

An Editorial

Thanks, Board

A&M's Board of Directors Saturday showed they could approve constructive measures when they okayed installation of an up-dated IBM-701 electronic computer and gave the go-ahead to plans for a nuclear science center.

These men showed seldom-seen foresight when they placed A&M at the top in the South in both electronic computer facilities and nuclear science.

Congratulations and deep gratitude should come from all those interested in the advancement of A&M as an educational institution.

The computer can make it possible to solve problems which could not be solved formerly on this campus even with the versatile network calculator in the Electrical Engineering Department.

With completion of the nuclear science center will come a new opportunity for young Texans to get better training in this field than anywhere in the South.

A step forward has been taken. Let's continue on the same path.

Job Interviews

The following job interviews will be held Wednesday in the Placement Office:

Dow Chemical Company, Texas Division, Freeport, Texas, interviews chemistry (all degree levels), chemical engineering (all degree levels), electrical engineering and mechanical engineering (BS and MS degree levels) majors.

St. Louis, San Francisco & Texas Railroad Co, Fort Worth, interviews civil engineering majors for engineer grade "B" positions and student apprentice programs.

Prudential Insurance Company of America, Houston, interviews agricultural economics, business administration and economics majors for management development program and technical positions.

Allis Chalmers Manufacturing Company interviews agricultural, electrical, industrial and mechanical engineers.

Western Union Telegraph Company interviews electrical engineering, industrial, mechanical engineers, accounting and business administration majors for positions in operating, accounting, plant and engineering and development departments.

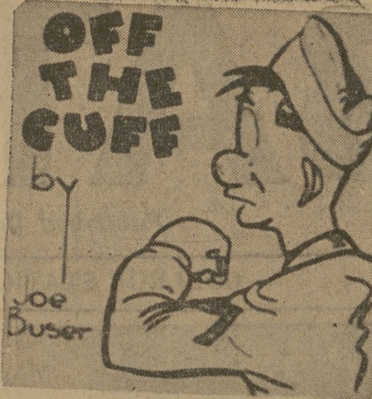

Convair Aircraft, Fort Worth, will interview aeronautical, civil, electrical and mechanical engineering (all degree levels) mathematics (MS, PhD) and physics (MS, PhD) majors for job opportunities in aircraft, research and development, advanced weapons system and nuclear research.

What's Cooking

The following clubs and organizations meet tonight at 7:30:

Collegiate F. F. A. chapter of A&M meets in the agricultural Engineering Building to discuss plans for the F. F. A. banquet.

The Math Club meets in Room 206 Academic for a business meeting. Refreshments will be served.

One little girl did what 7,000 Aggies couldn't:
 The hairy growth on Welton Jones' face is no more.
 Other hangers on from Macbeth could well profit from this and go see their girls.

* Let the library set up a new book exhibit: no one notices.
 Give a concert in G. Rollie: no one shows.

But put a model highway complete with little cars that move in the MSC lobby and the crowd chokes the traffic to the post office.

What we need is a model MSC lobby with moving people.

A scene from the classroom: Says the prof: I like A&M. Whats more, I like Aggies. And I like College Station. If I didn't - I might go out and get a job." Laughter by all.

Letters To The Editor

Editor, The Battalion:
 Those who favor coeducation at A&M say that we are losing out on attracting new students because some people think that the Corps and its tradition are more important than progress. They reason that by turning A&M into a coed school we would bring Aggie land up to date and experience enrollment increases enjoyed by other coed colleges. I doubt this seriously.

In adopting coeducation, all we would be doing is to put ourselves in competition with schools like TU, Rice, TCU and others. It is foolish to even think that we could attract prospective students on that basis. We would have absolutely nothing to offer that would make Aggie land preferable to these long-established coed institutions.

