

# Porkers Tripped By Taylor's Toe, 7-6

By GARY ROLLINS

Governor Faubus, 32,000 fanatical football fans and the supreme effort of the Arkansas Athletic Department could not halt the mighty Texas Aggies, who eased by the unpredictable Porkers 7-6, in last Saturday's contest at Fayetteville.

The Cadets ruined the Fayetteville myth for the second time in a row, as they flaunted the "traditional" Homecoming Victory of the Razorbacks. The largest crowd in Arkansas' history gathered to watch Coach Paul Bryant's marauding Maroon humble the aggressive Razorbacks.

The Aggies, ranked No. 1 in the nation barely outdid Jack Mitchell's crew statistically, but the all-important extra point provided the margin for the victory. Loyd Taylor pushed it through the uprights—for the 18th in a row this season.

Both teams were hampered by injuries, but the Cadets furnished more proof of this than did the Porkers. Bobby Joe Conrad and Darrell Brown sat on the bench the entire game, and other injured Aggies saw very limited action.

The influenza attack on the Hogs was much shorter and less severe than it was believed to have been, as the Razorback line exhibited a very impressive display of team speed and hard blocking—not usually characteristic of a flu-ridden squad.

The Cadets threatened on their opening effort, moving the ball within scoring distance; only to have their hopes dampened by George Walker's interception of Osborne's aerial in the Razorback endzone.

The Hogs exhibited a fine quick-kicking game, as they kept the Farmers tied up in their end of the field for the greater part of the first half.

The Porkers scored in the first quarter, with four minutes remaining, on Quarterback Don Christian's sneak plunge through the middle. The play was disputed slightly, as the question arose whether or not Christian did pass the double stripe. The field judge prevailed in his solo judgment.

The Aggies scored soon after on John Crow's 11-yard dash around the right side with 4:20 left in the half. Taylor added the extra point—and that was the ball game, for all intents and purposes. They covered 74 yards in 14 plays.

The fourth quarter was the most

exciting of the season for both teams. Emotions ran high and then dipped to low, only to rise again.

