Col. Davis Accepts Gift

Corpus Christi A&M Mothers Club have donated new arm bands for members of the cadet corps guard units. Robert M. Dickey, Corpus Christi senior, is shown presenting the leather arm bands to Col. Joe E. Davis, commandant.

By Corpus Mom's Club

Armbands Given To Guard Details

By JOHNNY JOHNSON

Notice anything new on the guard details today?

Maybe it was the maroon and white leather armbands.

Starting last night the guard details began wearing the new armbands through the ingenuity of a Squadron 8 senior and the financial backing of the Corpus Christi Mothers' Club.

Last spring Cadet 1st Lt. Robert M. Dickey, now Squadron 8 executive officer, began wondering how to improve the looks of the armbands worn by cadets on guard duty and presto, devised the leather device.

Dickey presented his idea to a tactical officer and by the time school was out, the Commandant's Office had given the idea the go-ahead.

Dickey, Cadet Capt. Jim Rankin, commanding officer of Squadron 8, Dickey's mother, Mrs. F. F. Dickey, and Rankin's mother, Mrs. C. Logan Rankin, set to work on

the armbands in August and with the support and help of the CC Mothers Club had the bands finished by the first of September.

The new bands are made of maroon elk with white leather letters and white cross-stitching.

Formal presentation of the armbands for both cadet areas was made to Col. Joe E. Davis by the two Corpus Christi seniors Monday.

Math Club to Hear Sims Speak Tonite

S. A. Sims of the Mathematics Department will speak to the Math Club tonight at 7:30 after a business meeting in the Fountain Room of the YMCA.

Sims will talk to the group about his summer work at Lockheed Aircraft Corporation.

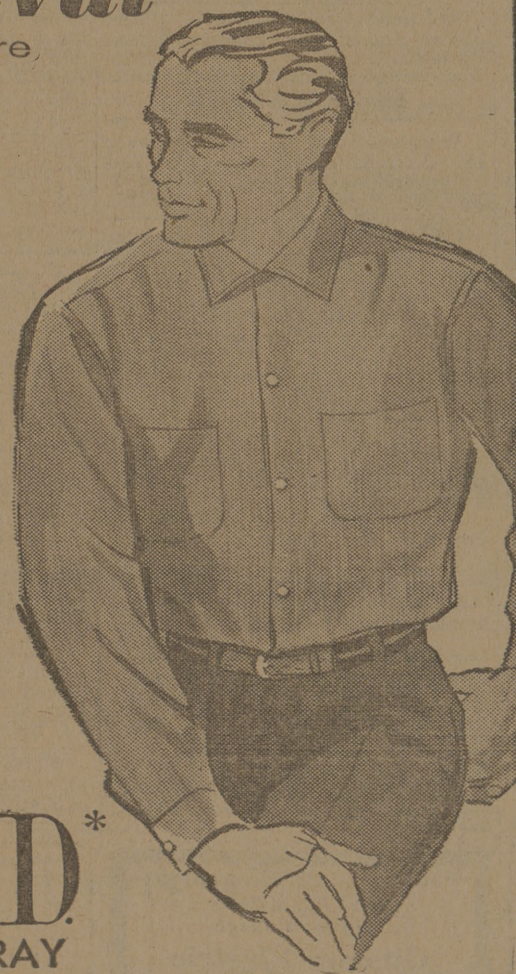

All interested in the club are invited to attend the meeting, William R. Thurman, president, said.

Scientists Work On Satellite Orbit

WASHINGTON. — (AP) American scientists, working with complex mechanical brains, reported varying results last night from their efforts to establish the orbit of the Soviet earth satellite.

The Navy reported: "The Naval Research Laboratory minitrack system is now producing very satisfactory data.

"They are being fed to the IEM computer machine at the computing center . . . and the quality of the resulting orbit information will enable us to give scientifically accurate minute-by-minute predictions for alerting the optical and radio tracking systems."

Moonwatch scientists at Cambridge, Mass., first reported they, too, were making good progress with their computations, but later said they had run into difficulties.

They gave two possible reasons for failure of their \$2,742,000 mathematical brain, to hit upon the Red moon's orbit:

1) The reported sightings of the satellite, from which information was fed to the machine, were not correct, or 2) the information from the sightings was not sufficiently accurate."

SAVED BY THE BELL

DRIFT, Ky. (AP)—A little girl didn't know it at the time but she probably saved Earl Turner's life during a rainstorm.

Turner was standing outside his theater when the girl telephoned to ask when the movie would start.

He told her 7:15 then reeled back from a blinding flash of lightning.

Leaving the boxoffice, Turner dashed outside to the spot where he had been standing and found a 75-pound piece of limestone, knocked from the roof by lightning.

What's Cooking

The following clubs will meet tonight.

7:30

Fish and Game Club in the Agricultural Engineering Building to hear a special speaker from the Texas Game & Fish Commission.

Bell County Hometown Club in Room 3-C of the MSC to elect officers.

Mexican Study Aid Now Available

American students will have an opportunity to receive scholarships to study in Mexico from the Institute of International Education according to Kenneth Holland, president of the group.

Competition for these awards will close Nov. 1 with the winners beginning school March 1, 1958.

Preference in granting these awards is given to graduate students who will receive 1,250 pesos monthly and tuition at the National University. Junior and senior college students are eligible for undergraduate scholarships covering 1,185 pesos a month for maintenance plus tuition. Travel to Mexico and funds for incidental expenses must be supplied by the grantee.

Applications and further information can be obtained from the Inter-American Department, Institute of International Education, 1 East 67th St., New York, N.Y.

CHS Has Game Films

A&M Consolidated Coach Dick Gardemal will show a film of the Consolidated - Giddings football game in the Consolidated High Auditorium tonight at 8 for all interested fans.

Kate Hill's Book To Be Published

Dr. Kate Adele Hill, educator and leader in the A&M Extension Service work, has signed with the Naylor Company of San Antonio for the publishing of her book, "Home Demonstration Work in Texas."

She is author of "The Home Builders of West Texas," also published by the Naylor Company. She has been listed in Texas Who's Who, Who's Who Among American Women and Who's Who in the Southwest.

"Home Demonstration Work in Texas" is a scholarly dissertation on the progress, changing needs and changing methods used by county home demonstration agents serving the people of Texas. The work covers a 40-year period beginning in 1915.

American Oil Man Speaks to IE's

The Industrial Engineering Club will hold its second meeting of the year tonight at 6:45 in Room 207 of the New Engineering Building.

Guest speaker will be Matthew Wilson of the American Oil Company of Texas City.
