

Aggie Nine Entertains TLC If Rains Hold Off

By JIMMY CARRELL

The rains came and farmers are appreciative, but baseball players, interested in playing ball, find Kyle Field conditions more suitable for growing crops.

The Aggies play host to Texas Lutheran College at 3 p.m. Wednesday, the weatherman permitting, and as the case has been for the past week, Coach Beau Bell will probably pitch Donnie Hul-lum and Bo Paradowski.

Rained out for three straight games, the Aggie baseball team looked for competition from the Fish in an intra-squad game Saturday, and unexpectedly found the going tough.

A two-run homer over the right centerfield fence by left fielder Cliff Tuttle in the last of the tenth inning broke a 5-5 tie and gave

the Aggies a 7-5 victory over their own freshmen in a game reminiscent of a year ago.

Under the same conditions last year, the Fish, holding a 4-4 tie with the varsity, saw a home run by Joe Boring in the tenth inning give the Aggies a 6-4 win.

Through five innings this was a pitcher's duel, with righthanded Percy Sanderson of Nederland throwing for the Fish, opposed by Aggie captain Dick Munday.

Sanderson, after five innings, held Aggie bats to only two hits, doubles by Tuttle and Lyle Gibson, but tired in the sixth to yield a run to varsity batters. Munday gave up four hits in five innings and was relieved by Paul Lang who gave up three hits the rest of the way. Lang's wildness, coupled with timely hitting by the Fish, gave the freshmen a 4-1 lead at the end of the sixth.

The varsity tied it up in the next inning scoring three runs and in

the eighth both teams scored once. The game then ran into an extra inning with Tuttle's two-run homer winning for the varsity in the tenth.

Tuttle led Aggie hitters, banging out a double and homer, with Gibson singling and doubling.

Norman Stutte doubled in two runs and Dennis Chandler singled twice to pace freshman batters who outhit the Aggies, 7-6.

CHS Golfers Capture Meet With Bastrop

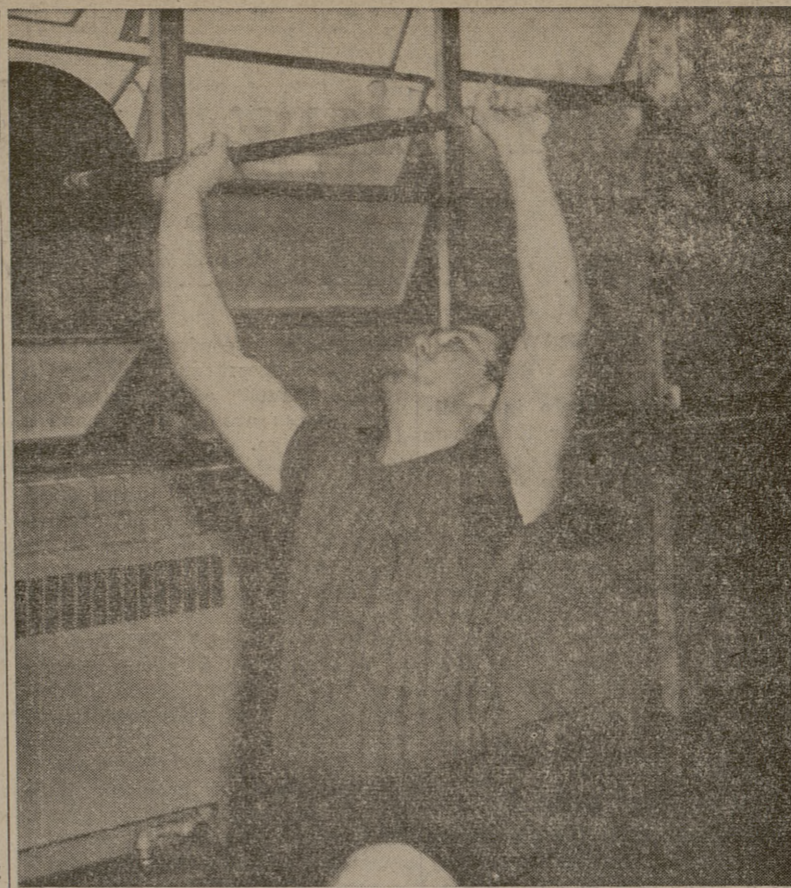

A&M Consolidated golfers, with a top foursome score of 316, won a dual meet with Bastrop on the A&M course Saturday.

