Off the Cuff What Goes On Here

Robert B. Kamm, dean of Student Personnel Services and the Basic Division, leaves Saturday for Florida State University, in Gainesville, to give a series of lectures at a personnel services workshop. He is presently serving as president of the American Colleges Personnel Association.

★★★
A note from the Houston Aggie Dingbat on Aggie recruiting . . . "If you have a good prospect, just send his name and data up to Coach Paul Bryant and let him do the contact work. Lavish entertainment, which can be as much as a hamburger, could get us right back in the doghouse again. So let's be careful in any dealings with prospective Aggie Athletes."

★★★
And still another note from the Dingbat . . . "The Office of the Commandant at A&M has asked that Aggie Ex's donate your old green blouses and pink slacks to the Cadet Corps so that our distinctive uniform can be retained. The Air Force will furnish only blue uniforms from now on, so unless we can come up with enough of the greens the Corps will be wearing both blues and greens." Anybody for hand-me-downs?

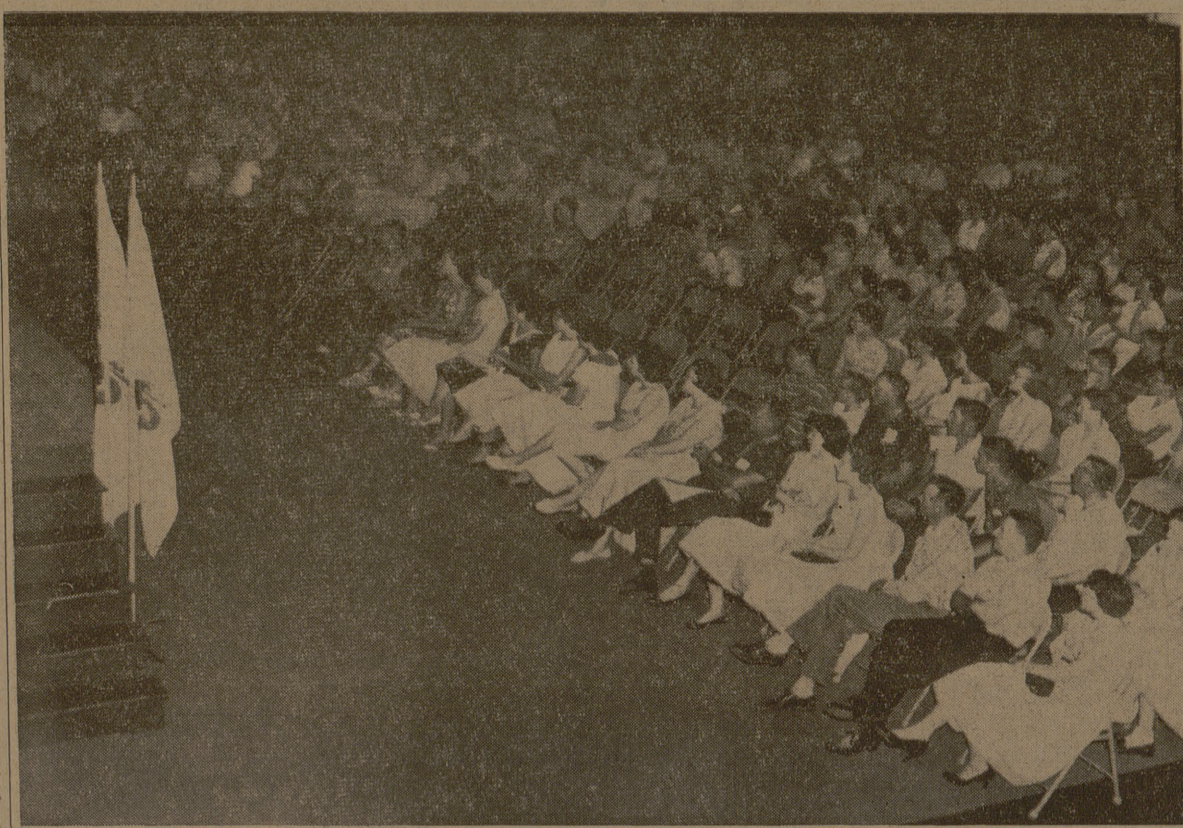

★★★
The following item was clipped from the Dal-Aggie, the official weekly publication of the Dallas A&M Club. Their reaction to A&M's being lifted from the NCAA probation was "we stared in disbelief, as a child stares at his first full size bicycle under the Christmas tree, for it is more than we could imagine to be free and untainted in our athletic programs at Aggieland." It's not so hard to take!

