Cooperation

How is Russia able to make rapid strides in research in as short a time as she does?
 The answer is a simple one—cooperation.
 When they begin to work on a project with the goal of getting it done quickly, all their scientists consolidate efforts to produce maximum efficiency.
 No rivalry among groups exists for all are working for a common cause and that cause is placed above any selfish interests.
 Research is not spread among hundreds of private industries, colleges and universities and other organizations. Through such research Russia has been able to progress more rapidly than possibly any other nation in as short a time.
 What would keep all experts in the United States from cooperating in such research as is necessary in the rocket field?
 Top men from private industry, government and colleges and universities could band together to put forth maximum effort in reaching scientific goals with government financing.

Letters to the Editor

Editor:
 The Battalion
 Thousands of miles away I feel like being in Kyle Field yelling for that Aggie team. My name is Guy Fernandez '56 and probably many remember me, especially on the Batt staff because I was the Batt photographer in 1956; and the ones that were freshmen and sophomores in the Aggie Band at that time will also remember me for sure. I've learned many things at A&M, but something I will not ever forget is that Aggie spirit which is still vibrant within me and that makes me love the school more now that I am away. It has been wonderful to have been an Aggie, and especially to have been a member of that fighting Texas Aggie Band that must be prouder, louder and sharper than ever now that we win not only during the half time like old times, but win all the way.
 That number one in the nation has given me the most pleasant satisfaction of the year, and I exploded with enthusiasm when I read that the Miami Herald had A&M first in the nation. I congratulate those gridiron heroes with all my Aggie spirit and I

want them to know that thousands of miles away there are people pulling for that Aggie team, and that I wish that they beat the hell out of everybody and especially the teasippers, whom I've never seen the Aggies beat, but now is no next year story, so I already feel sorry for those Longhorns whom I don't think have a chance to even score against us.
 Thanks "Bear" for doing such a wonderful job with that team, thanks to all the Aggies for yelling their lungs out, and keep yelling until you can't hear yourself and if you can't talk after a game you have done your job well.
 If anyone of you Aggies want to write to me and tell me about those wonderful games, do so and send me clippings if possible because I want to be fully informed about that Aggie team.
 My address is:
 Guy Fernandez L,
 Aptdo. 545
 Lima-Peru
 South America
 I'll be expecting to hear from you Aggies.
 Guy Fernandez '56

Cadet Slouch by Jim Earle

"IF WE STUDY FOR QUIZZES, ADDINGTON MY BOY, WE'LL ONLY GRADUATE, WHO WANTS TO LEAVE THIS JOYOUS EXISTANCE AS LONG AS OLD DAD'S MONEY HOLDS OUT?"

"IF I FLUNK THIS COURSE AGAIN AN' HAVE TO STAY ANOTHER SEMESTER, I'LL KILL MYSELF!"

Job Interviews

The following interviews will be held in the Placement Office:
Friday
 Sun Oil Company interviews January chemistry graduates preferably and June chemical and petroleum engineering graduates.
 Ideco, Inc. interviews aeronautical, civil and mechanical engineering majors.
 Civil Aeronautics Administration interviews civil, aeronautical, electrical and mechanical engineering majors for opportunities.
 Arthur Young and Company, Kansas City, Mo., interviews accounting majors.
 Socony Mobil Oil Company, Inc. interviews electrical and geological engineering and geology (with a solid background of physics and mathematics). Juniors and sophomores will be interviewed at 4 p.m. to express what might be expected with a company like Socony Mobil.
 U.S. Naval Air Development & Material Center, Johnsville, Pa. interviews electrical, mechanical, aeronautical and physics majors for openings in research, design, development and test.

What's Cooking

The following clubs will meet tonight:
 7:15
 Del Rio Hometown Club meets in the YMCA.
 Fort Bend County Hometown Club meets in Room 215 Academic, to discuss the Christmas Party.
 7:30
 Texarkana Hometown Club meets in Room 126, Academic.
 Pasadena Hometown Club meets in Room 207, Academic, to plan for Thanksgiving social.
 Austin Hometown Club meets in Room 125, Academic, to discuss Mothers Club system.
 Grayson County Hometown Club meets in Room 203, Academic, to elect officers and plan a party.
 Abilene Hometown Club meets in Room 227, Academic, to elect officers.
 Milam County Hometown Club meets in the YMCA Lounge to elect officers.
 Wheeler-Collingsworth Club meets in the Anderson Room of the YMCA.
 Kaufman County Hometown Club meets in the North Solarium of the YMCA.
 Henderson County A&M Club meets in Bagley Hall to elect officers and discuss plans for the year.
 Panhandle Club meets in Room 305, Academic.
 Deep East Texas Hometown Club meets in Room 105, Academic to see the 1956 Texas vs. A&M game film and discuss Thanksgiving Party.
 Marshall Hometown Club meets in the YMCA.
 Fannin County A&M Club meets in Room 305, Academic.
 Northeast Texas Hometown Club meets in Room 127, Academic, to plan the Thanksgiving party.
 Yankee Hometown Club meets in Room 3B of the Memorial Student Center to elect officers.
 Fayette-Colorado Hometown Club meets in Room 108, Academic.