Other Tiger athletes were not so fortunate, the track team taking only one place in the Bronco Relays at Dayton, and the tennis team, with five performers in the quarterfinals of the Centex Tennis Tourney at Austin, saw each member eliminated at that point.

Jerry Holland fired a par-72 to post the lowest score of the dual meet with Bastrop, the Tigers winning 18-3. In the junior high division the Kittens whipped Bastrop 20½ to ½, with Ronnie Ray having the low score of 85.

Donald Tax placed second in the broad jump at the meet, staged in Dayton, leaping 19-7¾. Tax qualified in the 120-yard high hurdles, but failed to place in the finals.

Don Avera, was the outstanding tennis performer for the Tigers, winning three matches, before bowing to Paul Como of Baytown, 6-3, 7-5. Avera had Como down 5-2 in the second set before losing. Como has twice been state champion in doubles, and was the eventual winner in boy's singles.

THE PAUL ANDERSON OF A&M—Henry Heatherly, captain of the Aggie Weightlifting team who took first in the 198-pound division at the Houston Odd Lift Contest recently. Heatherly takes his team into the regional YM-CA Meet this weekend in Houston.

Giants' Hofman Gets Chance As Replacement for Sarni

PHOENIX, Ariz., —(AP)— Although Bobby Hofman has received in only 20 major league games, the New York Giants' handyman may get his big chance as a catcher this season.

Hofman, who shares the big league mark for pinch-hit home runs with nine, isn't even on the Giant roster at present, having been assigned to the Minneapolis Millers last year after escaping waivers.

But with regular catcher Bill Sarni lost because of a heart at-

tack, Wes Westrum is the only experienced Giant receiver.

And Manager Bill Rigney conceded today: "Hofman could wind up at least our No. 2 catcher."

The only other Giant receiver is rookie Bob Schmidt, up from Dallas, who still has to prove he can hit major league pitching.

That provides a golden opportunity for Hofman, because, as Rigney says of 34-year-old Westrum, "our Iron Mike" can't catch them all.

Johnson, Thomas Win at Laredo Meet

Putting on a better showing than anticipated, A&M picked up two firsts and a pair of seconds in the Border Olympics in Laredo last Saturday.

Herman Johnson pitched the discus 156-3 to capture first in that event, then heaved the shot put 49-9¼ for a second. Winton Thomas, A&M's great vaulter, leaped 13-1 for first in the pole vault with teammate James Clark tying Texas' John Novey for the runner-up spot with a 12-7½ jump.

Texas ran away with the university division, scoring 92 points.

Bobby Morrow, Abilene Christian College's Olympic sprinter who won three gold medals in the 1956 games, took first in the 100 and 220-yard dashes and anchored ACC's winning sprint relay to a 40.8 clocking, erasing the 40.9 record set by Baylor in 1956.

The Steers' great Eddie Southern, another Olympic performer who took second in the 400-meter hurdles at Melbourne, swept both relays, setting a new 22.8 record in the 220-yard lows, and tying the old mark of 14.3 set by Rice's Fred Wolcott in 1939, and equalled by John Rowland, SMU, in 1949.

A Campus-to-Career Case History

Leader of an exploration

Owen Williams leads a team of research and development specialists at Bell Telephone Laboratories. His is one of many teams set up at the Labs to explore the frontiers of electronics and communications. In the picture above, Owen (right) discusses modulation problems in electron tubes with Robert Leopold, M.S., Electrical Engineering, University of Michigan, 1949.

