# Filing Deadlines For Editor Set

March 15 for The Battalion and March 1 for the other student publications have been set as deadlines for editorship applications, according to Ross Strader, director of student publications.

The magazines are the Agriculturist, Commentator, the Southwestern Veterinarian and the Aggie-land.

Battalion and Aggie-land editors are appointed after certification of eligibility, and recommendation by the director of student publications.

## What's Cooking

The following clubs and organizations meet tonight:

Galveston Hometown Club picture will be taken in front of the College Administration Building.

Educational - Psychology Club meets in room 3B of the MSC.

Physics Club meets in room 320 of the Physics Building.

American Veterinary Medical Association meets at the Veterinary Hospital. Dr. Bunce, Chicago Pharmacy Co., will demonstrate uses and application of ophthalmoscope.

S.A.M.E. will meet tonight at 7:30 in C. E. lecture room.

Accounting Society meets in the Social Room of the MSC. Dr. Stevenson will talk on "Sales Cost Analysis".

7:40

Accounting Society meets in the Social Room of the MSC. Dr. Stevenson will talk on "Sales Cost Analysis".

Editors of the four magazines are appointed in the same fashion but in addition must have the concurrence of the student council of the school served by the magazine.

Minimum requirements are:

- One year's experience on the staff of a student publication and proved capacity to carry on the work.
- Junior or senior classification
- Degree of academic probation or disciplinary action.
- Grade-point average of at least 1.5 through the fall semester.

Interested students are asked to file written application which may be picked up at the Office of Student Publications on the ground floor of the YMCA.

There is a never ending need for more participation on the student publications.

Present editors of the publications are constantly on the lookout for more freshmen and sophomore participation on the publications.

Journalism courses are helpful but they are not prerequisite. A good background in English in addition to native ability can be sufficient qualification. An early start in publications work should make later English and journalism courses more meaningful.

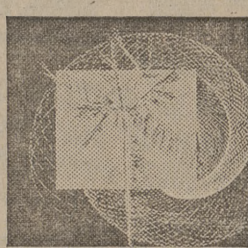

The A&M student publications program offers many opportunities for writers, editors, circulation men and advertising salesmen.

**PROBLEM:** To evaluate the all-round career advantages offered by the widely diversified activities at Divisions of North American Aviation, Inc.

**FIRST STEP:** GET THE FACTS in man-to-man interviews, on campus FEBRUARY 11 & 12

As a graduate in Engineering, Physics, Applied Math. or allied subjects you need complete, factual information to help you make a sound decision in choosing your career.

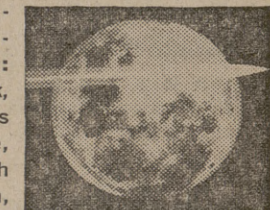

of his specialty in one week than in a year of "conventional" practice.

ATOMICS INTERNATIONAL is pioneering in the creative use of the atom. If you are able to meet the high requirements for this work, you can help introduce a new industrial era. Atomics International is designing and building varied types of nuclear reactors, for both power and research, with the practical experience gained by 10 years in the field.

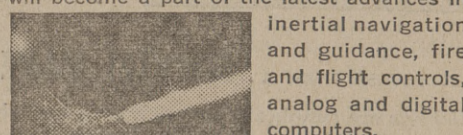

MISSILE DEVELOPMENT ENGINEERING  
Long range missiles, including the intercontinental SM-64 Navaho, present problems of the most fascinating nature. Speeds, materials and functions now being dealt with were only theoretical a few years ago. The work is vital; the opportunities for you, as a creative engineer, are correspondingly great.

CONTACT YOUR PLACEMENT OFFICE TODAY  
Make an appointment NOW to see North American Representative on campus. OR WRITE:  
Mr. J. Kimbark, College Relations Representative, Dept. 991-20, North American Aviation, Inc., Downey, Calif.

AUTONETICS creates automatic controls and electro-mechanical systems of a highly interesting nature. Work includes research, design, development, manufacture and testing; you will become a part of the latest advances in inertial navigation and guidance, fire and flight controls, analog and digital computers.

ROCKETDYNE is building power for outer space—large, liquid propellant rocket engines. The Field Test Laboratory in the Santa Susana Mountains is the most complete rocket engine workshop in the free world. Here a man meets more aspects
