State Says Negro Group Shows Profit

TYLER, Tex., Oct. 3 (AP)—The state today added alleged profit-making to reasons it says the National Assn. for the Advancement of Colored People should not be allowed to operate in Texas.

A tedious 7th District Court Session was recessed until 9 a. m. tomorrow, after a three-hour accounting of Texas NAACP receipts and expenses over a two-year period.

Once during the afternoon, Atty. Gen. John Ben Shepperd ignored an impromptu offer of the NAACP to pay \$900 in state franchise taxes—one of the state's original charges.

"That \$900 is just an estimate," assist. Atty. Gen. Elbert N. Morrow told NAACP attorney W. J. Durham. "We have been absolutely denied a look at certain records to determine how much tax is needed."

Afterwards, Morrow said the records denied Shepperd's investigators were the New York NAACP office. The offer came today in a resumption of the hearing to determine if a temporary restraining order against the Texas NAACP will be continued.

The state also alleged the NAACP was guilty of soliciting integration lawsuits, and of political activities contrary to its charter as a charitable, non-profit making organization.

The NAACP countered with a charge that the state had violated constitutional rights in recent courts of inquiry.

DALLAS, Oct. 3 (AP)—The findings of a surprise court of inquiry, in which two of Atty. Gen. John Ben Shepperd's assistants questioned six Dallas Negroes involved in the Dallas school integration suit now in federal court, will be referred to the Dallas County grand jury.

Dist. Atty. Henry Wade received the certified copy of the hearing and said today it would be presented to the current grand jury session.

BEAUMONT, Tex., (AP)—A new crackdown on pro-segregation pickets came out of a conference today between Texas Rangers and local officers.

But during the day, pickets kept all but three Negroes from the state-supported school, which was integrated this year.

The conference of officers concerned laws on loitering and loafing.

Soon after, the school grounds were placarded with signs warning pickets to keep off the campus.

The pickets earlier had been warned away, but had rushed onto the parking lots owned by the college to see if those arriving in automobiles were whites or Negroes.

Representatives Elect Eleven To Council

Civilian ramp, floor and row representatives selected 11 men to represent them on the Civilian Student Council for the 1956-57 school year at meetings last night.

These men, together with the five men elected Monday night for class representatives will make up the Council. They will meet in the Press Library in the YMCA tonight at 7 to select a president, vice-president, secretary and parliamentarian.

Councilmen selected last night and their areas are as follows: Roy Hahn will represent civilian students in Hart Hall; Norman Guilloud representing Bizzell Hall; Freddie C. Ryan and Raymond F. Greene representing College View; Roy E. Andrews from Law Hall;

Eng. Council Elects Kelley as Prexy

John Kelly was elected president of the Student Engineers Council at its first meeting Monday night.

Other officers are Herman Veselka, vice-president; Robert Glazener, secretary and Larry Piper, treasurer.

JUST ANOTHER LINE, ARMY—Standing in lines seems to be a habit on the campus, but this one happens to lead to the booths outside the Athletic Office where student, and student date tickets are being purchased. Some of these people seem happy about the whole thing.

Survey Shows

Progress Made in Corps

The annual study of the progress made by the Cadet Corps in operating under the Articles of the Corps has just been completed by members of the Military Science Department.

Col. Joe E. Davis, commandant, explained the purpose of the study as being to strengthen the Corps by elimination of any unsatisfactory action.

"The survey shows, among other things, that the peak of Corps resignations was reached much earlier this year than before," Col. Davis said. "This reflects the

more rapid grasp and control of the unit commanders than in years before."

Col. Davis went on to say that "weak spots and some flagrant violations were apparent, but it was evident from the study that those unit commanders concerned were taking action in connection with unsatisfactory reports in order to strengthen their units."

For the first time, detailed questionnaires were used in the survey. Tactical officers picked three freshmen at random from each Corps unit to interview in determining the findings.

Also, 51 unit commanders were interviewed as were 35 civilian freshmen still in college who were in the Corps earlier this year.

According to Col. Davis, the objectives of the questionnaire in evaluating the progress made were to determine each commanding officer's policy under which his unit was operating and the various constructive actions each commander took when there were violations of his policy.

Two Graduate Fellowships Now Available

Two fellowships are available to graduates and young faculty members, Dr. J. B. Page, dean of the Graduate School announced recently.

The Ford Foundation offers foreign area training fellowships in Asia, the Near East, the Soviet Union, East Europe and Africa, south of the Sahara. Studies may also be conducted in the United States.

Granted for one year subject to limited extension, the Ford award covers for expenses of the individual and his dependents, tuition, transportation and all other necessary expenses. They are usually quite liberal, Dr. Page said.

Also offered are international relations training fellowships in foreign services. Applicants must have a Ph.D. degree or its equivalent by February, 1957.

These fellowships may extend to two years, Dr. Page said. Persons interested in either of the awards are asked to contact the Graduate School office.

Parliamentary Study Scheduled

A short course in parliamentary procedure will be held in the MSC in the near future.

Mrs. Emmette Wallace, a registered parliamentarian, will teach. Night classes will be arranged at a meeting of those interested in the course at 8 p. m. tonight in the Senate Chamber of the MSC.

Cost of the course is \$1 for students and \$5 for non-students. Register at the main desk in the MSC.

Weather Today

Partly cloudy skies, with occasional scattered showers in late afternoon, are forecast for today. Temperature at 10:30 this morning was 84 degrees. Yesterday's high was 92 degrees and last night's low reading 66 degrees.

