Swimmers Win AAU In Dallas

By JOE STEEN

A total of 82 points carried the men's division of the College Station Swimming Team to first place in the Southwestern Amateur Athletic Union meet held at Brookhaven Country Club in Dallas last weekend.

The team placed first in men's 400-meter freestyle relay, compos-

ed of Don Draper, Dick Hunkler, Orlando Cossanni and John Harrington. The team also placed second in men's 400-meter medley relay composed of Harrington, Hunkler and Cossanni.

Placers in other events were:
Men's 100-meter backstroke, Harrington, first; Hunkler, fifth. Men's 100 and 200-meter breaststroke, Bill Farrar, first. Men's 200-meter butterfly, Cossanni, first; Farrar fourth. Men's 100 meter butterfly, Cossanni third. Men's 200 and 400-meter freestyle, Draper fifth in both events. Men's three-meter diving, Billy Tutor, sixth.

A&M to Offer New Doctorate

Beginning this fall, following recent approval by the Texas Commission on Higher Education, A&M will become the first institution of higher learning in Texas and the Southwest to offer a Ph.D. program in meteorology.

Dr. Dale F. Leipper, head of the Department of Oceanography and Meteorology, says the new Ph.D. program will help to combat the serious shortage of adequately-trained meteorologists in the country.

Meteorology, the natural science of the atmosphere, has important and extensive bearing upon agriculture, engineering and all the other human activities, and is playing a steadily increasing role in military affairs, he said.

Aviation Emphasis
"With the coming of the 'air age,' the science of weather has veered its emphasis to aviation from plant and animal life applications, as reflected by transfer of the Weather Bureau from the Department of Agriculture to the Department of Commerce about 1940," Leipper said.

"Consequently," he added, "training and research were re-directed, and little advance has been made in the important agricultural and engineering applications of weather and climate, particularly in the former."

He stated that most institutions which have individual courses or complete undergraduate programs in meteorology established them in the last 10 years to meet the growing demand.

Masters Degree Minimum
"However, training in professional meteorology continues to be considered as being primarily at the graduate level, and the master's degree has been and is still the usual minimum objective in the education of the professional meteorologist," Leipper said.

He brought out the fact that in the past, students from Texas and neighboring states, had to travel to Los Angeles, Chicago or to the East if they were interested in training in professional meteorology.

"This didn't encourage many people from this section of the country to enter that field," he said.

Organized in 1918
It was in May, 1918, that A&M became the site of the nation's first large-scale meteorology training program. War was raging in Europe and the Army established the school to train meteorologists for military service.

By the time the armistice was signed, more than 300 men trained at the school and at weather stations had been sent overseas, more than 200 others were on duty at military installations across the country and 25 had been transferred for duty with the Navy.

CAMPUS CLEANERS

Elect E. R. Alexander for Representative State Legislature, District 44, Brazos County

As a superintendent of schools, I learned about public school budgets. As head of the Department of Agricultural Education of Texas A. and M. College, I learned about college budgets. As a member of the Texas Legislature, I would support the A. and M. budget with sympathy and understanding. I have taught in the public schools in McLennan County and Brazos County. I taught at A & M College in The School of Agriculture until March 31, 1953. Since that time I have been in business in Bryan.
