## CAREER OPPORTUNITIES Engineering And Science Students

Our positions are for young men who want responsibility in technical line supervision and management, engineering and scientific staff duties, research and development, and technical sales.

If you are looking for a comfortable, indoor job with completely regular hours, forty hours a week, and entirely pleasant working conditions don't bother to read further.

If, on the other hand, you like change, variety, activity, the continual meeting of new challenges and can tolerate irregular hours and rugged working conditions you may be interested in the following.

**WHAT DO WE DO?** We're a service company to the petroleum industry. Our major services include fracturing, acidizing, radioactivity logging and perforating of oil and gas wells. These are complex technical services which are indispensable to the more effective recovery of oil and gas from underground reservoirs.

**NEVER HEARD OF US?** We're a comparatively young but vigorously growing company. We started at Seagraves, Texas in 1939 with only four people. We now have almost 600 employees and maintain operating districts in four states — Texas, New Mexico, Oklahoma and Kansas. Our home offices, research laboratories, engineering offices and manufacturing shops are located in Midland, Texas, headquarters city of the vast oil and gas producing Permian Basin. A laboratory for major research is maintained in Dallas.

**PAY AND BENEFITS?** Pay is competitive with any in the industry. Group hospitalization and life insurance, group retirement plan, paid vacations, generous illness and disability benefits, employee credit union, etc. Employee profit-sharing plan being developed.

**OPPORTUNITY?** It's wide open. Promotions and advancements are based on proven merit not seniority.

**QUALIFICATIONS?** Applicants must be under 30 years of age and should be senior candidates for graduation (January, June or August) in one of the following fields: mechanical, petroleum, chemical, electrical, geological, civil and industrial engineering; chemistry, geology and physics.

**WANT TO KNOW MORE?** Our representatives will visit A. & M. COLLEGE on Thursday and Friday, November 15 and 16. Appointments for interviews on these dates may be made in advance at the PLACEMENT OFFICE.