Shrode Tells Kiwanis How NIRA Started

Bob Shrode told the College Station Kiwanis Club Tuesday about the National Interscholastic Rodeo Association and how it was started at A&M. He showed the members of the luncheon club films taken of rodeos at several schools in the southern district of the association.

Vickie Blankenship, one of the high school biology students attending summer school here, spoke to the group and told them about the program that enables outstanding high school students to receive advanced training in several colleges in the Southwest.

Under the direction of Tony Sorenson, the group sang several songs.

THIS IS ONLY A SMALL part of the 2,000 4-H Clubbers gathered here on the campus this week. It seemed as if most of the others were either in the MSC or walking around the streets.

Milk Industry Leader Says Problem Lies in Marketing

The solution to the nation's "surplus" milk problem lies in marketing our abundance rather than in limiting our production, a milk industry leader recently said.

The spokesman, C. Raymond Brock of New Haven, Conn., president of the Milk Industry Foundation (an international association of fluid milk processors and distributors) came out against proposals to place quotas upon the amounts of milk that dairy farmers may be allowed to produce. He pointed out that our present excess of milk production over milk consumption would be eliminated if each person in the United States could be encouraged to increase his milk use by only two ounces per day, on the average.

Mr. Brock spoke at a special

"milk industry" luncheon meeting of the New Haven Kiwanis, at which members of the Board of Directors of the Milk Industry Foundation were the guests of honor. The Board is holding its annual spring meeting this week at Pine Orchard, Conn.

"Like some other foods, the U. S. production of milk has, in recent years, exceeded the nation's consumption of milk and dairy products," he said. "Thus, we are said to have over-production of milk. Consequently, we have heard in recent months of proposals for limiting production, for placing quotas on the amounts of milk that farmers may be allowed to produce; just as quotas have been placed upon tobacco, wheat, and cotton.

"But, I say to you, the solution of the problems does not lie in artificial limitation of production; nor in having the government raise prices to artificially high levels, at the taxpayers' expense.

"The solution lies, instead, in encouraging the efficient dairy farmers to do an even more efficient job of producing milk at the lowest possible cost, but with a reasonable return for their investment in land, buildings, equipment and labor. And the second part of the solution lies in marketing this abundance, rather than in curtailing the supply. For the sad fact is, despite America's prosperity and unprecedented level of living, one-fourth to one-third of our people still have inadequate diets. And the deficiencies in their diets can be made up, to a large extent, by a greater consumption of milk and dairy products."

Local Trio Give Recital In MSC

Mrs. Joa Barron, Miss Anita Mowery, and Charles Mitchell are giving a recital Sunday June 17, at 3 p. m. in the Memorial student Center.

Mrs. Barron, music graduate of Texas State College for Women, is a voice teacher in Bryan. She has sung leads in many A&M operettas and is now assistant director of operettas.

Anita, daughter of Mr. and Mrs. I. C. Mowery of 606 Fairview, is

the accompanist for the A&M Consolidated Choir. She studies piano under Mrs. J. B. Batey of College Station. In 1956 she won a first place medal, a cash award, and an honorable mention medal.

"For the past four years I've played in the National Guild of Piano Teachers. Each year I've won a National Superior rating," said the 14 year-old piano player. She has studied music for nine years.

Charles Mitchell, a Graceland College graduate from Iowa, has sung in some of A&M's operettas. He has one of the leads in this summer's production of "Smoky Mountain."

Mrs. Barron will open the program with the selections "When I Have Sung My Songs" by Charles, "Zegeuner" by Coward and "A Little Bit of Heaven" by Ball.

Anita will perform next with her selections of "Etude opus 10 Number 12" by Chopin, "Lotus Land" by Scott, "Pinnocchio" by Bellini, and "Fantastic Dance Number Three" by Shostakovitch.

Mitchell will follow with "Everybody's Got a Home" by Rogers, "Water Boy" by Robinson and "Desert Song" by Romberg.

Last of the program will be Mrs. Barron and Mitchell in three duets. They are "They Didn't Believe Me," "The Song Is You" by Kerr and "It's a Grand Night for Singing" by Roger.

