

The Battalion - College Station (Brazos County), Texas

# Pulverizing Crow Unanimous Choice

DALLAS, Oct. 31 (AP)—Looking for an All-America? Don't need to go any farther than Texas A&M College with its John Crow.

That's the opinion of the regional All-America board which has voted unanimously for the halfback of the Texas Aggies, who can find more ways to beat somebody than there are lives to a cat.

The board, listing its first candidate for the All-America team from the Southwest Conference, thinks Crow, the 210-pounder who pulverizes lines because "I like to run over people" and comes up with the big defensive play, should get a backfield spot without argument.

But the All-America crop in the Southwest Conference is bigger than usual, mostly because of the league's great showing nationally. Right now Texas A&M is the No. 1

team in the nation and the conference has an outstanding inter-sectional record.

The board likes Buddy Dial, Rice's pass-receiving wingman; Gerald Nesbitt, Arkansas' fullback; Charley Krueger, the Texas A&M tackle, and Roddy Osborne, A&M's unorthodox quarterback who excels at making bad plays work.

Crow and Krueger were prominent contenders for All-America last year and Nesbitt also had his backers.

# Wilks Picks Porkers To Poke No. 1 Aggies

By ED WILKS

NEW YORK, Oct. 30—(AP)—Memo to the boys at the pub on the square back home in Belleville, Ill.:

If you thought picking the Yankees in four was a howl, you ain't seen nothin' yet.

The best way to figure college football this season, it appears, is to take the underdog with points and go for broke. So here goes the egg money!

**Arkansas over Texas A&M**—Sure, the Aggies are No. 1 and eatin' high off the hog, but these Razorbacks can be tough porkers.

**Michigan over Iowa**—There's no such thing as a "favorite" in a Big 10 game. Everybody starts even every Saturday.

**Navy over Notre Dame**—The Middies and Tom Forrestal could forestall the luck of the Irish.

**Wisconsin over Michigan State**—The way these two clubs miss conversions, this one could be a tie.

**Georgia Tech over Duke**—This is a vote from the old school, where they taught you never to bet against Bobby Dodd.

**Marquette over College of Pacific**—Well, they have to win sometime, don't they?

**Oklahoma over Kansas State**—Whaddya want? Blood?

Arkansas's 1956 Offense Leader

Don Christian, 6-1, 185-pound quarterback from Searcy, Ark., was the total offense leader for the Razorbacks a year ago. Now a second-stringer, he gained 412 yards rushing and 260 yards passing in 1956. May start if George Walker is really sick.

## SWC STATISTICS

Team	TEAM AVERAGES, OFFENSE, DEFENSE			Opp's Avg. Off.	Opp's Avg. Rush.	Opp's Avg. Pass.	Avg. Def.

# Cadets Seek Quickness

BY GARY ROLLINS

The Aggies continued their constant search for that elusive "quickness" yesterday afternoon in their final workout prior to leaving for Arkansas.

The practice session in sweat clothing was a short one, lasting only 15 minutes.

The Cadets are still hampered by the injury bug, as all five players injured in the Baylor game last Saturday remain "question marks."

Darrell Brown, senior guard from Dayton and Bobby Joe Conrad, senior halfback from Clifton have been released from the College Hospital and were present for yesterday's workout. However, their injuries will probably keep them from seeing any action under any conditions.

John Gilbert, senior pivot man from Russellville, Ark. is also on the doubtful list, but due to his home-state connections, may be allowed to participate on a part-time basis.

Ends John Tracey and Don Smith will probably see limited action, but neither is considered starting material.

The team departed from Easterwood Airport this morning at 11. They will fly to Fort Smith, where they will work out this afternoon. The squad will spend the night in the Don Smith, venturing to Fayetteville early tomorrow morning for the game with the Porkers.

Cincinnati's stellar keystone combination, shortstop Roy McMillan and second baseman Johnny Temple, was discovered in a Cincinnati tryout camp.

# Razorback's Alibi All Set, Will Use Influenza Excuse

FAYETTEVILLE, Ark., Oct. 31

—(AP)—Influenza punched holes in the Arkansas line today sending two first and second string line-men to bed with fever and broke into the secondary to down half-back Mike Conway.

First-line quarterback George Walker and Billy Kyser, hero of the Arkansas upset 12-6 win over Mississippi last week, are described as feeling bad.

First string tackle Richard Bennett and second string guard Billy Michael were put to bed with fever and Walker, Barry Switzer, center and John Boles, tackle, were ailing.

# Soccer Team Plays

The A&M soccer team plays its first home game at 2:30 Sunday afternoon, entertaining the Houston United soccer club on the soccer field near Anchor Hall. The Aggies own a 7-2 win over Brookes Army Medical Center, the 1956 state champions.

Tickets may be purchased at Student Activities Office beginning Monday, Oct. 28th or at the door  
Special attention will be given to mail orders.  
(Not a Town Hall Attraction)

# you can help missiles 'think' better!

Missiles are mental projectiles... "projections," actually, from your mind to paper to components to systems to complete weapons. And missile design demands our best effort to get top performance and maximum efficiency. Here's your chance to educate our missiles, applying latest techniques and newest devices in plants equipped to build components and complete systems without sub-contracting... telemetering, infrared, radar, sonar and many other systems from research through development to manufacturing.

The TI-transistorized telemetering system shown above, in this case more a "talker" than a "thinker," provides four times the radiated power in a smaller, lighter package than comparable vacuum tube systems. Not "frozen" to old design standards, it is almost completely transistorized and is completely electronic with no moving parts... a typical example of TI's policy of advanced systems engineering.

At Texas Instruments—in research, development, design, and manufacture—you will push out beyond existing limitations into new concepts and new products. You can choose from dynamic fields such as electronics, missile control and detection, infrared optics, semiconductor behavior, high speed data reduction, and many others. At TI, this pioneering approach has been so successful the company has grown 20-fold in the last 10 years to a current \$70 million volume... a growth accelerated by recognition of individual achievement... a growth you can share.

**openings**  
**ELECTRONIC AND ELECTROMECHANICAL APPARATUS**—Radar, sonar, infrared, navigation, magnetics, telemetering, communications, computers, transformers.  
**SEMICONDUCTORS AND OTHER COMPONENTS**—Transistors, diodes, rectifiers, resistors, and panel instruments.  
**RESEARCH**—Ph.D. level for research: semiconductor materials and devices, noise, surface, ferromagnetics, infrared, microwaves, magnetics, radiation damage, high speed data reduction, etc.  
**MANUFACTURING**—Engineers for production, planning, purchasing, cost analysis, etc.  
**invitation**  
Hitch your wagon to the Texas star... work at a plant within the city but away from downtown traffic... live within 15 minutes of your work or your play... year-around recreational, amusement and cultural activities. A Texas Instruments representative will be on the campus in a few days to give you more details. You may contact the placement office or write—  
**(Will Be On Campus, Wednesday, November 6)**  
**TEXAS INSTRUMENTS INCORPORATED**  
5000 LEMMON AVENUE DALLAS 2, TEXAS
