher Education located in three schools will be further strengthened by making the position of chairman a permanent appointment under the title of coordinator."

The coordinator has no authority relative to the operation of the separate departments. The heads of these departments will maintain the authority and responsibilities which they have had in the past.

"This position," (coordinator), Dr. Morgan stated, "should require only part of the faculty members time and logically should be filled by one of the present department heads."
