

Hope From Hungarians

Hundreds of Hungarians have died and thousands have suffered in the bloody battle against communism and as far as material values are concerned, they haven't won very much.

What they have done, though, is to set an example for the rest of the world—especially for young people.

The fighters in Hungary and the demonstrators in Poland largely have been students. And too, what is more gratifying, they are the students who for 11 years have been relentlessly bombarded from all sides with communistic doctrines and false faiths.

Communism apparently failed to capture their imagination and loyalty. Such an example serves to give faith to the entire free world.

Here in the United States, we don't have much cause for actual rioting but there is a great and noticeable lack of leadership on the part of young people.

Every day we hear accusations charging us with being irresponsible and immature. Or, off on another verse, we are called the silent generation, too lazy to assert ourselves so we might develop into responsible, mature minded individuals.

But in actuality, we deserve these charges directed against our initiative and maturity for we, most of the time, certainly don't show much in the way of responsible, mature thinking and action.

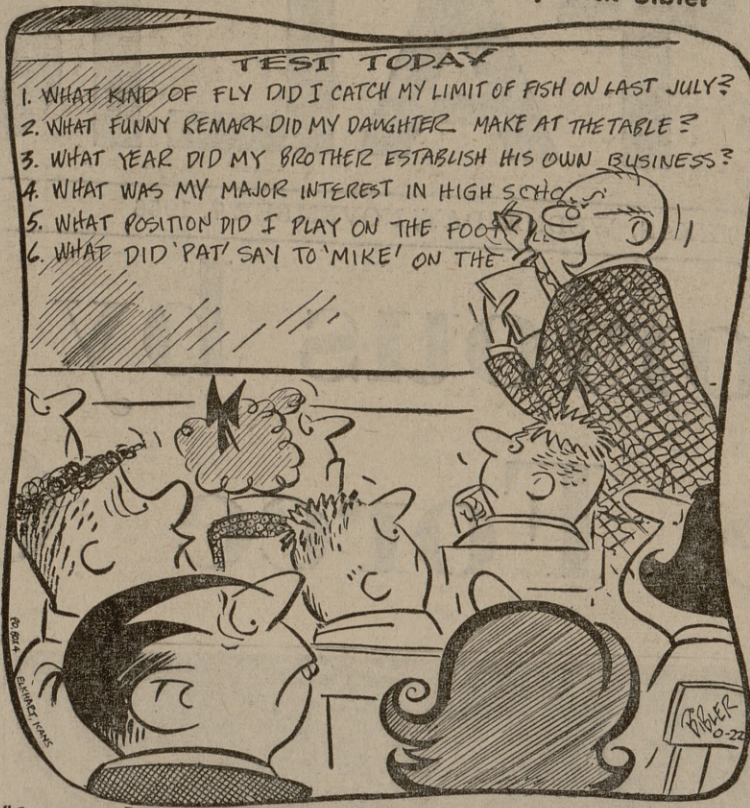

Naturally, these charges will always be leveled at us in some extent for there always will be those who will refuse to recognize anything but the bad we might do.

But this pitiful few will be easy to shout down if by our actions we show the rest of our so-called elders that we are responsible and dependable.

Best way to do this here at A&M is to actively engage in the many activities and groups here on the campus.

LITTLE MAN ON CAMPUS

"REMEMBER—I SAID THE TEST WOULD BE OVER CLASS DISCUSSIONS!"

Letters to the Editor

Editor,

The Battalion

To the Student Senate and Student Body:

It was with no small amount of gratification that I noticed in a recent edition of The Battalion that the Carnegie Foundation had awarded one of its top medals for heroism, posthumously, to James Sarraan who was fatally injured almost a year ago at Aggieland.

Almost everyone at Aggieland remembers this unfortunate accident and was deeply saddened by the loss of a fellow Aggie. Few of us will forget his heroic act in which he saved the lives of two other Aggies at the eventual cost of his own, which was above and beyond the call of duty of one individual to another.

Therefore, I would like to suggest to the Student Senate that they, on behalf of the student body, initiate action to have the portrait of James Sarraan added to the six portraits of those Aggies who have been awarded the Congressional Medal of Honor, now on display on the second floor of the College Administration Building.

Each of the six who hold the CMH won it by performing acts of heroism which were above and beyond the call of duty while en-

gaged in combat.

Though James Sarraan was not engaged in war, nor was he on a battlefield, his unselfish act of devotion to his fellow Aggies in pushing to safety two others was of the same high caliber of heroism as that displayed by the six holders of the CMH.

I sincerely believe that James Sarraan is worthy of joining this very select group of heroes and I invite all others to join me in recommending this action.