They proudly crusade that "old traditions must give way to progress." One of these traditions enjoyed by all Aggies which would surely be lost is that here a person is judged solely by what kind of man he is; it makes no difference how much money he has. Yet no intelligent person would deny that at coed schools, a person's clothes, car and bank account determine which fraternity he belongs to and consequently who his associates are.

Editor, The Battalion:
 Is this progress? Why change just for the sake of change? If this is what you want, don't claim to be an Aggie.

Editor, The Battalion:
 My hat's off to you for having the courage of your convictions. You seem to weather all your trials and persecutions.

Please answer this question for me. How much is the big, swank dormitory for the 90 football players going to cost and is the money coming from state funds; or maybe the rich Aggies are putting up the money? I'm anxious to know. Some of the older dorms

Man to Man

By JOE TINDEL

News really popped over the weekend and as I write this, I'm wondering if we can get it all in for you, the readers.

I'm still quite elated over the board's forward step in the nuclear science and computer fields. The impact of their recent decision can be felt all over the South as a selling point for Texas A&M.

Despite the fact that we do not always agree, the board has definitely done something in this case with which I am wholeheartedly sympathetic.

It's too bad, they can't see the educational value of keeping the Corps optional.

Speaking of optional Corps, I would like to thank the board for what seemed to be a warm welcome and fair hearing of the Civilian viewpoint on compulsory Corps.

They evidently did not plan to change their minds but the interest showed was commendable.

These men want to be convinced definitely that compulsory Corps is wrong. Maybe they won't but indications are that they will.

Dr. Meredith, the RE Week convocation speaker, "threw in" some interesting observations about the future of A&M as he had observed it.

It's strange that a man who had been here only four days could see the same problem many of us have been seeing all along.

It has become necessary to provide that after March 1, any letters received unsigned will not be published. If you have opinions to express don't be afraid to express them. This is a free country isn't it?

are in need of repairs badly. How can so much money be spent for only 90 boys to reap the benefits while other boys are living in undesirable dorms and also there is not sufficient ROTC quarters? Please clear up the fog in your mind on this point.

Test your personality power

(A one-act trauma in eight scenes)

- Do you think automation will ever take the place of a pretty secretary? YES NO
- Do you read science-fiction comic books to keep up with your science professors' views on the space age?
- Do you think marriage should necessarily void any of the rights granted by the Constitution?
- Do you think any other cigarette has ever matched Camel's exclusive blend of costly tobaccos?
- Do you think good manners in a man are old-fashioned? (For co-eds only!)
- Do you think rockets will ever outdo Hollywood in launching "heavenly bodies"?
- Do you think of Monroe only as the 5th President of the United States?
- Do you prefer Bach to Rock?

THE BATTALION

Opinions expressed in The Battalion are those of the student writers only. The Battalion is a non-tax-supported, non-profit, self-supporting educational enterprise edited and operated by students as a community newspaper and is governed by the student-faculty Student Publications Board at Texas A. & M. College.

The Battalion, a student newspaper at Texas A & M., is published in College Station, Texas, daily except Saturday, Sunday, and Monday, and holiday periods, September through May, and once a week during summer school.

Faculty members of the Student Publications Board are Dr. Carroll D. Laverty, Chairman; Prof. Donald D. Burchard; Prof. Robert M. Stevenson; and Mr. Bennie Zinn. Student members are W. T. Williams, John Avant, and Billy W. Libby. Ex-officio members are Mr. Charles A. Roebert; and Ross Strider, Secretary and Director of Student Publications.

If you answered "No" to all questions, you obviously smoke Camels - a real cigarette. Only 6 or 7 "No" answers mean you better get on to Camels fast. Fewer than 6 "No's" and it really doesn't matter what you smoke. Anything's good enough!

But if you want to enjoy smoking as never before, switch to Camels. Nothing else tastes so rich, smokes so mild. Today more people smoke Camels than any other cigarette. The best tobacco makes the best smoke. Try Camels and you'll agree!

Have a real cigarette - have a Camel