Owen himself is thirty-one, and a B.E.E. from Rensselaer Polytechnic Institute, class of '49. He joined the Labs upon graduation, and was assigned to communications development training — the equivalent of a two-year postgraduate course in communications. Mixed with his classes were various assignments in

the Chem Lab, the switching and wave filter departments, and work on transmission systems and coaxial cables.

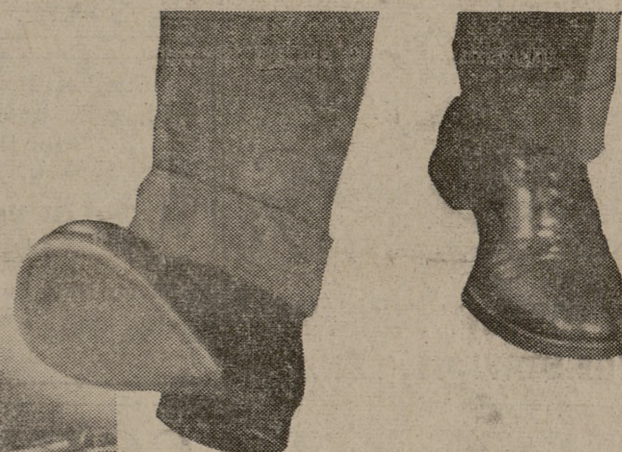

In 1954 Owen was promoted to supervisor. He works with two electrical engineers, both systems analysts, and four technical assistants. Their current job is exploratory development of submarine cable systems, looking towards great new transoceanic communications links.

Owen is one of many engineers and scientists in the Bell System whose principal responsibilities include those of leadership. The work of improving telephone service in the Bell System is guided, and decisions are made, by men who understand the problems involved at first hand.

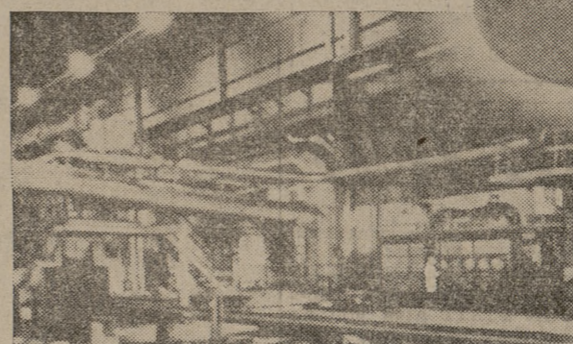

Many young men like Owen Williams are finding interesting and rewarding careers in the Bell System — at Bell Telephone Laboratories, in Bell Telephone Companies, Western Electric and Sandia Corporation. Your placement officer can give you more information about career opportunities in all Bell System companies.

Step into the Expanding Field of Instrumentation

Metallurgical Instrumentation

Atomic Reactor Controls

Design; Manufacture, etc., of L&N Products

System Control for Utilities

Automatic control, or automation, or data reduction are all Instrumentation, and offer some of the broadest and most satisfying careers available to today's engineers and scientists.

Atomic energy, iron and steel, aircraft and automobiles, chemicals and chinaware, petroleum and electric power are only a few of the many industries which need instruments. This need creates permanent opportunities in many of our operations, including research and development, product engineering, industrial engineering, production, inspection, market development and customer contacts.

The products with which you would be concerned include automatic, high-precision instruments for controlling, recording and indicating temperature, chemical concentration, radiation phenomena, frequency and load and many other conditions. For heat-treaters we make furnaces and process equipment. For the worker in science—whether student or researcher—we make both automatic and manual laboratory-type instruments, with which you may already be familiar.

The Company has about 3000 people—is one of the biggest in its field, yet is compact enough for you to be able to "follow the score." Its reputation for progressiveness in industrial relations, and for quality of product is world wide.

Russell E. Hansen, our Manager at Houston, will be on the campus on March 15, 1957 with information which he will cordially share about our very modern opportunities and rewards for engineers and scientists. Your placement bureau will arrange an appointment with Mr. Hansen, at your request.
