

FACULTY TALK

Ben H. Evans, coordinator of architectural research at the Texas Engineering Experiment Station, served as a critic of a technical writing entitled "Efficiency of Domed Acrylic Skylights" at the request of Illuminating Engineering. The writing and Evans' discussion appeared in the December, 1958, issue.

"The Formation of Interfacial Area in Immiscible Liquids by Orifice Mixers," written by L. S. Scott, W. B. Hayes III, and C. D. Holland, has been reprinted from the September, 1958, issue of the A.I.Ch.E. Journal by the Texas Engineering Experiment Station, A&M College System, as Reprint No. 89.

Matthew A. Nowak of the Architectural Research Group of the Texas Engineering Experiment Station was delegate to the Building Research Institute's Conference in New York City. The conference was attended by builders and architects.

The attendants were concerned with building. Speakers were prominent acoustical engineers from the United States.

Nowak is the author of a recent publication of the Station entitled "A Sound Survey of the Geometric School Plant."

Dr. A. F. Issbell, associate professor of chemistry, will deliver talks to local sections of the American Chemical Society in the South-eastern area of the United States during the weeks of Feb. 9-20. He will talk on "Some New Aspects of Organo-Phosphorous Chemistry," which is his current research interest.

He will talk in Knoxville, Kingsport, Chattanooga, Nashville and Memphis, Tenn.; Huntsville, Auburn, Birmingham and Sheffield, Ala.; and in Atlanta, Ga.

Dr. Ralph A. Zingaro, assistant professor of chemistry, is attending the Oak Ridge Institute of Nuclear Studies this month. This is a special accelerated course for training scientists in the use of radioactive isotopes.

Dr. Leslie V. Hawkins, associate professor of industrial education, will be a consultant at a study commission workshop for high school industrial arts teachers at Port Neches High School, Jan. 31. The workshop is one of a series sponsored by the Texas Industrial Arts Association.

Dr. Lawrence S. Dillon, associate professor of Biology, has been elected a Fellow of the American Association for the Advancement of Science.

In making the announcement, Dael Wolfe, administrative secretary of the American Association for the Advancement of Science, said that Dr. Dillon's election was in recognition of his standing as a scientist.

Dr. Dillon has been a member of the association since 1951.

Mid-Term Grads Hear Baylor Vice President

The 350 mid-year graduates were told Saturday that "we Americans are mindful of the challenge flung down to us by international communism."

The commencement speaker, Dr. Paul Geren, executive vice president of Baylor University who on Feb. 1 will become executive director of the Dallas Council on World Affairs, said, "Indeed, we may be too mindful, so that the only reason we have for an action is that it opposes communism."

"We also know that we are involved individuals and members of a great collegiate family like that of A&M."

"Someone has defined extentionalism as the realization that no one can take medicine for you. The communist challenge is thus a part of our existence and meaningful to the community of A&M, notable, among other things, for its work in science and engineering, education for commerce and agriculture, the largest of all American colleges and universities as a contributor of officers for the United States military services, the home of the Student Conference on National Affairs held yearly, to cite a favorite of mine, and, to be a party to masculine prejudice, defender of the rights of man to go to college with his fellow man."

"In our society the purpose of education is the development of the individual person to the highest potential."

Geren said that in higher education which seeks the development of each person according to his capacities there is no room for complacency.

"The task is never finished; the solution of one problem gives another and usually a higher

Carlile Elected Agronomy Prexy

Bobby Carlile of Stanton has been elected president of the student chapter of the American Society of Agronomy.

Larry Hausman of Goliad is vice-president and Norman Mahrenholz of Vincennes, Ind., is treasurer. They are all seniors.

Other officers elected include Harold Henk of San Marcos, treasurer, and Dale Darling of College Station, reporter, both juniors.

BUMPY LIFE OF THIEVERY

DENVER, Colo. (AP) — One Denver automobile thief may never again try his hand at stealing a car.

The thief successfully crossed the ignition wires and started the motor of Clarence A. Serr's car. Then he hopped in and started to drive away.

Suddenly, the car came to a halt with a terrific jar. The thief deserted the car and fled. The car had a flat tire.

State Farm Saved Texans Money

We aim to insure careful drivers only. Savings here have allowed us to pay dividends to Texas policyholders year after year. Call me.

problem. "Certainly one of the most cruel ironies of our times is the willingness of many in communist societies to give more and work harder for their lower purpose, as we see it, than we are willing to give for our own."

"The best thing each of us can do at a commencement, whether administrator, faculty, graduating student or ex-student, is to face up to the demands of our way."