Reverse Twist

LANDER, Wyo. (AP)—Chasing an officer can be just as costly as when they chase you.

James Gazewood was fined \$30 for speeding after Patrolman Rex Minshall testified Gazewood followed him at 80 miles an hour while the patrolman was rushing to an emergency.

4-H Roundup Closes Today For Delegates

Local Lions Hear Dewey On Legislature

Brownrigg Dewey, representative to the state Legislature from Brazos County, spoke to the College Station Lions Club Monday about the accomplishments of this year's House.

Carl Lyman presided at the weekly luncheon meeting and introduced Dewey to the group. The representative then told the group what he considered to be the major achievements made by the House of Representatives and the State Senate.

Dewey said he believed the pay raise for teachers was the most important item passed by the legislature and he considered the reorganization of the State Insurance Board next in importance.

He went on to explain something about the new workmen's compensation bill and told the group the weekly allotment was raised from \$25 to \$35 per week. Dewey said that, of the 1,442 bills presented before the legislature, 516 were passed and there were 68 proposed constitutional amendments.

Dr. Don Davis gave a report of the light bulb sale put on by the local club and said the group sold almost 90 bags over their quota.

On June 24, the group plans a ladies night and smorgasbord.

2,000 Attend Annual Meeting

Today two thousand 4-H delegates, contestants and visitors, who attended the annual Texas 4-H Roundup here, leave their meetings and head for home.

The grand opening for this year's Roundup was held at 8 p. m. in the G. Rollie White Coliseum launching the "People-to-People Partnership" program throughout 4-H Club work in Texas.

A film featuring President Eisenhower's related message was a highlight of the evening program, and the keynote speech was presented by director G. G. Gibson. The evening continued with the State Share-the-Fun Festival, presented under the direction of Lucille Moore, extension recreation specialist.

Closing the program, was a candle lighting service emphasizing the spiritual side of 4-H Club work, or the Heart "H".

Developing their "Roundup" theme, "People-to-People Partnership," county delegates, adult leaders, and county extension agents exchanged ideas and set up new goals in six different discussion groups: The role of the 4-H citizen, 4-H in civil defense, 4-H in group action, 4-H in agriculture, home economics and related subjects, improving people to people communications, and fitting 4-H into farm and home development.

Houston Pastor Named By CS Methodists

Reverend James B. Argue of Houston will take over the pastorate of the A&M Methodist Church Sunday June 16, relieving Rev. Nolan R. Vance.

Rev. Argue was born in Tulsa, Oklahoma in 1921. He received a Bachelor of Arts degree from DePaul University in Greencastle, Indiana. He is a member of Sigma Nu and Pi Sigma Alpha fraternities and president of Houston DePaul Alumni Club. His graduate work was done at Southern Methodist University and the University of Houston.

Rev. Argue entered the Methodist ministry in 1947 and has served the pastorates of Arcadia, Alta Loma, Tenarha, and Foster Place Methodist Church in Houston. The past five years have been spent at the Foster Place church.

The former Ann Bourland of Galveston and Rev. Argue were married in Bryan in 1948. Mrs. Argue was born in Vernon, Texas, and is a graduate of Texas University.

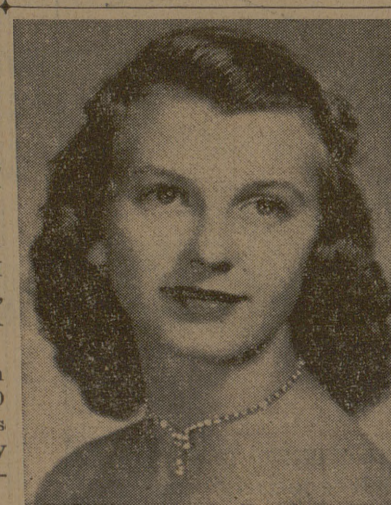

Rev. Argue has two children; James B. Jr. and Marsha Lynn. James Jr. is five years old and Marsha is two.

While in college, Rev. Argue lettered in football and was a track trainer. He was also manager of the college radio station.

His first sermon in the A&M Methodist Church will be on "The House of Faith."

Scientific Program Conducted Here

Outstanding high school biologists from various schools of the state are attending A&M for an enrichment program under Dr. C. C. Doak, head of the Biology Department.

