## Governor Daniel Will Speak To Conference In September

### 150 Anticipated To Attend Water Conference

Governor Price Daniel will be the principal speaker at a banquet for delegates to the third annual Water for Texas Conference here, September 16-18.

Robert L. Whiting, head of the Petroleum Engineering Department and general chairman for the conference, said today that Governor Daniel will speak to the 150 delegates expected to attend this year's conference, at an evening session on September 17.

The three-day meeting, centered on the theme of "What Is Happening to Our Water" will cover such subjects as water storage changes, subsurface reservoirs, stream flow hydrology, evapo-transpiration, mechanisms for rainmaking, water quality and pollution and conversion of brackish water to fresh water and re-use of municipal and industrial water.

About 150 of the state's top hydrologists, geophysicists, meteorologists, reservoir engineers and managers of state, city and industrial water reservoirs are expected for the conference.

### New Members Introduced To Kiwanis

Four new members were introduced to the College Station Kiwanis Club at their weekly meeting Tuesday in the Memorial Student Center. Rev. James B. Argue, Norbert McNeill and Tom Prater are the newest members of the local and civic organization.

The annual sport shirt contest was held at the Tuesday luncheon meeting of the club and a committee chose the man with the loudest colored sport shirt. The two finalists were Herb Fincher and Rev. Argue.

A report of the Kiwanis board of directors was made and it was announced that the board approved a proposal made by Bill Krueger for the club to support a tree and shrub planting program in the local schools and throughout the community. Such a program would be expected to culminate in extensive Arbor Day plantings.

The board also heard a report by Isaac Peters on Cub Pack 802 and Boy Scout Troop 102. Both groups are sponsored by the local Kiwanis club.

In a report from Bob Davidson it was disclosed that the Community Physical Improvement Committee has received four picnic tables to be used in Kiwanis Park.

### Prexy Appoints Batt Study Committee

Acting President D. W. Williams has appointed a committee to make a "thorough study of the operations and procedures of the Student Publications organization" following the directions of the Board of Directors and to report the findings to them.

Chairman of the committee is E. V. Walton, head of the Department of Agricultural Education. Other members of the committee are John M. Prescott, Bardin Nelson, Kenneth Bailey, John H. Hill, T. J. Parker, C. D. Holland and Henderson Shuffler.

Williams said yesterday he hoped the committee could make the study and prepare their findings before the fall semester begins.

He suggested that the report include editorial organization, methods of appointment or selection, policies of publications on material selection, responsibilities and authorities and suggestions for improvement.

The Board of Directors meet next on September 16.

### Night Beat

HYATTSVILLE, Md., (AP)—Two cruising Prince Georges County policemen responded promptly to the radio call: "Check disorderly frogs at 4512 38th Street."

Mrs. Mary Harmon told the policemen the frogs "holler and carry on sometimes until midnight or later." The patrolmen heard nothing, gave their report: "Frogs quiet at this time. Advise complainant to see the mayor."

## TSCW Opens With Change Of Name

The school will be the same but the name will be different as a college familiar to most all Aggies opens its doors this fall. What was formerly known as TSCW will begin official use of its new name; Texas Woman's University on August 19. Action of the Texas Legislature brought about the name change.

With reference to this change, President John A. Guinn explained that "the institution which was known for more than 50 years as CIA and later as TSCW thus enters a new era in which it will enjoy the advantages of a designation appropriate to its true character."

TSCW is the only college or university in the entire South which offers the doctorate in all major subject matter areas of home economics. To date, 19 Ph.D.'s have been conferred, mainly in the fields of nutrition and textile technology.

Its research programs, which include research services available to

### Hutchison Named Acting AES Head

John E. Hutchison, state agricultural leader for the Texas Agriculture Extension Service since September 1954, has been named acting director of the service, effective Aug. 20.

He succeeds G. G. Gibson, who resigned effective Aug. 19 to accept an assignment with the United States Operations Mission in Karachi, Pakistan.

The announcement was made by D. W. Williams, vice chancellor for agriculture of the A&M College System.

Hutchison is a native of Hill County. He holds from A&M a B.S. degree in dairy husbandry; M.S. in horticulture, and a master of education degree in agricultural education.

He taught vocational agriculture from 1936 to 1945. In 1945, he was appointed county agricultural agent in Matagorda County and was transferred to the headquarters staff as associate horticulturist in 1949. In 1951 he was promoted to extension horticulturist and in 1954 to his present assignment.

state hospitals and special schools as well as other state institutions and establishments, are supported by industrial, governmental and private grants which in the past five years have totaled more than a half-million dollars.

TSCW's occupational therapy school has the only such degree program for undergraduates in the Southwest. Its enrollment of freshmen occupational therapy majors is expected to be the largest in the nation.

The School of Library Science was the first in Texas to be accredited by the American Library Association and has been so designated ever since.

TSCW's College of Nursing, which utilizes the clinical facilities of Parkland Memorial Hospital in nearby Dallas, has grown to where this fall it will have more than 250 students in the four collegiate levels.

The Department of Journalism is the only one in a woman's college ever accredited by the American Council on Education for Journalism. This accreditation began in 1948 and was renewed in June of this year.

Four new buildings of modern functional design were opened on the campus during the past year and several other important specialized buildings will be started in 1958.

The component colleges and professional schools of Texas Woman's University are as follows: College of Arts and Sciences, College of Education, College of Fine Arts, College of Health, Physical Education and Recreation, College of Household Arts and Sciences, College of Nursing, School of Library Science and School of Occupational Therapy. The other major unit is the Graduate School.

### Lions Camp Report Given At CS Meeting

At the Monday noon meeting of the College Station Lions Club Charles Haas, president of the local club, gave the members a report of his recent trip to the Texas Lions Camp for Crippled Children in Kerrville.

