

Russian Might Fast Growing In Sea and Air

WASHINGTON (AP)—Warnings about the growing power of Russia in the air and at sea were sounded in an annual Defense Department summary report issued last night.

Donald A. Quarles, Air Force secretary at the time the report was prepared and now deputy secretary of defense, wrote that:

"The Soviet Union is now able to inflict catastrophic damage on this country in a single day. The ability of our air defense system to meet this threat is steadily growing, but the threat also is growing—at an equal or possibly greater rate. We must anticipate the greatest threat of all to our national security—the Inter-Continental Ballistic Missile—and prepare an effective defense against it."

From Charles Thomas, Navy secretary who recently resigned, came this:

"The Soviets have nuclear weapons and guided missiles and are well aware of the importance of adapting them to shipboard use. The Soviet Union today is the second ranking seapower in the world and moving up fast. The Red navy is developing rapidly far beyond defensive needs. It is designed not only to protect their sea frontiers from attack but to cut the sea communications of the free world and isolate our own and Allied forces overseas. The Soviets have a large and growing submarine force, about 300, and they are building more."

BHS Girl Chosen For Science Honor

Margaret Dehlinger, student at Stephen F. Austin High School, Bryan has been chosen to participate in the science program here this summer for outstanding high school students.

She will be in the biology section, which is under the direction of Dr. C. C. Doak, head of the Biology Department. Miss Dehlinger is the daughter of Dr. and Mrs. Peter Dehlinger, 4209 Nagle.

The biology program is a part of the five college cooperation plan made possible by a grant from the Fund for the Advancement of Education of the Ford Foundation. The program is offered tuition-free to approximately 125 outstanding students of Texas High Schools.

A&M has the program for young biologists, Texas Tech for physicists, Rice and S. M. U. for mathematicians and Texas U. for chemists.

'Texas in Review' Features Ag Rodeo

A&M's hard riding cowboys will be in the limelight next week on "Texas in Review," Humble's weekly TV program. Close-up shots of riding, roping and bull-dogging events at the National Intercollegiate Rodeos at A&M and Hardin-Simmons College will be shown.

Other events included on the show will be the crowning of "Miss Splash Day" in Galveston, the Stephen F. Austin Day Pageant in Amarillo, the Texas Interscholastic League's slide rule contest in Houston and the 90th annual Texas Medical Association Convention.

Crippled Society Meeting Tonight

Brazos County Society for Crippled Children will hold its annual meeting tonight in the Council Room of the City Hall in Bryan.

J. O. Alexander will report on the progress of the establishment of a Crippled Children's Therapy Center in Bryan and Roy M. Wingren is to give a report of the 1957 Crippled Children's Diagnostic Clinic held at the A&M Presbyterian Church Monday.

John J. Sperry, president of the society, invited all interested persons to attend the meeting, especially the parents of crippled children.

Students Speak At Engineer Meet

Jack Lunford and Alvin E. Richey gave talks at the American Institute of Chemical Engineers regional meeting held here Saturday.

Lunford gave a talk on "The Purification of Saline Waters" and Richey gave a talk on "Pathologic Protection of Metals".

All the talks at the meeting were by students except for a talk by Electrical Engineering Professor Robert L. Smith on the "Role of Digital Computers as an Aid to the Engineer."

About 100 students and professors from Rice Institute, University of Texas, University of Houston, A&M, Lamar Tech and Texas Tech attended the regional meeting.

Bury a can of evaporated milk in ice if you want to chill it rapidly before beating.

FACULTY APPRECIATION AWARD WINNERS are presented Parker "61" pen and pencil sets by Dub Bailey, president of the Arts and Sciences Council. Left to right are Bailey, A. B. Medlen, William S. McCully and C. K. Esten. The three winners received sets Monday night at the Arts and Sciences Council meeting.