Atomic Proof Building Collapses; Six Killed

Four Workmen Trapped Beneath Steel, Concrete

JACKSON, Mich.—(AP)—A four-story office building being constructed to withstand the shock of an atomic blast collapsed with a roar yesterday, killing at least six workmen and injuring 15 others.

At least four other workmen were trapped beneath tons of steel and concrete which slammed through foot-thick floors into the basement.

Bulldozers and cranes, working in the glare of searchlights, burrowed into the wreckage last night, removing huge chunks of rubble in an attempt to reach the trapped workers.

The 15 injured were taken to two Jackson hospitals, where two were reported in critical condition.

'Y' Campers Hold Hensel Park Outing

Participants in the YMCA Freshman Camp held before Orientation Week met at Hensel Park for a steak fry last night.

All the freshmen who attended the leadership preparation camp at Ft. Parker State Park and their counselors for the three day guidance course held a get-together to renew the acquaintances they made at the camp. Each year, during the three days before freshman orientation in the fall, the YMCA sponsors the camp to orient a select group of prospective freshmen.

This year 68 new freshmen attended the camp, which was held from Sept. 4 through 7. The program at the camp consisted of panel discussions by the 16 counselors, lectures by campus leaders and members of the faculty, recreation periods and devotional periods.

One of the unique features of the camp is the fact that all the men invited to attend are selected from those who were in the top 25 per cent of their high school graduating class.

The men were divided into groups, with four freshmen to a counselor. At the camp there were four cabins and 16 men to a cabin with four counselors for each cabin. Out of the four counselors, one was designated as discussion leader.

Each year the freshmen camp grows larger. In 1954, 36 men attended; in 1955, 62 men and in 1956, a record high of 68 future freshmen participated in the program.

BULLETIN

Instead of being cut off today as was originally planned, the hot water for all dormitories and campus buildings will go off at 10 tomorrow night. A leak in the hot water system is responsible for the shutdown.

Three Men Die In Fiery Crash Of Globemaster

CHARLESTON, S.C.—(AP) Three airmen perished in the flaming wreckage of a C124 Globemaster that crashed yesterday while attempting an instrument landing at the Charleston Air Force Base. Seven crew members survived.

The huge transport plane, inbound from Bermuda, made two instrument approaches in an early morning fog. The pilot radioed that he had lost one, then two, of his engines.

The Globemaster apparently hit a tree before it smashed to earth near the base administration building and tipped over on its left wing. Flames quickly consumed all but the tail fin. Fire trucks were standing by and battled the blaze for about 30 minutes.

Visibility at the time was about half a mile, with cloud coverage at 15,000 feet.

The plane was attached to the 1703rd Air Transport Wing at Brookley Air Force Base, Mobile, Ala. The wing commander, Col. Herman Rumsey, flew here to join in the investigation.

None of the seven airmen taken to the U. S. Naval Hospital here was believed critically injured.

The pilot was Lt. Col. Charles W. Kelso, 41, of Mobile, Ala., one of those hospitalized. He is a native of Brandon, Iowa, and is married to the former Marina Isabel Garza of San Antonio, Tex.

Other crew members were not identified pending notification of families.

Science Student Wins CHS Award

The top science student at A&M Consolidated High School will receive the Bausch and Lomb Science Award again this year, according to J. J. Skrivanek, principal.

The award makes the student eligible to apply for the Bausch and Lomb Optical Co.'s science scholarship. The company has given over 130 students aid since the program's start in 1943.

Six thousand schools throughout the United States give the award each year to their outstanding science pupil. Only highly accredited schools are eligible to participate.

The winner last year at Consolidated was Mike McGuire.

Nutrition Conference Starts In MSC Today

"How to Produce More with Less Feed" is the theme of the annual Nutrition Conference which started this morning in the Memorial Student Center.

Dr. R. D. Lewis, director of the Agricultural Experiment Station, delivered the kick-off speech. Purpose of the two-day study is to get closer cooperation between feed manufacturers and colleges, according to Chairman J. R. Couch of the Poultry Science Department at A&M.

About 250 persons from manufacturing firms throughout the nation are attending, Dr. Couch said.

Representatives from feed industry trade magazines, "Feed-stuffs" and "Feeding Age" are on hand to cover new feeding angles for their papers.

Other communication media recording the conference include general farm magazines, radio and television news men and farm writers from the larger Texas daily newspapers.

Humble Oil's "Texas In Review" is sending a team of cameramen to report the conference highlights

on television.

Some new angles on phosphorus availability in feeds, the calorie-protein ration in poultry nutrition and unidentified growth factors in poultry and swine are expected to come out of the study as many years of research are pooled. Speakers will include Dr. M. L. Scott of the nutrition department of Cornell University, Dr. L. E. Henson of the Animal Husbandry Department at the University of Minnesota, Dr. A. D. Tillman of the Oakridge Institute of Nuclear Research in Oakridge, Tenn., and Dr. Couch.

L. B. Burns of Kansas City, Missouri, will speak on "New Developments in Feed Manufacturing". Dr. M. A. Cooley is scheduled to talk on "Quality Control of Feed Manufacture".

Also attending will be George Wolfe, president of University Mills in Fort Worth and head of the Mid-West Feed Manufacturer's Association.

Speaker at a banquet to be at the Maggie Parker Dining Hall at (See Nutrition Study, Page 2.)

LOOK THEY FIXED IT!—Jim Neighbors, Battalion News Editor tries out the new driveway entering the parking lot for the A&M Press. Before yesterday, it was almost impossible to enter the lot because of the ditch.
