

Social Whirl

Wildlife Management Wives will meet at 7:30 p.m. Tuesday in the wildlife lab on the third floor of the Agricultural Engineering Building. Dr. W. B. Davis, head of the department, will speak to the group.

At the last meeting of the club, Gail Oglesby was elected parliamentarian to replace Jeanette Spears, whose husband graduated in January.

A game party is planned by the A&M Women's Social Club for 2 p.m. Friday in the Memorial Student Center ballroom. Mem-

bers should note that the meeting time has been moved up one hour. Bridge, Canasta, Forty-two and Crazy Bridge will be played. Those attending are asked to bring their own cards, pencils and score pads. Prizes will be awarded for each game.

Hostesses for the afternoon will be ladies of the School of Veterinary Medicine, under the chairmanship of Mrs. W. W. Armistead.

Reservations must be in by noon Wednesday. Both publicity and reservations are being handled by Mrs. John H. Milliff. Tickets for guests will be 50 cents each.

Allegiance Of Women Voters Sought By Both Major Parties

WASHINGTON (AP)—With 4 1/2 million more women than men of voting age in this country, both political parties are increasingly challenged with how to win the allegiance of the woman voter.

So far, neither party has been able to depend on how its women members will vote once they get to the polls, according to Dr. Louise M. Young, Washington author, lecturer, and student of women in politics.

This was evident in the November election, she says, where ticket splitting of the independent voter was largely responsible for the overwhelming endorsement of President Eisenhower while keeping the control of Congress in the hands of the opposite party. Dr. Young feels the increasing independence of the "independent" voter undoubtedly can be attributed to women.

"When women were enfranchised," she pointed out, "they weren't drawn into the parties, nor were they given any real status in the parties."

NSA Hears Talk On New Legislation

Women's rights legislation which will be introduced in the state legislature this session was the topic last Tuesday of an address by Miss Lola Barron, Bryan attorney, before the local chapter of the National Secretaries Assn.

The bills are designed to remove restrictions currently in effect in Texas with regard to legal transactions by women, Miss Barron said. These restrictions are known as the "separate acknowledgment" and "separate property" laws.

Miss Barron urged that women inform themselves concerning the bills to be considered by the legislature and then let their legislators know their opinions.

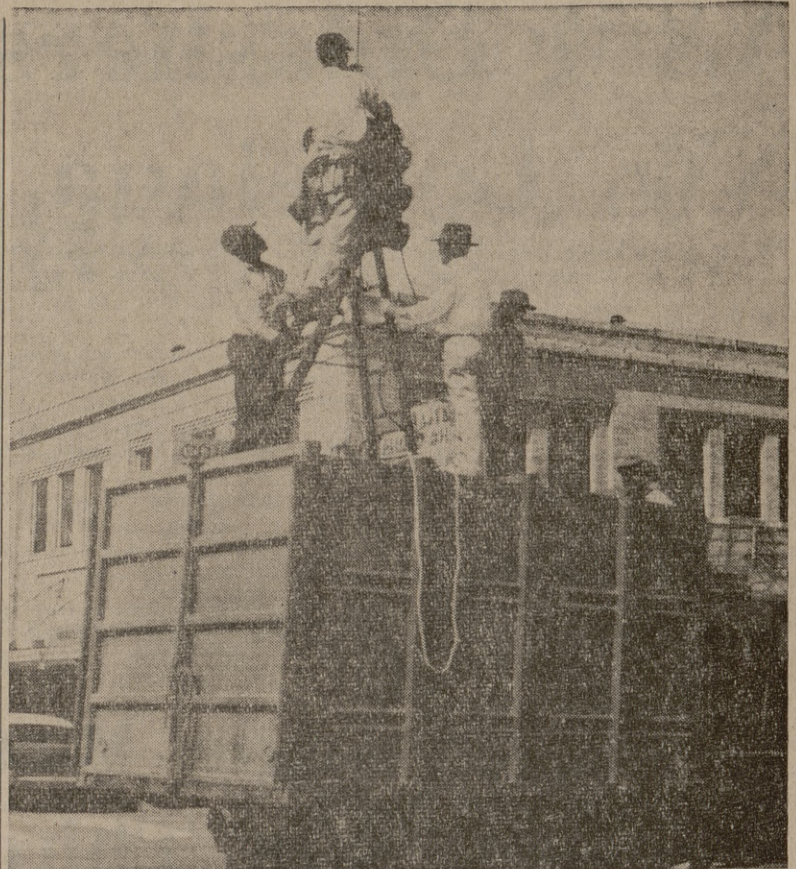

An eggplant that weighs about a pound, and is often called medium-sized, is good for stuffing when four persons are to be served.