Anita Mowery

Texas Reserves Begin Training

Texas' only Army Reserve Division, the 90th Infantry, begins two weeks of summer training Saturday.

On that date, 4800 Texans composing the 90th move into Fort Polk, La., where they will train this year.

The Division has nearly doubled in size since 1955, the first year it went to camp under its present Commanding General, Brigadier General Earl Rudder. 2500 men attended summer training that year.

Sponsored by the Fund for the Advancement of Education, the Scientific Enrichment Program will last for five weeks. During that time the 24 students will take two overnight trips. One trip will be to San Antonio and the other to the Galveston, Houston area.

While at A&M the students will begin biological projects which will be entered in the National Science Fair next spring. The students will study biological methods in panel discussions under the supervision of Doak and various guest speakers. Lectures, film studies, field trips, and museum visits are all part of the program.

Similar programs are being conducted at other colleges and universities in the state. Math programs are in progress at Southern Methodist University and Rice Institute, chemistry at Texas University and physics at Texas Tech. These programs were established by the Ford Foundation. This is the first year A&M has entered such a program.

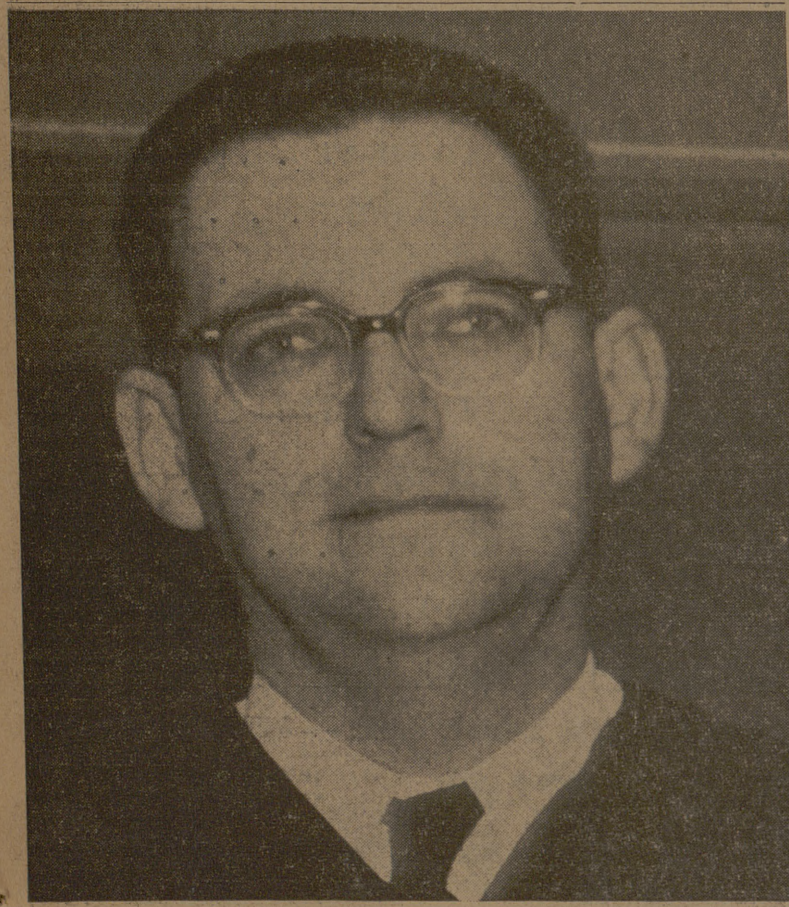

Twelve selected schools received letters asking for their outstanding biology students. One year of high school biology and an I.Q. of 120 or better was required before a student could become eligible for consideration. Their own teachers made the selection, limiting it to a school wide choice.

Weather Today SHOWERS

Widely scattered thundershowers are forecast for this afternoon. Yesterday the mercury rose to 93 degrees, with the low this morning, 75. At 10:30 a. m. the temperature was back up to 83 degrees.

IT HAPPENS EVERY YEAR—tearing down steps that is. This time Mitchell Hall is getting the business. Soon all the residents of Mitchell will need is a new dormitory to sit behind the steps, if new ones are being built.

REV. JAMES ARGUE, the new minister for the A&M Methodist Church, preaches his first sermon this Sunday. It is entitled "The House of Faith."
