

Russia Orders U.S. Ass't. Attaches Out

MOSCOW, (AP)—Soviet Russia, in apparent retaliation for the expulsion of Russians by the United States, yesterday ordered two American assistant military attaches to go home.

The two expelled are Maj. Hubert E. Tansey of Arlington, Va., and Capt. Charles W. Stockell of Jacksonville, Fla.

The U. S. Embassy was not surprised. It had been expecting some such action since the U. S. State Department announced Jan. 5 that Maj. Yuri P. Krylov, Soviet assistant military attache in Washington, had been ordered out of the country on the ground he had tried to buy military information and obtained improperly electronic equipment.

Vassili M. Molev, described by the Soviet Embassy as a clerk, also left New York last Sunday. Washington sources said he was

expelled in connection with the New York arrest on spy charges of Jacob Alban and the naturalized Americans Jack and Myra Soble.

A note handed to U. S. Ambassador Charles Bohlen by the Soviet Foreign Ministry, charged that the two military attaches had been "engaged in activities incompatible with their status as accredited diplomatic officials."

It said their further stay in the Soviet Union, therefore, was "undesirable" and that their immediate departure was demanded.

The note gave no details of the charges and set no time for the two attaches to leave. The U. S. Embassy said no time had been arranged for the departure.

Medlen Tells Lions Of New Members

"We are looking for Lions rather than members," Dr. A. B. Medlen of the Biology Department told the College Station Lions Club at their weekly meeting in the Memorial Student Center Monday.

Dr. Medlen explained to the group the processes by which new members were obtained by the organization. He stressed that by careful selection the club could profit by the quality of its members.

ALL THAT'S LEFT of a twin engine Beechcraft executive plane belonging to Sohio Oil Co. which crashed Friday night north of Bryan Air Force Base. Six persons were killed in the crash. The plane was attempting an instrument-directed emergency landing after one engine had failed.

Dancing Classes Start Tues. in MSC

The MSC dance classes will begin registration Tuesday at 7:45 p.m. and will continue for two weeks in the Directorate Office, announced Miss Shirley Cannon, Program consultant.

Seven committees will begin the new semester with meetings Monday night at 7:30. The committees and meeting places are: Radio Committee, Social Room; Browsing Library, room 2A; Dance Group, room 2B; Public Relations, room 2C; Table Tennis, room 2D; House Group, room 3C and Music Group, Senate Chamber.

The century plant blooms once in its lifetime; not once in 100 years as its name seems to indicate.

One of the most popular gathering places for Germans in West Berlin is the American Memorial Library with its 180,000 books.

"What really sold me," says Jerry, "was the way they conducted engineering. I'd expected rooms full of engineers at desks. Instead, I found all the informal friendliness of my college lab."

Gerald, an E.E., came directly to IBM from the University of Buffalo, in 1953. Starting as a Technical Engineer, he was immediately assigned to work, with two others, on designing a small calculator. The supervisor of this project was Dr. R. K. Richards, author of "Arithmetic Operation in Digital Computers." Jerry learned a great deal about computers in a very short time. Incidentally, his particular machine is now going into pro-

duction. As Jerry says, "It makes an engineer feel good to see his project reach the production stage—and to be able to follow it through."

Promoted to Associate Engineer after 16 months, Jerry is now the leader of a nine-man team. He assigns problems to his group for solution, approves their block diagrams and the models they build. Perhaps an hour a day goes into paper work such as requisitioning equipment for his group and reviewing technical publications, in counseling members of his team and preparing for trips to technical society meetings. Apart from his regular responsibilities, he teaches at night in the IBM school.

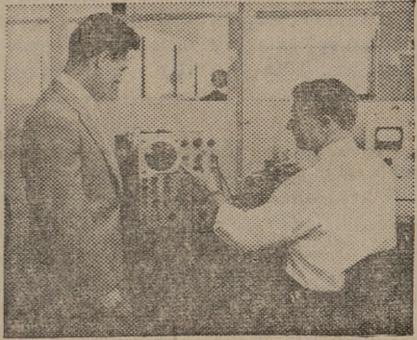

Why Jerry chose IBM

Of course, there were other reasons why Jerry selected IBM. He was vitally interested in computers, and IBM was obviously a leader in the field. He comes from a scientific family

"What's it like to be A PRODUCT DEVELOPMENT ENGINEER AT IBM?"

Three years ago, college senior Gerald Maley asked himself this question. Today, an Associate Engineer and leader of a nine-man team, Jerry reveals his experience at IBM and gives some pointers that may be helpful to you in taking the first, most important step in your engineering career.

(his brother is a mathematician) and is fascinated by these mathematical marvels which are revolutionizing man's ways of doing things in so many fields. He enjoys working on large equipment . . . and on "pulses." "It's more logical," he says. "In computer

This field is so new

work, you can actually see things happening, which is not the case with all electronic equipment today. And it's not all solid math, either. What's more, this field is so new, that pretty soon you're up with everybody else."

Gerald has done recruiting work himself for IBM and believes he understands some of the college senior's problems. "I usually begin an interview by determining a man's inter-

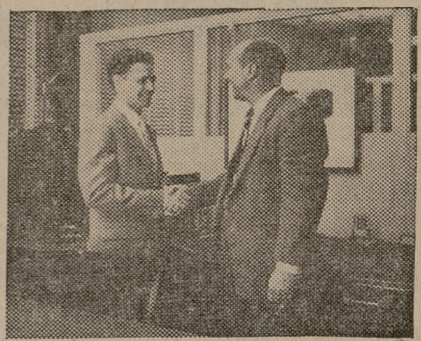

Reviewing technical publications

est," he reports. "Then the diversity of work at IBM enables me to offer him a job which will challenge that interest." Gerald distinguishes between two kinds of engineers—those who like to work on components, such as circuit designs, and those who are interested in the part the component

plays. The latter is his own interest, which is why he is in advanced machine design. He points out that IBM is careful to take these factors into consideration—another reason, perhaps, why turnover at IBM is less than one-sixth the national average.

What about promotions?

When asked about advancement opportunities at IBM, Jerry says, "You can hardly miss in this field and in this company. They tell me sales about double every five years—which in itself makes promotion almost axiomatic." He endorses the IBM policy of promoting from within, with merit the sole criterion. The salary factor, he remembers, was not his first consideration. While excellent, the tremendous advancement potential was of far greater importance.

Promotion almost axiomatic

IBM hopes this message will give you some idea of what it's like to be an E.E. in Product Development at IBM. There are equal opportunities for I.E.'s, M.E.'s, physicists, mathematicians, and liberal arts majors in IBM's many divisions—Research, Manufacturing Engineering, Sales and Technical Service. Why not drop in and discuss IBM with your Placement Director? He can supply our brochure and tell you when IBM will interview on your campus. Meanwhile, our Manager of Engineering Recruitment, R. A. Whitehorse, will be happy to answer your questions. Just write him at IBM, Dept. 8801, 590 Madison Ave., New York 22, N. Y.