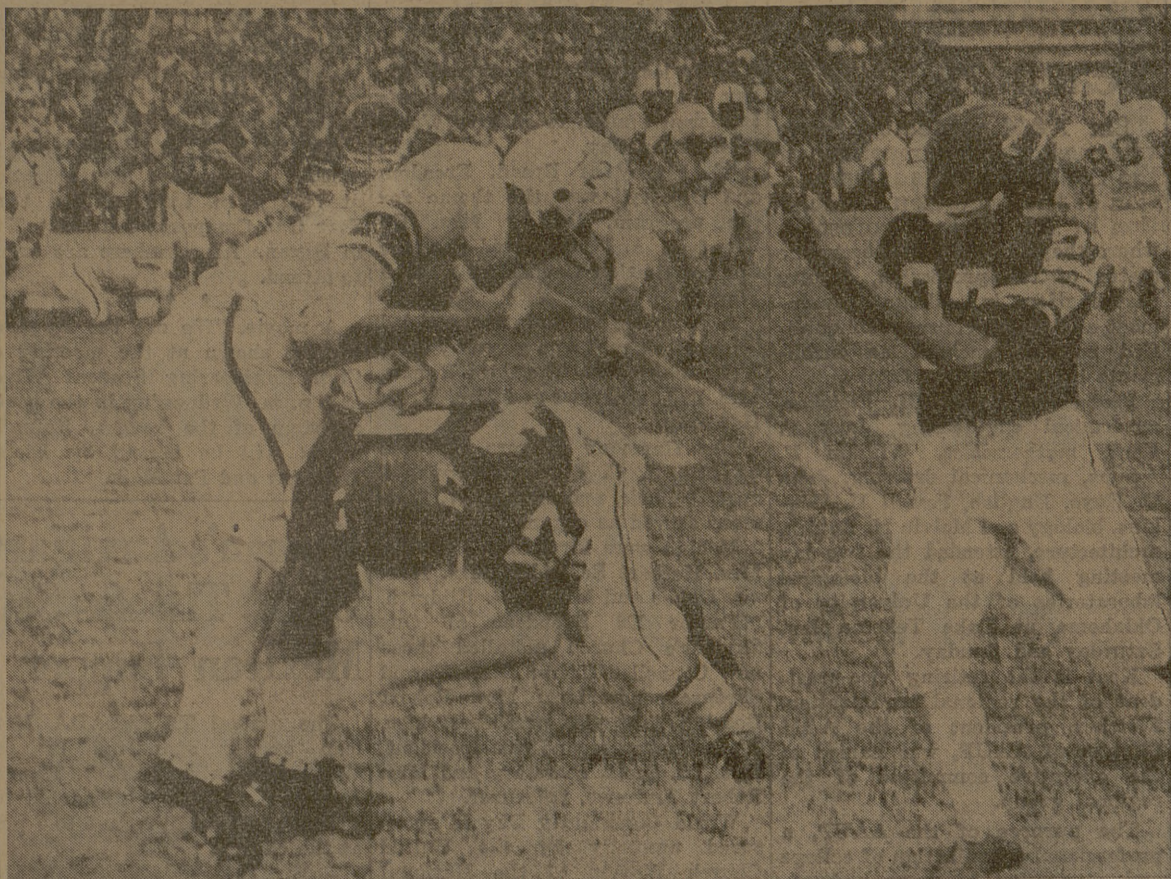

The Razorbacks assaulted Aggie pay dirt without delay as the final quarter began, driving to the Aggie five-yard stripe. A field-goal attempt by Freddy Akers was wide of the mark, Arkansas' hopes sagged.

The Cadets couldn't move the ball, and Osborne punted the Porkers back into Ozark territory. Once again, the ambitious Hogs moved to score. This time, Aggie end Don Smith broke the threat by covering Walker's fumble on the Arkansas 48-yard line.

The Farmers went on the attack, and almost reached the "promised land." They probably would have, if it hadn't been for the opportunistic hands of Don Horton, who snagged Osborne's runaway pass, and ran 64-yards up the sideline placing Arkansas in scoring position once again on the Aggie 27.

The Hogs ran right end for three yards. Walker passed complete to Horton for a nine-yard advance. Horton moved the ball around the left side for two, moving to the Army 17 yard-line. Walker wheeled back to pass, spotted his receiver and threw—to Aggie half-back John Crow on the goal line.

The game ended with the Cadets in possession—their winning streak intact.

Osborne Passes a pig

A&M's Roddy Osborne slips around another Akers, 17, was brushed lightly aside and Osborne continued on his way.

## SWC HIGHLIGHTS

The Arkansas Razorbacks were in good shape physically for today's workout but Coach Jack Mitchell said their 7-6 defeat by Texas A&M had left his team with a "mental letdown."

No injuries were suffered by the Porkers in last Saturday's hard-fought game with the Aggies, the nation's No. 1 team in the Associated Press poll last week and this week. Only two Razorbacks were out with influenza.

Mitchell said he expected both of the ailing players, first string tackle Richard Bennett and second string end Richard Bell, to be ready for action tomorrow.

Looking toward Saturday's clash with Rice at Houston, Mitchell said:

"When Clemson beat Rice, it was the worst thing in the world that could happen to us. This will also be Rice's homecoming game."

Rice coach Jess Neely gave his varsity the day off today but kept his freshman team busy in a brisk workout.

The Owls meet 12th-ranked Arkansas Saturday night in Rice Stadium. Ronnie Kramer, with a left ankle sprain, was the only injured player.

The TCU football team looked at movies of the Baylor game Monday, then was dismissed for the day by Coach Abe Martin.

The Frogs have an off week, but Tuesday will start preparations for the Nov. 16 game with Texas.

## 'hot house' for growing crystals!

...from plum-size up to 8-in. diameter, largest ever grown

This, the world's longest line of crystal "pullers," is typical of advanced engineering-in-action in which you are invited to share at Texas Instruments . . . largest producer of silicon transistors and a major source for germanium transistors as well as silicon diodes and rectifiers . . . with many engineering "firsts" in semiconductors.

At TI, you will push out beyond existing limitations—in research, development, design, and manufacture—into new concepts and new products . . . into vital fields such as electronics, semiconductor behavior, infrared optics, missile control, high speed data reduction, and many others. This pioneering approach has been so successful that Texas Instruments has grown 20-fold in the last 10 years to a current \$70 million volume . . . a growth accelerated by recognition of individual achievement . . . a growth you can share.

**openings**  
**SEMICONDUCTORS AND OTHER COMPONENTS**—Transistors, diodes, rectifiers, resistors, and panel instruments.  
**ELECTRONIC AND ELECTROMECHANICAL APPARATUS**—Radar, sonar, infrared, navigation, magnetics, teletyping, communications, computers, transformers.

**RESEARCH**—Semiconductor materials and devices, noise, surface, ferromagnetics, infrared optics, microwaves, magnetics, radiation damage, high speed data reduction, etc.

**MANUFACTURING**—Production, planning, purchasing, cost analysis, etc.

**come and grow with us**  
Hitch your wagon to the Texas star . . . work at a plant within the city but away from downtown traffic . . . live within 15 minutes of your work or your play—year-around recreational, amusement and cultural activities. A Texas Instrument representative will be on the campus in a few days to give you more details. You may contact the placement office or write—

**TEXAS INSTRUMENTS**  
INCORPORATED  
6000 LEMMON AVENUE DALLAS 9, TEXAS  
(Will be on campus, Wednesday, November 6)