Highlights and Sidelights From Your State Capitol

By VERN SANFORD
 Texas Press Association
 AUSTIN, Tex.—Gov. Price Daniel's special session legislative program apparently is on the way to being passed—with additions and changes here and there.
 Both Senate and House passed water bills—differing quite a bit from each other, and even more from the measure the governor requested.
 Governor Daniel asked for a statewide water planning division with an appropriation of \$1,024,000. He also asked for state authority to contract with the federal government for water storage in federal reservoirs.
 Cut out of the House Bill was the water storage provision. Appropriation also was reduced to about \$951,000.
 Senate cut the appropriation to \$600,240 and gave the proposed new division authority to do research, but not to formulate an overall plan. It authorized conservation storage agreements, but only if they are first approved by the Legislature.
LOBBY PROPOSALS—After all the furor, both House and Senate lobby control bills looked pretty mild.
 Both would require registration of paid lobbyists and reports on how much they spend to influence

THE BATTALION

The Editorial Policy of The Battalion
 Represents the Views of the Student Editors

The Battalion, daily newspaper of the Agricultural and Mechanical College of Texas and the City of College Station, is published by students in the Office of Student Publications as a non-profit educational service. The Director of Student Publications is Ross Strader. The governing body of all student publications of the A&M College of Texas is the Student Publications Board. Faculty members are Dr. Carroll D. Laverty, Chairman; Prof. Donald D. Burchard, Prof. Robert M. Stevenson and Mr. Bonnie Zion. Student members are W. T. Williams, John Avant and Billy W. Libby. Ex-officio members are Mr. Charles Roser, and Ross Strader, Secretary. The Battalion is published four times a week during the regular school year and once a week during the summer and vacation and examination periods. Days of publication are Tuesday through Friday for the regular school year and on Thursday during the summer terms and during examination and vacation periods. Subscription rates are \$3.00 per semester, \$6.00 per school year, \$6.00 per full year or \$1.00 per month. Advertising rates furnished on request.

Entered as second-class matter at Post Office at College Station, Texas, under the Act of Congress of March 3, 1879.

We're reaching
 for the stars
 ...are you?

You might call us "talent scouts." Certainly we're seeking talented young men—the kind that will star on our teams of engineers and scientists at Convair. Here is opportunity. Because Convair is engaged in the widest diversity of aircraft and missile projects in the U.S. today. Talk with the men from Convair (dates below). Let them explain the many advantages of working at Convair... of living in beautiful San Diego.

CONVAIR SAN DIEGO

Plan your career with America's top air-frame builder. Here you'll find a wide range of opportunities for the graduate engineer. You'll work with a congenial group in the Company famous for such advanced aircraft as the 880—world's fastest commercial jet airliner; F-102A—first supersonic interceptor; Sea-Dart—first water-based jet fighter; and long-range research on nuclear aircraft. There is no ceiling on your chances to advance and make a name for yourself at Convair San Diego.

CONVAIR-ASTRONAUTICS

During 1957, groups of outstanding scientists and engineers, together with hand-picked young graduates, will occupy the new \$40,000,000 Convair-Astronautics facility. Here, in a unique environment, they will develop and design ATLAS—an Air Force top-priority Intercontinental Ballistic Missile (ICBM)—the forerunner of travel into space. You may qualify for a position with Convair-Astronautics' ICBM project—one of the most important of its kind in the United States.

Graduate and undergraduate students majoring in
**AERONAUTICAL, ELECTRICAL, MECHANICAL, NUCLEAR,
 CIVIL, CHEMICAL ENGINEERING
 plus MATHEMATICS, PHYSICS, METALLURGY**

our Convair representatives will be conducting

Interviews: November 11-12