He explained to the members how their assessment of 25 cents a week was used at the camp. Haas also told the men he visited with several of the children attending the camp. There are seven sessions at the Kerrville camp and each one lasts for two weeks.

Eugenia Rush, daughter of Mr. and Mrs. Eugene Rush of College Station, is serving as a counselor at the camp this summer. She is a student at the University of Texas.

Besides discussing the crippled children's camp, the group also held a business meeting at which a balance sheet for the club was distributed to each member.

Figures show the club has a total of \$1,491.45 in assets. Receivable assets include \$257.08 the club earned as its share of the Lions Light bulb sale held recently.

No liabilities are listed by the club and the net worth equals the amount of the assets.

### Weather Today

#### SHOWERS

Partly cloudy skies with scattered thundershowers after 2 p.m. are predicted for today. Ninety-nine was the high yesterday, with this morning's low, 78 degrees. At 10:30 a.m. the thermometer reading was 90 degrees.

JUNCTION MANOR TAKES SHAPE as the construction crew clears the ground and sinks the foundation piers. On this spot Aggie footballers will soon have a "home of their own."

## Albritton Engineering Plant Will Locate Here In October

Ford D. Albritton, Jr., president of the Albritton Engineering Corp., expressed his appreciation yesterday of the excellent cooperation he received from the Bryan Industrial Foundation, Inc. while investigating Bryan for the site of his company's operations.

Greene H. Buchanan, president of the Chamber of Commerce, said "we are happy to have the Albritton Engineering Corp. become a part of the Bryan's industrial group and we extend them every best wish for success in our community."

Buchanan praised R. B. Butler, chairman of the Foundation's Board of Directors which serves as the Industrial Committee for the Bryan Chamber and the members of the Industrial Committee for the excellent work performed in presenting factual information and negotiating with Albritton during the past year's time.

Albritton Engineering Company, manufacturer of Alenco aluminum windows, will move to the new plant containing approximately 36,500 square feet of production space about October 1.

The new plant, located at Finleather Road and Palasota Drive will be a model of modern production efficiency, with straight line output. Raw materials will enter at one end of the plant and the finished product will be crated and shipped from the other.

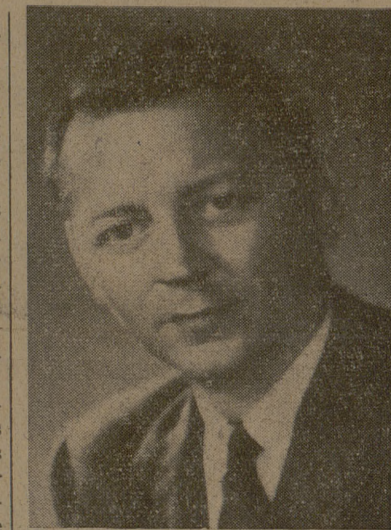

Albritton, an A&M graduate of 1943, said about 100 local residents will be employed at the beginning of operations here. "We hope to increase this number to approximately 200 within the first 12 months of operations in Bryan, as the result of steadily increasing production from our new plant and the anticipated introduction of new products."

### Development Conference Here

Industrial development in all its phases will highlight the talks and discussions at the 7th annual Texas Industrial Development Conference to be held here Aug. 15-16.

Gordon H. Turrentine, general manager of the Houston Chamber of Commerce, is chairman of the board of advisors of the conference.

Subjects to be discussed include, Why an Industrial Team, Selling the Community on Industrial Development, Where to get Help in Industrial Development, Home Grown vs. Imported Industry, Getting the Volunteers to Work, The Haynesville Story—Locating a Branch Plant, New Legislation Affecting Industrial Development, Opportunities in Fabrication of Plastics, Manufacturing for General Motors, Industrial Districts for the Smaller Community, Community Planning, Urban Renewal and Industrial Development.

Ford B. Albritton Jr.

Some 14 present employees of Albritton Engineering, including the president and other key personnel, will move their families to Bryan.

It pointed out that Bryan was selected for the Company's place of future operations after a 12-month study of a "great many" potential locations in the Texas Gulf industrial area.

"Bryan was finally chosen because of its residents—the excellent community and business atmosphere and the opportunity of obtaining good, reliable personnel to become members of our Albritton office and production team.

"In addition, we have a fine

plant which provides us with the opportunity to more than double our present output. This will make it possible for us to meet and accelerate demand for Alenco aluminum windows." Excellent shipping facilities were also cited as another factor in the company's decision.

In order to achieve the maximum in streamlined, efficient output and to cut hand operations to a minimum, substantial quantities of new machinery will be installed, including presses, sawing equipment and materials handling equipment.

The corporation is the only Southwest member of the Aluminum Window Manufacturers Association and Albritton is a member of the organization's board of directors.

Although the firm had its beginnings in 1948 when it was formed by Albritton to sell jalousie windows, it was organized as Albritton Engineering Corporation in 1953 to produce and market its first product, the Alenco jalousie. As a result of the decline in demand for jalousie windows, the firm designed and marketed a single hung window in the fall of 1954. Acceptance was immediate, as reflected by steadily increasing sales and production since that time. In the intervening period, the company also developed and introduced the balance of the window models and styles in its present line.

BURLESQUE WENT OUT YEARS AGO and Herb Fincher is merely pulling his shirt tail out for the judges of the annual Kiwanis Sport Shirt Contest. He and Rev. James B. Argue (right) were battling it out for top honors and Fincher is showing the club that he too can wear his shirt outside his trousers.

STILL IN USE is this room in the old Science Hall which, according to the President's progress report, in "the interest of economy it will be necessary for the Department of Physiology and Pathology to remain there for another year."