Nobel Scientist To Speak Here

Dr. Peter J. W. DeBye, 1936 Nobel Prize winner in chemistry, will deliver a talk on "Structural Analysis by Light and X-Ray Scattering" in the lecture room of the Biological Sciences Building Thursday.

"From his very extensive experience in Europe and America, together with his world research contributions," said the Munich University Graduate school announcement, "he is in a position to give us a look ahead in this important method of structural analysis."

DeBye, formerly of Cornell University before retirement, is a native of the Netherlands and holds a Ph. D. degree from the University of Munich, Germany. He has received several other degrees from universities in Europe and the United States.

The lecture is directed to graduate students, but the public is invited.

The bell standing in the Kremlin in Moscow weighs 180 tons.

Slight Oversight

SAN DIEGO, Calif. (AP)—A woman parked her convertible, carefully ran up all the windows and locked the doors. Then she walked away, leaving the top down.

PROBLEM: To evaluate the all-round career advantages offered by the widely diversified activities at Divisions of North American Aviation, Inc.

FIRST STEP: GET THE FACTS in man-to-man interviews, on campus NOVEMBER 14

As a graduate in Engineering, Physics, Applied Math. or allied subjects you need complete, factual information to help you make a sound decision in choosing your career. Get the facts in a man-to-man interview with our representative. Let him tell you about our unique placement and training devised to help your potential develop rapidly in a company where continued expansion has doubled the number of employees in 5 years. Your possibilities are wide and varied, as you will see from these brief notes on the 4 Divisions:

AUTONETICS creates automatic controls and electro-mechanical systems of a highly interesting nature. Work includes research, design, development, manufacture and testing; you will become a part of the latest advances in inertial navigation and guidance, fire and flight controls, analog and digital computers.

ROCKETDYNE is building power for outer space—large, liquid propellant rocket engines. The Field Test Laboratory in the Santa Susana Mountains is the most complete rocket engine workshop in the free world. Here a man meets more aspects

of his specialty in one week than in a year of "conventional" practice.

ATOMICS INTERNATIONAL is pioneering in the creative use of the atom. If you are able to meet the high requirements for this work, you can help introduce a new industrial era. Atomics International is designing and building varied types of nuclear reactors, for both power and research, with the practical experience gained by 10 years in the field.

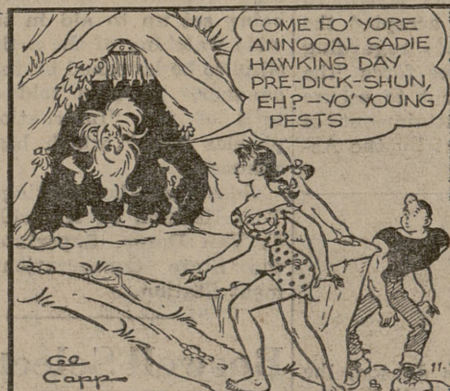

MISSILE DEVELOPMENT ENGINEERING Long range missiles, including the intercontinental SM-64 Navaho, present problems of the most fascinating nature. Speeds, materials and functions now being dealt with were only theoretical a few years ago. The work is vital; the opportunities for you, as a creative engineer, are correspondingly great.

CONTACT YOUR PLACEMENT OFFICE TODAY Make an appointment NOW to see North American Representative on campus. OR WRITE: Mr. J. Kimbark, College Relations Representative, Dept. 991-20, North American Aviation, Inc., Downey, Calif.

The Battalion

The Editorial Policy of The Battalion Represents the Views of the Student Editors

The Battalion, daily newspaper of the Agricultural and Mechanical College of Texas and the City of College Station, is published by students in the Office of Student Publications as a non-profit educational service. The Director of Student Publications is Ross Strader. The governing body of all student publications of the A&M College of Texas is the Student Publications Board. Faculty members are Dr. Carroll D. Lavery, Chairman; Prof. Donald D. Burchard, Prof. Tom Leland and Mr. Bonnie Zinn. Student members are John W. Gossett, Murray Milner, Jr., and Leighton E. Sheppard, Jr. Ex-officio members are Mr. Charles Roeder, and Ross Strader, Secretary. The Battalion is published four times a week during the regular school year and once a week during the summer and vacation and examination periods. Days of publication are Tuesday through Friday for the regular school year and on Thursday during the summer terms and during examination and vacation periods. The Battalion is not published on the Wednesday immediately preceding Easter or Thanksgiving. Subscription rates are \$3.00 per semester, \$6.00 per school year, \$5.00 per full year, or \$1.00 per month. Advertising rates furnished on request.

Entered as second-class matter at Post Office at College Station, Texas, under the Act of Congress of March 3, 1879.
