

Pastors Announce Programs For Mid-Week Services

BETHEL LUTHERAN CHURCH
Lutheran Aggies—Gamma Delta—will meet at 7 this evening in the Memorial Student Center. Plans for a get-acquainted dinner will be made.

Vesper worship is scheduled for 7:45 this evening at the church. "The Lord of Life and Death" will be the sermon topic.

A&M PRESBYTERIAN CHURCH
The Rev. Donald Harris of Baytown will speak at the Presbyterian Student Center at 7:15 this evening. Born in Puerto Rico, he will be accompanied to tonight's meeting by several people from that country. He is a leader in the Texas Synod and is chairman of the Committee on Stewardship.

CHRISTIAN SCIENCE SOCIETY
Regular mid-week service will be conducted at 8 this evening. The reading room is open each Wednesday from 7 to 8 p.m.

CHRISTIAN SCIENCE ORGANIZATION
Students will meet for prayer and fellowship at 7:30 tonight at the Memorial Student Center.

A&M WESLEY FOUNDATION
General meeting of the Founda-

tion will be held at 7:15 tonight. Rev. James Hares, associate professor of religion at Southwestern University, will speak on "Creative Cursing."

ST. THOMAS EPISCOPAL CHURCH
Members of the Canterbury Association will hear a talk by Arthur Carter on "FBI and Its Work" at the 7:15 meeting this evening.

FIRST BAPTIST CHURCH
Mid-week prayer meeting will be conducted at 7:30 this evening.

Members of the Lottie Moon Circle will meet with their new chairman, Mrs. R. G. Snuggs, 1023 Harrington, at 7:30 p.m. Thursday.

A&M CHRISTIAN CHURCH
The Disciple Student Fellowship will meet at 7:15 p.m. today at the YMCA. Choir practice is at 7:30.

OUR SAVIOUR'S LUTHERAN CHURCH
Lutheran Student Association will meet at 7:30 tonight at the Student Center.

A&M CHURCH OF CHRIST
Tonight's mid-week service will begin at 7:15.

ST. MARY'S CATHOLIC CHAPEL
Evening Mass will be celebrated at 5:15 today and Friday. Rosary and Benediction will follow this evening's Mass at 7:15.

Outing, Rodeo Top S&S Club Talks

The Saddle and Siroin Club met last night to discuss their fall barbecue and the All-Aggie Rodeo which the club sponsors each year.

The fall barbecue, to be held Oct. 14 in the Grove, will be free to all club members, animal husbandry majors, department instructors and their wives.

The All-Aggie Rodeo, largest student rodeo in Texas, will be held Oct. 10-12 here on the A&M campus.

Texas Needs More Furniture Firms

Texas needs more furniture manufacturers was the conclusion reached in an industrial economics study by James R. Bradley, assistant research economist, Texas Engineering Experiment Station.

Of the \$15 million spent on furniture and their fixtures in Texas, out of state manufacturers grabbed nearly \$12 million. Texans received only \$3 million.

Bradley summed up his report by saying that in addition to the already existing market in Texas, a new manufacturer would reap the additional advantages of an increasing population, a popular demand for new furniture, and a well established transportation network.

Maj. Henry Joins Meteorology Staff

Maj. Walter K. Henry, USAF, will join the Dept. of Oceanography and Meteorology Nov. 1, as assistant professor to teach forecasting laboratory, military meteorology and mathematics review sessions.

Maj. Henry, who was in the military service for 14 years, received a B.S. degree in chemical engineering from the University of Missouri in 1941 and his M.S. degree in meteorology in 1949 from the University of Chicago. His most recent assignment was in Roslyn AFS, N.Y., as chief forecaster.

TV Teaching Practical, Green Tells JC Group

By GAYLE McNUTT
Television now has a place in the modern classroom, Robert Green told delegates to the 14th Annual Junior College Conference yesterday morning at the closing session.

"I believe TV is an extremely powerful instructional tool," Green told his audience in the Memorial Student Center Assembly Room.

"It won't solve all teaching problems or make up for the lack of good professors, but it will be of great benefit in massed classes and make a great part of teaching more effective."

Green, director of the Department of Education of Dage Television Division, Thompson Products Inc., Michigan City, Ind., made his remarks as he gave conference delegates a review of the progress made in using closed circuit TV as a teacher in the classroom.

"Television: Panacea, Pandora's Box or Instructional Tool" was the title of his talk.

Green told of the war waged between the "Television is the Promised Land" group and the "TV is the Ruin of Education" set. He said although TV would not solve all problems, it certainly would not hurt the teaching profession in any way.

"Television is not going to make

or break any prof," Green stated, "and it will be only as effective as its users make it."

Green explained the type of TV setup used in classrooms, and told delegates how such equipment could be obtained for their schools, and the approximate cost of installing and maintaining the equipment.

Television studios do not replace classrooms when using the equipment, he made clear. Broadcasting is done from a classroom and receivers in any number of other classrooms pick up the lecture or experiment.

This technique would eliminate mass lectures and make it possible for a greater number of students to hear and observe the professor teaching the class, he said.

Only a student instructor or monitor would be needed in the viewing classrooms and his only purpose would be to take roll and keep order. A microphone hookup would enable students to ask the professor questions.

Professional cameramen would not be needed to run the equipment. Student cameramen and control operators could be utilized for this purpose since the equipment is fairly simple to operate.

Green said the common technique was for the prof to lecture to the camera chiefly and make full use of charts, diagrams and other visual aids. If desired, students in the viewing classrooms may be rotated with those in the broadcasting classroom, giving each class a chance to be in the broadcasting classroom.

What's Cooking

The following clubs and organizations will meet tonight, Oct. 2, 7:30

The Agronomy Society meets in room 105 of the Agronomy Building. Plans for the field trip to be discussed.

Economics Club meets in room 102 Nagle to elect officers and plan the year's program.

Green explained there are two different types of TV in classroom use, each with a purpose. Video and radio frequency are both used and in many cases a combination of the two. Video gives greater resolution efficiency but is limited on line usage. On a long run basis, RF is usually more practical, he said.

Schools can begin TV teaching for as low as \$1,550, Green said. Or they can install a complete system with 20 viewing classrooms for about \$80,000. They may begin with a small set-up and build it up as they desire, Green pointed out.

Teaching methods have been tested in classrooms at several schools in New York, at Pennsylvania State University and several other institutions during the past several years, and conclusive evidence shows that better students made as good or better grades in a TV classroom as in a normal classroom. Average students stay about average when placed in the viewing classrooms and the lower students tend to do worse work.

Teaching methods have been tested in classrooms at several schools in New York, at Pennsylvania State University and several other institutions during the past several years, and conclusive evidence shows that better students made as good or better grades in a TV classroom as in a normal classroom. Average students stay about average when placed in the viewing classrooms and the lower students tend to do worse work.

Nuclear Specialist Talks to Newmans

Richard Wainerdi spoke on "Our Catholic Doctrine and Atomic Science" at the A&M Newman Club's weekly meeting Sunday morning.

Wainerdi, supervisor of nuclear research and associate professor of nuclear engineering at A&M, said the church was advocating the use of atomic science in peaceful means.

He said the church, which at one time represented science, is working toward bringing science to its proper relation with the church.

The scientist also discussed the atomic reactor on the campus, and pointed out the energy's development into medical research and agricultural science fields in the future.

BATTALION CLASSIFIED

FOR SALE
31 foot trailer house, GE ice box, window air conditioning unit, butane heater and range. VI-6-6485. 1918

1957 Chevrolet 4-door hardtop. Low mileage, like new. Two tone green. TA 2-3368. 1813 111tn