Craig Named To Advisory Group

R. N. Craig, of A&M's Agricultural Education Dept., has been named to an advisory committee of the newly organized Thor Research Center for Better Farm Living at Marengo, Ill. The 1937 graduate of A&M will serve on the committee dealing with mechanization.

Dedicated last fall by Secretary of State Ezra Taft Benson, the non-profit research center helps farmers offset their heavy dependence on farm production machinery with modern methods, material and tools for equipment maintenance and home improvement.

Craig has been in charge of the farm shop program in the Agricultural Engineering Department since 1946. During this period, he directed shop training for Ag Ed courses.

NORTH GATE'S BUSIEST street corner became more trafficable last week as city employees (shown above) replaced the spasmodic traffic light with a modern three-color one.

What's Cooking

The following clubs and organizations will meet tonight as scheduled.

7:30 p. m.
AIEE will meet in room 207 of the New Engineering Building to hear Ralph Odum '47, speak on manufacturing engineering.

Pre-Med-Pre-Dent Society will meet in the Biological Sciences Building to see two films.

Saddle & Siroin Club will meet in the AI Building Lecture Room to make plans for the Little Southwestern Contest.

Lingering Light

BECKLEY, W. Va. (AP)—It would be hard to convince Mrs. E. L. Ellison that modern production methods turn out better materials than the old ones did. Mrs. Ellison says she has used one light bulb on her front porch the last 40 years—and it still works.

IT'S FOR REAL! by Chester Field

LOUIE, THE LOUSE

He strolled through a keyhole into my house, A dignified, well-bred upper-class louse; He smiled in a most superior way And said, "Man has just about seen his day. If you'll take my advice for what it's worth Treat insects nice, they'll inherit the earth! Try to be beyond reproach In your dealings with the roach... Bedbugs, ants and spiders, too. Don't forget... WE'RE WATCHING YOU!"

MORAL: Well... until Louie takes over, take your pleasure BIG. Smoke Chesterfield... and smoke for real! Packed more smoothly by ACCU-RAY, it's the smoothest tasting smoke today.

Smoke for real... smoke Chesterfield!

LOCKHEED Aircraft Corporation
California Division • Georgia Division

Lockheed Representatives of the California Division and the Georgia Division will be on campus
Thurs. & Fri., February 21 & 22

You are invited to consult your placement officer for an appointment.
Separate interviews will be given for each division.

Both divisions of Lockheed are engaged in a long-range expansion program in their fields of endeavor.

California Division activities in Burbank cover virtually every phase of commercial and military aircraft. Seventeen different models of planes are in production, including cargo and passenger transports, high Mach performance fighters, jet trainers, radar search planes, patrol bombers.

B. S. graduates who wish to attain a Master's Degree will be interested in the California Division's Masters-Degree Work-Study Program. In the program, participants achieve their M.S. while working concurrently on Lockheed's engineering staff.

At Lockheed in Marietta, Georgia, new C-130A turbo-prop transports and B-47 jet bombers are being manufactured in the country's largest aircraft plant under one roof. The division is already one of the South's largest industries. Moreover, a new engineering center is now in development as part of the division's expansion program. In addition, advanced research and development are underway on nuclear energy and its relationship to aircraft. A number of other highly significant classified projects augment the extensive production program.

This broad expansion program is creating new positions in each division. Graduates in fields of: Aeronautical Engineering, Electrical Engineering, Mechanical Engineering, Mathematics and Physics are invited to investigate their role in Lockheed's expansion.
